

Installing and running Scatter Stuff extension

Warning! This software will only run in Photoshop CC2017 and above

I) Installing

1. Adobe Extension Manager

- If you have Adobe Extension Manager installed
 - On Windows:
`C:\Program Files\Adobe\Adobe Extension Manager CC\`
 - On Mac:
`/Applications/Adobe Extension Manager CC/`
- or download it from <http://www.adobe.com/products/extension-manager.html>
- Chose the Photoshop version you want to install Scatter Stuff to, go to *File > Install Extension* and browse for .zxp file

2. 3rd party ZXP Extension Manager

- Go to <http://install.anastasiy.com/>, download it for Win or Mac and follow the instructions
- Go to <http://zxpinstaller.com/>, download it for Windows or Mac and follow the instructions

3. Manual installation (if nothing else works)

- Rename .zxp to .zip
- Create a folder `com.bbtools.scatter_stuff` inside folder
 - On Windows:
`C:\Users\[USER]\AppData\Roaming\Adobe\CEP\extensions\`
 - On Mac:
`~/Library/Application Support/Adobe/CEP/extensions/`
- Manually extract .zip's content to `com.bbtools.scatter_stuff`

II) Running

- Run from Window → Extensions → BBTools Scatter Stuff

III) Using

- There's a video tutorial available on <https://youtu.be/4fGwaYYNPLk>
