## *Professional Services Solutions*

Professional services firms rely on environments that reflect credibility, support focused work, and enable collaboration while remaining flexible as client expectations and work models evolve. At Kimball International, we begin by understanding the unique needs of these organizations, where privacy and openness must coexist and the workplace serves as an extension of the firm's brand, culture, and commitment to excellence.

Since 1950, Kimball International has manufactured quality furniture rooted in craftsmanship, durability, and thoughtful design. Through our family of brands, we offer a broad range of solutions from private offices and conference spaces to collaborative and client-facing environments. These products allow firms to create cohesive, high-performing workplaces. Our perspective is clear: purposeful, well-crafted spaces empower people, reinforce trust, and support long-term success in the professional services market.
