

CONEJO VALLEY WOODWORKERS ASSOCIATION
NEWSLETTER

January 2026, # 348

What will 2026 bring to our club?

It's hard to believe we are in 2026! Hopefully, everyone had a nice holiday and New Year. As we float into this year, our club will see many changes. As you know, March is the beginning of the new Board. We haven't had much luck getting members to step up and take on some of these responsibilities. With that said, we have a few

diehards who just can't quit. That is a good thing for those of us remaining. The club has secured Newbury Park High School's Wood Shop for our meetings. If you haven't yet been, it is quite impressive. We can use the machines, but we will discuss what that will look like.

Your board has truly worked tirelessly to keep us up and running. It has not been an easy task. We have all been privy to the conversations around whether we are a social group, a potential 501-C3, or just remain as a casual woodworking association. We have not been successful at attracting lots of new members. Our operation budget continues to dwindle due to a lack of paid members, the cost of insurance, and the cost of holding our meetings, where we are required to pay a fee.

With all of that information, we are still trying our best to stay intact. This will be my last effort to implore you to bring your ideas, friends, family, animals, and anyone else who is interested in woodworking.

WHAT IS NEW IN THE WORLD OF WOOD?

CNC machines

3D printers can be used to make a model of something you wish to make of wood.

Furniture design

Tool selection and organization
