Hardeep Kumar

Frontend, Backend and APIs

As a skilled Backend Developer, I possess a strong command of Django and DRF, specializing in API development. However, I was compelled by Frontend and UI. So I delved into Frontend development, and I have since honed my proficiency in Vue JS, Typescript, and Tailwind CSS. Additionally, I am well-versed in React and Bootstrap(I highly favor MDBootstrap actually). Although I prefer Vue JS for its simplicity and easy-to-pickup nature. My preferred Frontend Framework is Nuxt. With experience in ASP .NET, Docker, some AWS as well, I have established myself as a versatile Full-Stack Developer.
PS: I use Arch BTW.

Work Experience

Dec 2022 – Present

Frontend Developer Intern

Toplearnr - Vancouver, British Columbia, Canada

- Write Frontend using Vue and Nuxt JS.
- Make use of CSS frameworks, Bootstrap and Tailwind CSS for ui designing.
- Use third party libraries and native browser elements to create custom components in accordance to the Design system.

Sep 2021 – Nov 2021

Web Developer Intern

Linked List Technologies LLP - Gurugram, Haryana, India

- Built various Full-Stack Web Applications based on client needs.
- Built dashboards and user facing interfaces connected via APIs and Django Code.
- Create a Chat System using Websockets and Djnago Channels.
- Work with Technologies like Django, Django REST Framework, Bootstrap.
- Also deploy and manage deployed applications on AWS.

Projects

Upasthiti

Django, DRF, Vue JS, Nuxt JS, MDBootstrap

An attendance management system created using Django (DRF) and Nuxt JS for Final Semester Project. The Idea was to collect the attendances of various Institutes at one place and generate various metrics from it. Not just Attendance but some approximation of Students migrating, relocation, Gender ratio, Age ratio, etc. But due to shortening of Academic session to only 3 months, had to cut off a lots of feature.
I was the Team Leader for the Project and worked with 2 fellow Frontend Developers. The Backend was written entirely by me and also lead The Frontend team to build the Application, to build and design UI, integrate Backend into the application.

Inforum

ASP .NET, Nuxt JS, MDBootstrap

A Forum and Blog Site mix designed for students of the College to use as a platform to share and discuss various topics for 5th Semester project.
I was the Team Leader, working with 2 more students. I wrote the Backend for application and also lead the Frontend of the application, Implementing API integration, UI designs and handling various logical aspects of the it.

GH Grabber (Web App and Android App)

Vue 3, Capacitor(Android) / Nuxt 2, MDBootstrap

A Web Application created to get publicly available information of users from GitHub. Also had an Android Application created using Capacitor.

Wrenchlog

Django, MDBootstrap

My first Blog site which was created using Django and MDBootstrap.

Rest of the projects can be viewed at Github or in Projects at my Portfolio site.

Education

2019 – 2022	**GGM Science College, Jewel, Jammu** Bachelor of Computer Applications
2016 – 2018	**Shiksha Niketan Sr. Sec. School, Jeevan Nagar, Jammu** Non-Medical with Computer Science

Skills & Competences

Nuxt JS(2/3) Vue JS(2/3) Django Django Rest Framework Tailwind CSS React

Bootstrap Python Javascript Typescript Vite Linux AWS Cloudinary
