

Genesee Health System

Location: Flint, Michigan
 Square Footage: 180,000
 Dealer: Verse Two LLC
 Architecture & Design Firm: Verse Two LLC
 Photographer: JJN Photo

For over 50 years, Genesee Health System (GHS) has been the cornerstone of public services in Genesee County, providing care for individuals with serious mental illness, intellectual and developmental disabilities, and substance use disorders. Following the acquisition of a new main campus, GHS worked closely with Kimball International to create a warm, welcoming environment that balances comfort with professional functionality. This resulted in a thoughtfully designed campus that prioritizes both visitors and staff. From inviting waiting areas and patient rooms to versatile training spaces and relaxing breakrooms, every corner of the new GHS campus reflects the intentional, human-centered design the organization envisioned. Kimball International's solutions helped bring GHS's vision to life, standing as a powerful testament to their commitment to staff, patients, and the broader community.

Ezzeri Patient Lounger

"Kimball International's healthcare solutions allowed us to create spaces that feel welcoming and supportive while still meeting the rigorous demands of behavioral and outpatient care. That balance is why we continue to work with them."
