

## HUKOU LEATHER RADERMECKER®

**L**eather of beef and bull full grain vegetable tanned, the Hukou leather presents a pleasant aspect with a flexible hand, a good elasticity, and a capacity to hug the forms and curves. The Hukou is fed by a hot-air drum and keeps a bold touch. Rather than rejecting external disturbances, it is imbibing it, and regaining its original appearance once dry.

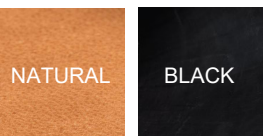

*Thickness:* 1,5-2 mm

*Dyeing:* Natural or tinted through leather in a bath

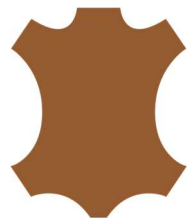

*Coating:* Natural or aniline
