

SAVICA LEATHER RADERMECKER®

Full-grain leather with natural vegetable tanning of beef and bull, the Savica has a first food in oil. It is then third-fed, hand plunged in a bath of a mixture of greases. The Savica strengthens over time. It is a smooth and firm leather, pleasant to work, capable of absorbing shocks and being molded. Its natural color gives it an elegant patina. Leather nourished in excess, it knows to live outside and keeps a constant touch.

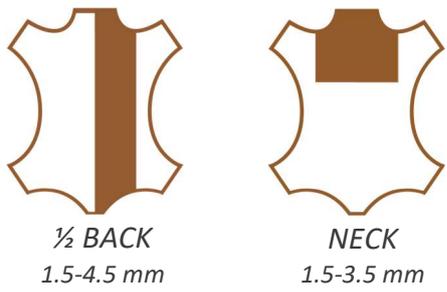

Thickness: 1.5-4.5 mm
Dyeing: Non-tinted for Natural, tinted in a bath for Black
Coating: Natural or aniline
