² The graduation rate calculation mandated by Massachusetts regulations compares two largely unrelated groups of students who started in the program in the same year and may result in confusing figures if, for example, the number of people starting the program declined or expanded dramatically from year to year. For instance, if 50 students started in a program in 2016 and 100 students, who started in earlier years, graduated in this program in 2016, the required calculation would result in a 200% graduation rate.

^a The Avondale, AZ campus (OPEID 008221) includes five (5) branch campuses in Rancho Cucamonga, CA, Long Beach, CA, Mooresville, NC, Lisle, IL, and Miramar, FL cohort default rate data is reported on a consolidated basis for these locations in accordance with 34 CFR Part 668, Subparts M and N. Pursuant to 940 CMR 31.03 (Loan Nonpayment Percentage Part (a)) consolidated cohort default rates and related student populations are incorporated into the Massachusetts defined Loan Nonpayment Percentages.
