

Compton High School

Location: Compton, California

Square Footage: 223,650

Dealer: D&D Learning Spaces

Architecture & Design Firm: DLR Group

Photography: Lawrence Anderson Studio

Compton High School's historic transformation introduced a state-of-the-art campus designed to inspire future generations. Finely crafted and adaptable solutions from Kimball International's family of brands furnished vital learning and gathering spaces, from student dining and administrative offices to dynamic collaboration zones.

These solutions extended into the Andre "Dr. Dre" Young Performing Arts Center, where inviting lounge seating and spacious workstations foster creativity in professional-grade performance and recording spaces. Praised for exceptional quality and service, Kimball International proved an essential partner in the campus' future-ready design, creating inspiring environments that nurture both student growth and educator success.

Nate & Natty Lounge / Universal Tables / Strassa Tables

Priority Desk / Priority Storage

"When evaluating the best solution for office and dining furniture for the project, Kimball International was our first choice. Having visited their factory in Jasper, Indiana, over ten years ago, I was struck by their dedication to design, quality, and service—from ordering to manufacturing and testing."
