Work That Feels Good

What if the spaces where we work are designed for more than what we do? What if they were designed for how we feel? At Kimball International, we believe in bringing that idea to life.

Inspired by research into human experience, we believe spaces should be designed to support the range of moments that happen throughout the day, from connection and collaboration to focus and rest. By combining thoughtful design, materiality, and product solutions, we strive to create environments that feel intuitive, supportive, and human.

Conference
Huddle
Training

WaveWorks

With solutions for conferencing, training, meeting, and dining, WaveWorks has it all. This table collection is designed to support connection, collaboration, and learning across a variety of environments. Flexible planning opportunities help create cohesive spaces that complement both contemporary and traditional interiors.

Zing

Zing is a flexible table collection for spaces that change throughout the day. Flip/nest functionality, integrated power, and clean wire management help training, meeting, and multipurpose environments reconfigure with less effort.

Strassa / Picado

Tessera / Theo

Tarver

EverySpace / Mabel

Private Office

Designed to support focus and productivity, private offices provide a comfortable setting for individual work, virtual meetings, and moments of concentration throughout the day.

Tessera / Karid

WaveWorks & WaveWorks 2.0

WaveWorks and WaveWorks 2.0 offer solutions to outfit an entire organization. With a broad offering of desks, storage, tables, and planters, these series offer coordinated solutions for private office, open plan, meeting spaces, and collaboration areas. WaveWorks is a comprehensive laminate and veneer casegoods platform. WaveWorks 2.0 is a metal storage collection that can be used with WaveWorks or other series.

Priority

Priority is a coordinated workplace collection of desks, tables, storage, and wall panels designed for cohesive planning. Height adjustable desks, integrated storage, and wall-mounted elements support private offices, shared workspaces, and benching applications.

Tessera

Tessera

Tessera

EveryStage

Open Workspaces

These workspaces support users throughout their workday. From destinations with visual and acoustical privacy to informal meeting areas, these spaces accommodate planned and impromptu interactions.

APPLICATIONS:

Shared
Touchdown
Collaboration

EverySpace / Lavoro

EverySpace

EverySpace is a modular workplace platform designed to adapt as organizations and workstyles evolve. Its flexible planning capabilities support a wide range of applications, from individual workstations to expansive team environments.

WaveWorks 2.0

Lunor / Narrate Systems

Priority / Xsede / Narrate Systems

Social & Collaboration

These spaces promote casual interactions and reinforce relationships. Whether showcasing a private, focus area or a cozy mix of lounge seating, create welcoming areas that nurture co-worker connections and build connections through social spaces.

APPLICATIONS:

Café & Dining
Commons
Focus
Outdoor

Zing / Grin

Strassa ByDesign / Whimsy

Fringe

Pairings

Pairings is a lounge-based collection designed to support the evolving ways people work, gather, and connect. A balance of collaboration, focus, and privacy helps create comfortable destinations throughout the workplace.

Nate & Natty

Nate & Natty is a seating family that includes side and conference chairs, lounge seating, and coordinating stools. Simple forms, adaptable material options, and a welcoming aesthetic help the collection scale across workplace, education, and healthcare settings.

Eklund

Connolly

Grin

Welcome

From reception areas to informal waiting lounges, these environments set the tone for the workplace while offering guests and employees a place to connect and feel at ease.

Eklund / Mariben

WaveWorks

Wellness

Support well-being throughout the workday with spaces designed for moments of pause and recharge. From quiet areas for respite to spaces that encourage movement and restoration, these environments help create a more balanced workplace experience.

Hock / Delgado

APPLICATIONS:

Respite
Mother's Room

Eklund

Collette

Havei

Ezzeri

Designed with style and comfort in mind, Ezzeri is a seating collection that is ideal for community and respite spaces. Developed with a focus on comfort, it features an intuitive self-weighting recline mechanism, minimal controls, and lighter-scale profile. Ezzeri features multiple back styles, an optional head pillow, and a coordinating ottoman.

Design Forces

The workplace is being asked to do something it was never originally designed for: support human well-being, strengthen relationships, adapt continuously, and create space for new forms of collaboration between people and technology.

None of these Design Forces operate independently, and none have a single spatial solution. Together, they point toward a workplace that is becoming more human-centered, responsive, and deeply connected to how people actually work, feel, and connect.

The most effective workplaces will not simply support work. They will continuously evolve alongside the people and behaviors within them.

Together, these Design Forces point toward a new set of workplace design priorities. The following considerations summarize how these shifts are beginning to influence the environments, experiences, and spatial strategies shaping the future of work.

DESIGN FORCE 1

Human Sustainability

Data and science can make the workplace work for the body, not against it.

Well-being is becoming embedded throughout the workplace rather than isolated within dedicated amenities. By intentionally shaping spaces around emotional and cognitive needs, and increasingly using data to adapt in real time, designers can support focus, recovery, connection, and long-term resilience across the workday.

DESIGN FORCE 2

Slow Connection

Connection does not happen by default.

Meaningful connection is increasingly being treated as a core workplace condition rather than an afterthought. By creating spaces that encourage interaction, comfort, and moments away from digital noise, designers can support stronger relationships, trust, and social well-being over time.

DESIGN FORCE 3

Systemic Flexibility

Flexibility is becoming more proactive and embedded.

Adaptability is evolving from a one-time planning decision into an ongoing system, enabling environments to respond to shifting work patterns, team needs, and real-time data. By prioritizing modularity, multifunctionality, and a strong sense of place, designers can create flexible spaces that balance change with identity and user experience.

DESIGN FORCE 4

Work Unbundled

The office must earn each visit.

Workplace design is shifting toward supporting work as a fluid, intentional experience rather than a fixed daily routine. By creating environments that enable seamless transitions, varied work styles, and moments of focus or respite, designers can better align spaces with evolving work rhythms and digital demands.

DESIGN FORCE 5

The New Colleague

The colleague you direct, not the tool you operate.

Human-AI collaboration is beginning to reshape how workplace environments support communication, decision-making, and shared work. By creating environments that enable collaboration between people and intelligent systems while reinforcing uniquely human skills, designers can balance technological capability with meaningful human experience.

Quick Delivery

To You in 12

Our Kimball International Quick Delivery program features our most popular Kimball, National, Etc., and Interwoven products, options, and surface materials that can be delivered to you in 12 days or less, at no upcharge.

ByDesign

Customize

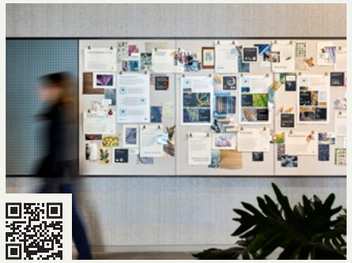

Our ByDesign team is dedicated to providing customized solutions. Focused on the outcome and the experience, we have a step-by-step process that guides customers so that we can create unique solutions for dynamic spaces.

Idea Starters

Visualize

Get inspiration and see how our products can be used together to create dynamic and functional spaces.

Corporate Responsibility

Crafting A Sustainable Future

We strive to exceed existing environmental and social standards and shape a better world, driven by our members, customers, and communities.

DesignSuite

Where Ideas Take Form

Wherever your vision takes you, DesignSuite supports it. From early consultation through order-ready solutions, DesignSuite is a curated, end-to-end design service built to help ideas move forward with clarity, momentum, and confidence.
