

Upcoming Events

<u>Date</u>	<u>Event</u>	<u>Location</u>
Thursday, July 1st	Reg. Meeting: Stations	Brady's Shop
Thursday, July 15th	Board of Directors Meeting	Stephen Case-Pall's
Wednesday, July 14th	Informal Breakfast Meeting	Pickles Restaurant, NP
Sunday, August 15 th	Meeting & Picnic: New Location:	Brady's Parent's Ranch

Important Announcement

The July meeting will be held at Brady's shop, Heartwood Milling, 3000 Paseo Mercado Oxnard, CA 93036 There will be no chairs available. Bring your own chair, or plan to stand. The August meeting will be combined with the annual picnic and will be at Brady's parent's ranch, 9715 Santa Rosa Road, Santa Rosa Valley.

July Meeting

For our June meeting, member Doug Tapping demonstrated the use of the Leigh Dovetail Jig. Doug has the skills of a professional demonstrator, and the information was presented very clearly.

Rogues Gallery

CVWA is making a photo page of all members available on our web page. This is similar to the page offered by the Channel Islands Woodturners for their members. It will be viewable by members only, and will show each members picture with their name. We have over thirty members on the page so far. Bill's use of a consisting portrait background makes it look great, and it's easy to identify members. It only takes a moment, just ask **Bill Aurand** at any meeting to snap a quick photo of you. **Do you know who these CVWA members are??**

July Meeting

Our original speaker for August, **Greg Radley** has recently cancelled his talk for the meeting. Since the meeting is at Brady's shop, the BOD decided it was a good opportunity to hold a "stations" meeting. **Stephen Case-Pall** will demonstrate spindle turning, **Joel Oksner** will demonstrate bowl turning, **Tim Albers** will dimension lumber and **Brady Andresen** will demonstrate spray finishing.

August Challenge

The challenge for August is to build a race car suitable for entry in the Woodie Derby. You can enter either or both classes, and may enter several cars in each. See Derby article elsewhere in this issue for details and specifications.

After that comes the November challenge: Something of wood to wear. There's plenty of time to get your imagination rolling on that one.

If you have any suggestion for coming challenges, please call **Stephen Case-Pall at 805 491 3660**. or email to casepall@roadrunner.com. We'd appreciate your input.

School Closed: No Place to meet?

Redwood School will close completely for the months of July and August. That will leave us to find alternate meeting places for those months. **IMPORTANT: Please be sure to read the following!** The July meeting will be held at **Brady Andreson's** shop. For this meeting, BRING YOUR OWN CHAIR, or plan to stand during the meeting. CVWA members will have station demonstrations.

For the August meeting, we will combine the meeting with the CVWA Summer Picnic at **Brady Andreson's parents'** ranch in Santa Rosa Valley. In addition to the demonstrations at this meeting we will also hold the second annual **Woodie Derby**. The rules for the derby will be the same as last year with Limited and Unlimited classifications. The only change will be to the unlimited class, which will be limited to 3.5 pounds total weight. Now is the time to start on your car for this. There will be some neat prizes for the winners, so enter both classes. Cars entered in last years Woodie Derby are welcome to race for the fun of it, but will not be allowed to compete for prizes. The Summer Picnic is a super

opportunity to chat with other members, meet their spouses and enjoy good food and just plain have a good time. More will come about dates and RSVP's etc. It will be on a weekend TBA.
So you can get started on your car, either for the race, or the challenge, here are the specs.

Stock Toy Car Class

3 1/2" wide max.– including all wheels and accessories.

3 1/2 height max. – including all wheels and accessories.

7 1/2" max length – including all wheels and accessories.

Car weight cannot exceed 1lb (16 oz).

Wood only construction for car **body, wheels, axles and accessories.**

Only needed glue, screws or brads may be used in construction.

No added weights on, or in car.

Lubricants may be used on axles.

May use store bought wheels

No opaque body painting – except for numbers, insignias, or other icons. Clear finish OK.

Propulsion by gravity only.

Must have at least the appearance and the durability of a toy car designed for use by an active child.

Unlimited Class: If you don't see a restriction – there is none!

3 1/2" wide – including all wheels and accessories.

3 1/2 inches in height – including all wheels and accessories.

7 1/2" inches long – including all wheels accessories.

Maximum weight- 3.5 pounds

Some part of the car should have some wood. (This is a "wood working" club!)

Propulsion by gravity only. No rocket engines or maglev.

CVWA's October Auction

Member **Mark Tsujihara** has volunteered to coordinate our October auction. **Mark** will need a bunch of helpers, particularly for the night of the auction, to make things work smoothly. Be sure to let him know you can pitch in. Thanks **Mark**, for keeping the auction rolling!

One of the very popular items in our annual fund-raising auction is items **made by** CVWA members.

While you are thinking of that old tool that you rarely use anymore, think also about making something to donate. We're a bunch of skilled woodworkers, and we really appreciate the skills of other members.

Those items have a lot more meaning to us than a white elephant tool (although we like those too!), so start planning now to make something to donate for the auction. Several members have already offered to donate items in their specialty.

Raffle

Your editor will be in Idaho for the last week of this month, and the Bladerunner is being written before the prizes will be bought. Rest assured, that **Bill Aurand** will have some good stuff there. **Tom Denton** has volunteered to take over the raffle from **Gene Moutes**. Thanks to **Tom** for stepping up, and thanks to **Gene**, for doing a great job the past couple of years.

Southern California Tool Swap Meets

Anderson Plywood

Four swap meets per year Third Saturday of February, May, August, and November
6 AM-NOON 4020 Sepulveda Blvd. Culver City, CA 90230 John Arenson / 310-397-8229

Orange Rockler Swap Meet

Three swap meets per year. Second Saturday of March, July, and October. 6 AM-NOON /
1955 N Tustin
Orange, CA 92865
Drew Schellenbarger / 714-450-2365

San Diego Rockler Swap Meet

Two swap meets per year. First Sunday of April (except Easter) and November. 6 AM-NOON /
8199 Clairemont Mesa Blvd
San Diego, CA 92111
Bill Collins / 619-232-4626

Arroyo Swap Meet

Two swap meets per year. Second Saturday of June and September. 6 AM-NOON / Limited
Dealer Spaces
2707 E. Foothill Blvd.
Pasadena, CA 91107
Bob Wilbur / 626-447-5466

PAST San Diego Swap Meet

One swap meet per year. Friday before the Third Weekend of January. 6 AM-NOON /
Four Points Sheraton Hotel
8110 Aero Dr.
San Diego, CA 92123
Bob Wilbur / 626-447-5466

Club Roster

Any member wishing to have a roster of CVWA members, please email a request to Dave Studley,
DaveStudley@sbcglobal.net

Mega Raffle

For our next Mega Raffle, several members suggested a Midi lathe. Midi lathes are not to be confused with Mini lathes. Midi's are a new breed of lathe to meet the demands of turners who have outgrown their Mini, or want to start turning with a more versatile lathe. The lathe chosen was the **Delta Midi Lathe 46-460**.

This Midi is larger, heavier and has many features found on large lathes, such as an indexing head, greater swing, more powerful, reversible motor and longer bed. **This MegaRaffle will also include the Delta bed extension for this lathe!** If you already have a Mini, you can use all of your accessories on this Midi. Tickets are \$1 each or 25 for \$20. **Bill Aurand** will handle the ticket sales at each meeting. Here's a complete description of this new model of Delta lathe.

With a maximum distance between centers of 16-1/2" you can turn objects as long as a chair leg or as short as a thimble. With the bed extension attached, you can turn bed posts, stair spindles, baseball bats and much more.

You can also achieve a superior finish with the forward and reversing function of the Delta 46-460 Midi Lathe. Sanding a turned piece with the grain causes the wood fibers to lay down and remain rough. Sanding a turned piece against the grain will cut the wood fibers smooth. Rotating the turned piece in both directions is the way to achieve this super smooth finish. Other model lathes require you to remount the work piece backward to

achieve this dual rotation. This is time consuming and often impossible. With the Delta 46-460 it is a simple flip of the switch.

- Powerful 1 HP Max, 1,725 RPM motor
- Large 12-1/2" swing capacity provides the largest capacity in its class
- Best-in-class speed range from 250-4,000 RPM giving the slowest low end speed in its class for large turning and fast high end speed for small turnings
- Patented belt tensioning system for easy and quick speed changes and sets the belt at the correct tension every time for maximum power transfer and longer tool life
- Indexing pin to lock the head stock spindle in 24 different locations for fluting and other decorative applications
- All cast-iron construction provides stability and is extremely durable
- Over headstock On/Off switch provides easy in-use access
- Ball-bearing live center
- Heavy-duty, steel knockout bar
- Electronic Variable Speed with 3 pulley speed ranges provide the required speeds needed to turn a project without changing belt position
- 6 Groove belt provides superior power to turn large objects
- Large up front belt access allows the user to easily change speeds
- On board storage for easy access to adjustment tools
- 6" and 10" Tool Rests provides tool support in a variety of turning applications.
- Motor: 1 HP Max, 120V, 60 Hz, 1 Phase
- Motor Control: Electric variable speed
- Speed: 250 - 700, 600 - 1.800 and 1,350 - 4,000 rpm
- Swing over bed: 12-1/2"
- Swing Over Base: 9-9/16"
- Distance between Centers: 16-1/2"; With 1 extension: 42"; With 2 extensions 67.5"
- Drive spindle thread count: 1" -8 RH TPI Thread
- Drive spindle through hole: 15/32"
- Head and tailstock taper: #2 MT
- Tailstock through hole: 13/32" Self-ejecting
- Tailstock spindle travel: 2-1/4"
- Tool rest: 6" and 10"
- Length: 36"
- Width: 11"
- Height: 17-3/4"

The 46-460 Lathe includes 1 HP Max, 120 V motor, belt tensioning system, 6" and 10" tool rest, spur center, chrome 3" face plate, tool rest base, knockout bar, live center, wrenches.

If you have thoughts or suggestions for our next MegaRaffle, please convey them to **Bill Aurand**, or any BOD member.

Good Woodworking links on the net

As you surf the net for good working information, share them with the rest of us. Email any good links to our Webmaster, **Aubrey Grey**. cva9@iders.com or Stephen Case-Pall casepall@roadrunner.com

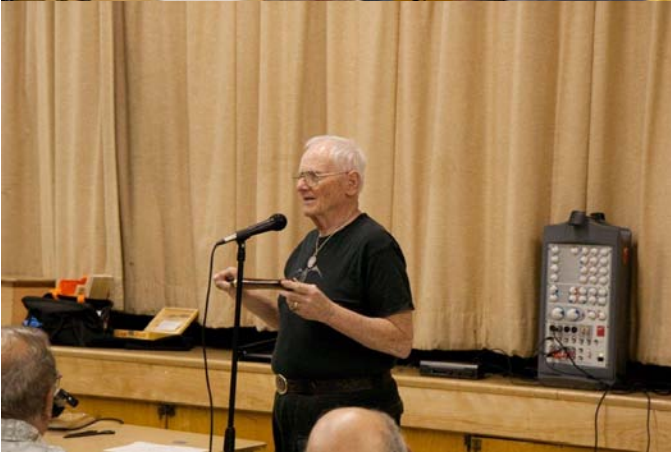

Dick Wakefield sent in the following two sites:

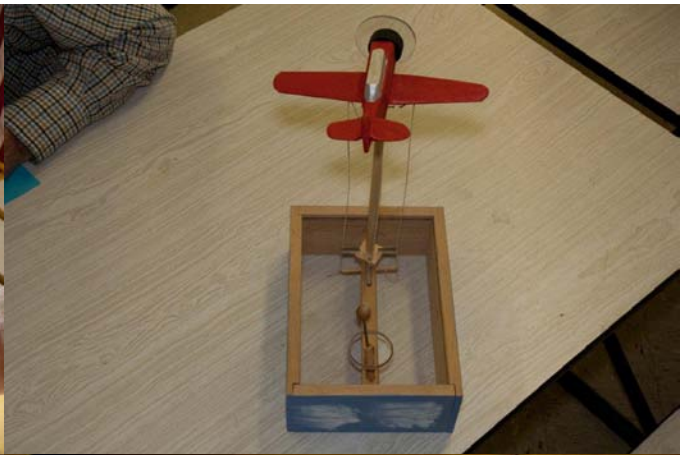

www.shavings.net

About sharpening, chisels and other good woodworking information. Still good.

June Show n' Tell

June's show & tell woodworks and their craftsman are shown in the following.

Grateful thanks to Aubrey Grey for the above photographs.

Special Interest Groups

SIG leaders: PLEASE Send a description and photos of your SIG activities to the editor at casepall@roadrunner.com so we can keep the other members informed of what's happening. Emailed photographs are welcome also.

Turning SIG. The Turning SIG has been the most active and long lasting of the SIGs. Now, its leader, **Stan Wolpert**, has moved to Colorado. We'll miss Stan for much more than his SIG leadership, but the SIG needs a new leader. Another reason for someone to step up to the plate. Let **Stephen Case-Pall** know if you'd like to lead it.

Auction and Woodworking Show Bus Trips

How would you like to get involved in a club function? We need members to coordinate the bus trip to the woodworking show. This is a great way to interact with other members of the club, and to make membership better for all. There are lots of helpers for each of the projects, and **Chuck Pearson**, who's done such a great job of coordinating these in the past will be glad to assist in getting you off and running. I hate to say this again guys and girls, but no volunteers, no activities. They just don't happen by themselves. The bus trips are good fun, and we lose money on each one (no problem with that, it's what we do with dues) so it won't kill us to miss this year, Go for it before it gets cancelled! Contact **Chuck** at 482 3202, pennychuck@verizon.net, or any BOD member as soon as possible..

Vendor List

The following vendors support us by offering discounts to those with a **valid membership card**.
