

Caselle

The Caselle Handle Range is a striking fusion of contemporary and traditional design, offering a distinctive aesthetic for kitchens, bathrooms, wardrobes, and bespoke joinery. The D-handle features a six-sided hexagonal bar that subtly fans out at its base, creating a refined architectural detail, while the knob presents a beautifully designed reversed foot, adding elegance and tactile interest.

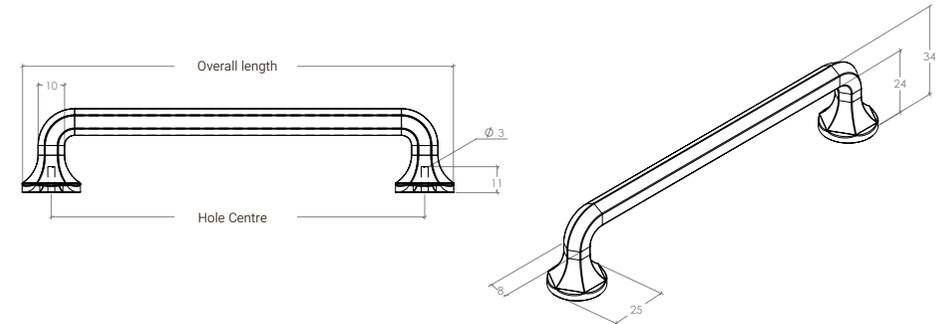

Crafted with precision and attention to detail, Caselle blends functionality with visual sophistication. Its unique geometric forms and balanced proportions make it ideal for designers, builders, and homeowners seeking hardware that enhances both modern and classic cabinetry styles.
