Smith & Wesson

Case Study

Smith & Wesson

Location: Maryville, Tennessee Square Footage: 650,000 Dealer: Commercial Environments, Inc. Architecture & Design Firm: MBI Companies, Inc. After 170 years in Massachusetts, Smith & Wesson, one of the oldest firearm manufacturers in the U.S., relocated its headquarters to Maryville, Tennessee. The new facility blends the company's rich legacy with a modern, flexible work environment. It features private offices, open workspaces, and collaboration areas, with distinctive elements honoring Smith & Wesson's heritage. One standout feature is the custom boardroom table, designed through Kimball International's ByDesign program. Inspired by a vintage Smith & Wesson firearm, this show-stopping piece stands 15 feet wide by 30 feet long with a lustrous wood base, sleek metal accents, and a unique shape resembling a rifle stock. The project has exceeded expectations, creating a welcoming and dynamic environment that reflects the strength and tradition of the Smith & Wesson brand.

"Experiencing the building's ribbon-cutting ceremony alongside the company's executives, board members, and industry partners, and feeling the resounding excitement for the space and the future of the company, is something we will carry with us."

Jansen SmithProject Manager at Smith & Wesson
