

## Donor funding for sexual and reproductive health and rights

Donor Tracker Webinar featuring the Kaiser Family Foundation (KFF), March 11, 2021

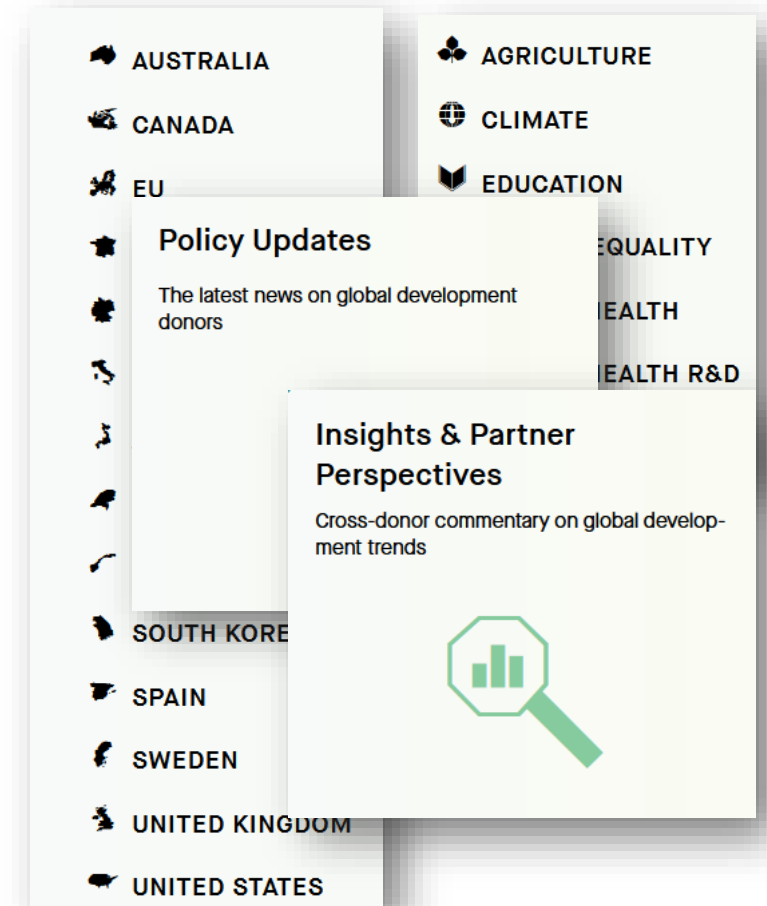

Kalila Jaeger & Zoe Johnson – SEEK Development/Donor Tracker

Adam Wexler – KFF 1

# The DONOR TRACKER supports evidence-based advocacy for global development

- Free, independent website with **donor profiles** featuring **analyses of 14 major OECD donors** and their **ODA flows**
- **Data-driven insights** on strategic priorities, funding trends, decision making structures, budget process and breakdown, and more
- **Seven sectors:** global health, global health R&D, education, agriculture, nutrition, climate finance, and gender equality
- Weekly **policy updates** on policy and financing trends provided by our network of consultants based in donor capitals
- **Partner Perspective** pieces offering viewpoints from others in the global development space
- Regular cross-donor **Insights reports** on latest trends, including new gender-related Insights bundle

Health & HIV Policy

## **Generation equality? Trends from a decade of donor funding for sexual and reproductive health and rights**

**March 11, 2021**

**Kalila Jaeger - SEEK Development/ Donor Tracker**

---

## SRHR is central to gender equality and key in poverty reduction

- Approximately 218 million women of reproductive age in low- and middle-income countries have an **unmet need for modern contraception**
- 5,500 young women aged 15 to 24 years become infected with HIV every week; in 'sub-Saharan Africa', adolescent **girls account for five in six new infections**
- 49% of pregnancies in low- and middle-income countries (111 million annually) are **unintended** resulting in:
  - 30 million **unplanned births**
  - 69 million **abortions**, of which 35 million are **unsafe**
  - 12 million **miscarriages**

---

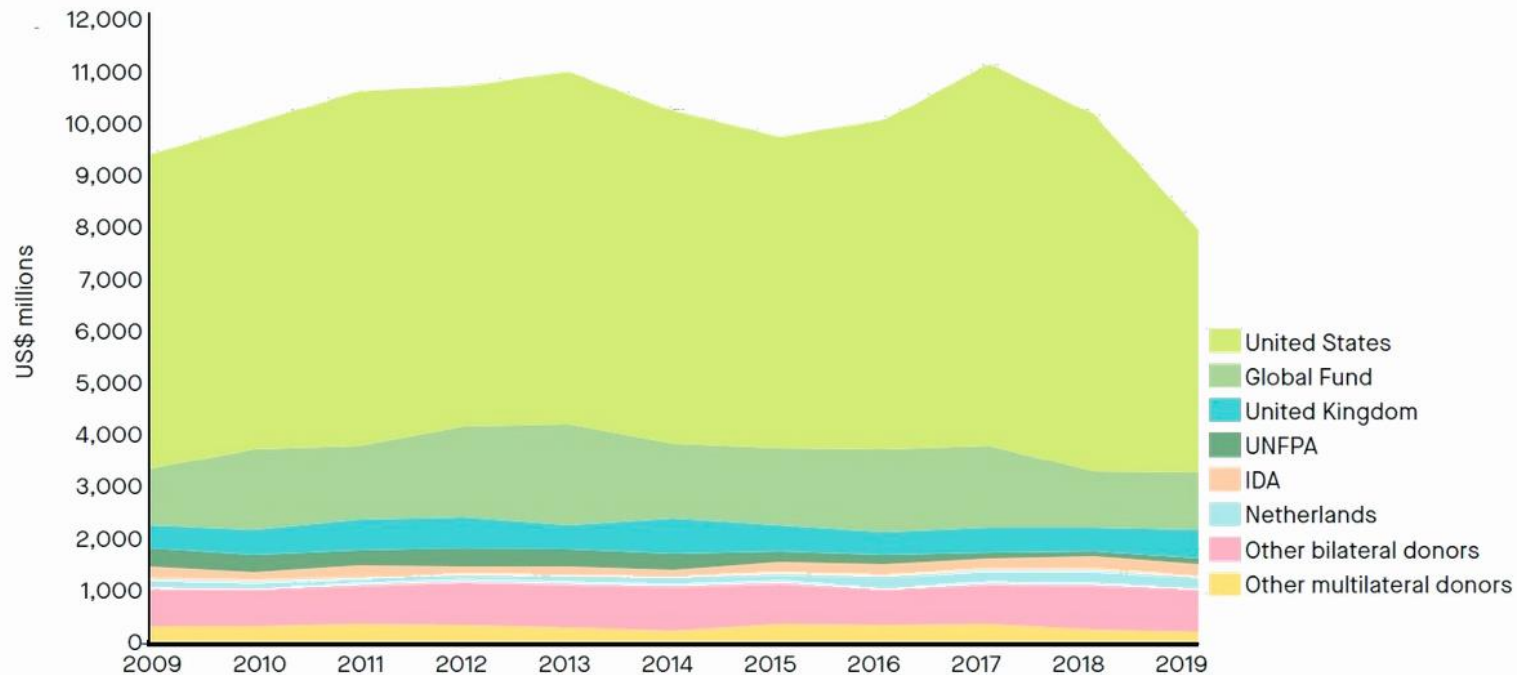

## The Donor Tracker uses OECD data to track donors' development funding

- We analyzed donors' funding to sector code 130: **'Population Policies/Programmes & Reproductive Health'**, broken down into:
  - **13020: 'Reproductive health care'**: reproductive health, prenatal and postnatal care including delivery, prevention and treatment of infertility, prevention, and management of consequences of abortion, and safe motherhood activities
  - **13030: 'Family planning'**: counseling, information, education and communication activities, delivery of contraceptives, and capacity building and training, abortion services
  - **13040: 'STD control including HIV/AIDS'**: all activities related to STDs and HIV/AIDS control such as testing, prevention, treatment, care information, education, and communication

## After a peak in 2017, ODA to SRHR appears to have declined to US\$7.9 billion in 2019

Figure 1: Total ODA to SRHR

All donors\*, 2009-2019

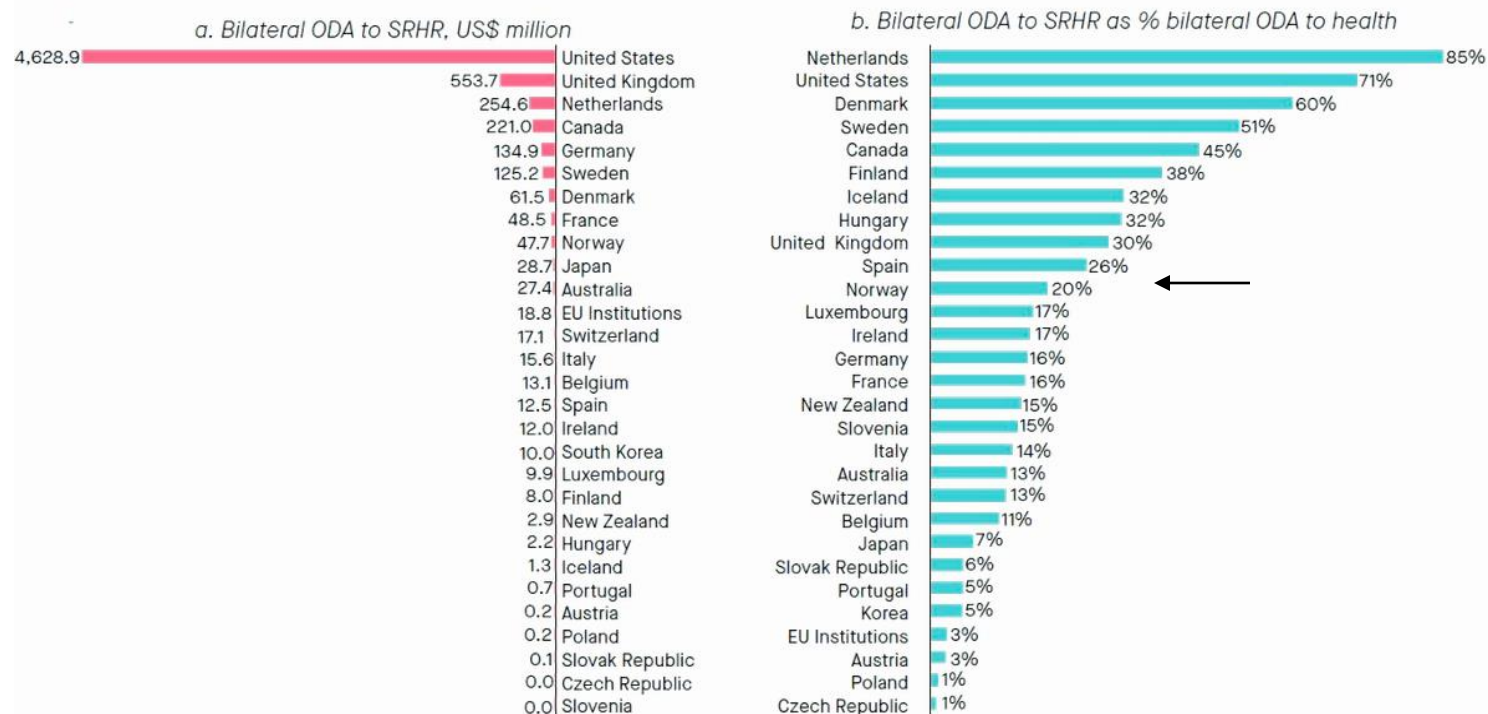

Source: OECD CRS. Gross disbursements; 2019 prices. \*Including bilateral ODA from OECD donor countries and ODA from multilateral donors. Note: 'Other bilateral donors' includes disbursements from remaining 26 DAC donor countries as well as non-DAC donors that report to the OECD. Disbursements the EU Institutions are included in 'Other multilateral donors'.

- After two years of decreases, total ODA to SRHR in 2019 was US\$7.9 billion
- Bilateral ODA from donor countries accounted for 79% of total SRHR funding between 2009 and 2019
- Reduction in funding is primarily attributable apparent decline in US spending, particularly in STD control
- However, US funding to SRHR has not fallen as sharply as 2019 OECD data appears to show

# The US, UK, and Netherlands are the largest donor countries to SRHR; the Netherlands most strongly prioritizes SRHR in its health ODA

Figure 2: DAC donors' bilateral ODA to SRHR and as % bilateral ODA to health  
DAC donors, 2019

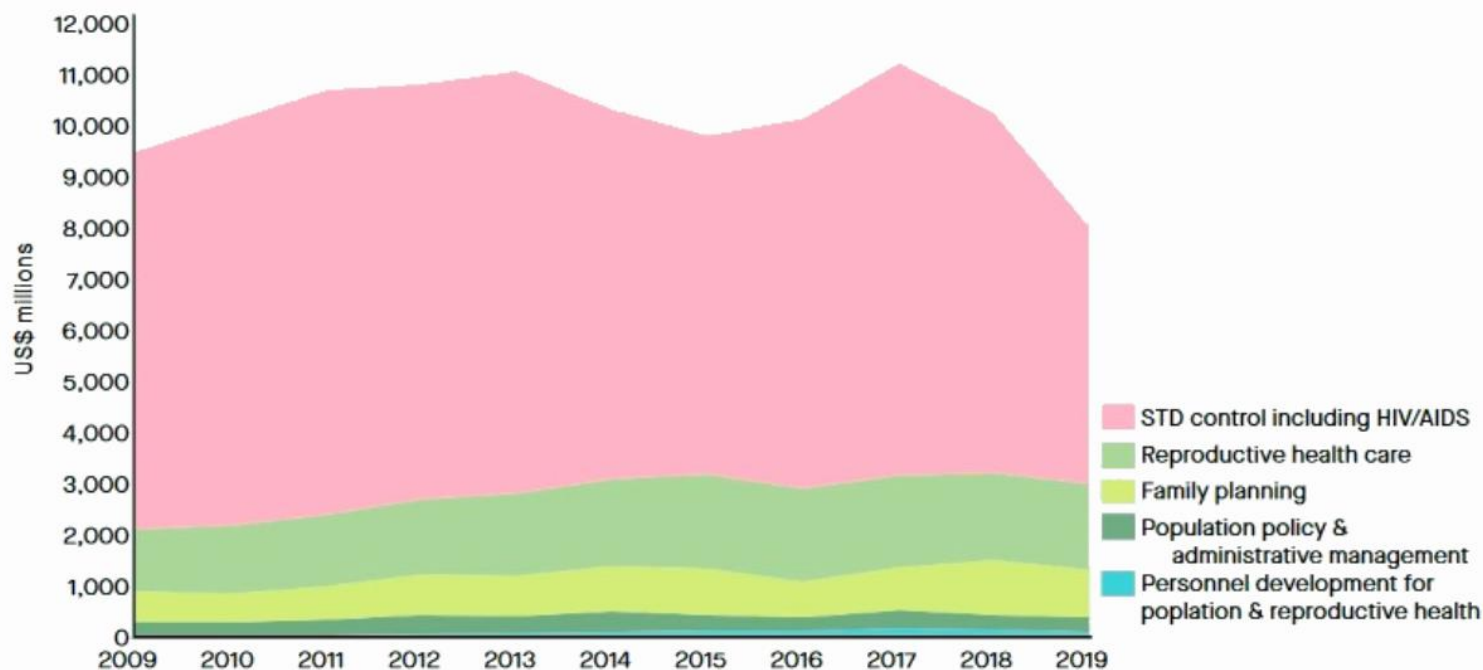

- The US, UK, and Netherlands allocated largest funding levels to SRHR in 2019
- The Netherlands, US, and Denmark gave SRHR highest priority within total health ODA
- DAC donors spent average of 23% total health ODA on SRHR

Source: OECD CRS. Gross disbursements; 2019 prices. Note: Greece did not report any funding to SRHR (sector code 130) in 2019.

## In the last ten years, almost three quarters of SRHR ODA went to STD control, including HIV/AIDS

**Figure 5: Total SRHR ODA broken down by purpose code**  
All donors\*, 2009-2019

Source: OECD CRS. Gross disbursements; 2019 prices. \*Including bilateral ODA from OECD donor countries and ODA from multilateral donors.

- Total ODA for STD control in 2019 was US\$5.0 billion; 63% of total SRHR funding
  - Top donors: US, UK, Germany
- Total ODA for reproductive health in 2019 was US\$1.7 billion; 21% of total SRHR funding
  - Top donors: US, UK, Netherlands
- Total ODA for family planning in 2019 was US\$930 million; 12% of total SRHR funding
  - Top donors: US, UK, Canada

# Donor Government Funding for HIV/AIDS and Family Planning

Donor Tracker Webinar

Adam Wexler

KFF

March 11, 2021

Filling the need for trusted information on national health issues.

## Introduction

- Collecting data on donor government funding for HIV for more than 15 years; annual report completed in collaboration with UNAIDS
- Started collecting data on donor government funding for family planning following the 2012 London Summit; data included in FP2020's annual progress report
- Current reports present 2019 funding data, the most recent year available

# HIV Funding from Donor Governments, 2002-2019

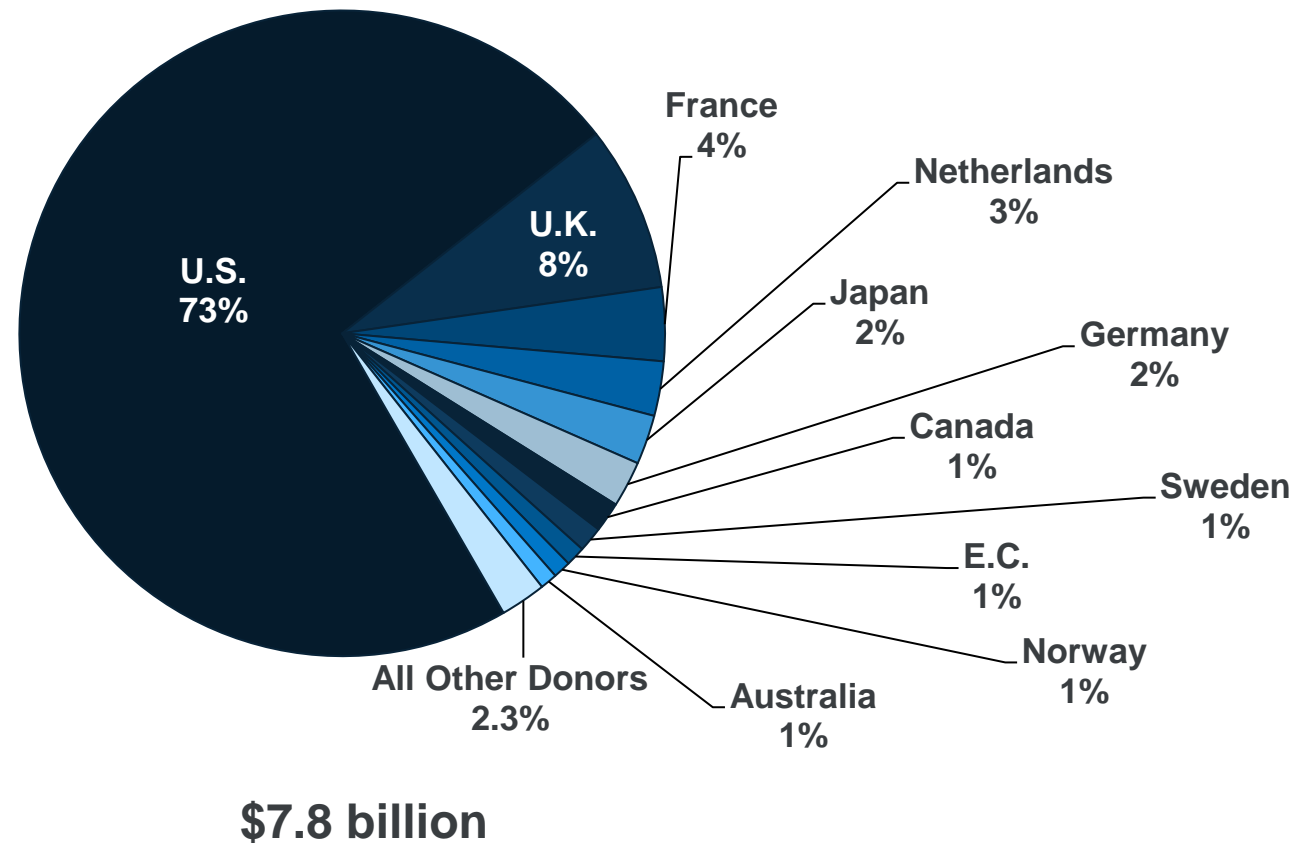

**US\$ Billions**

NOTE: Totals represent bilateral disbursements as well as the HIV-adjusted share of donor contributions to multilateral organizations (UNAIDS, Global Fund, and UNITAID). SOURCE: KFF analyses of data from donor governments and OECD CRS database.

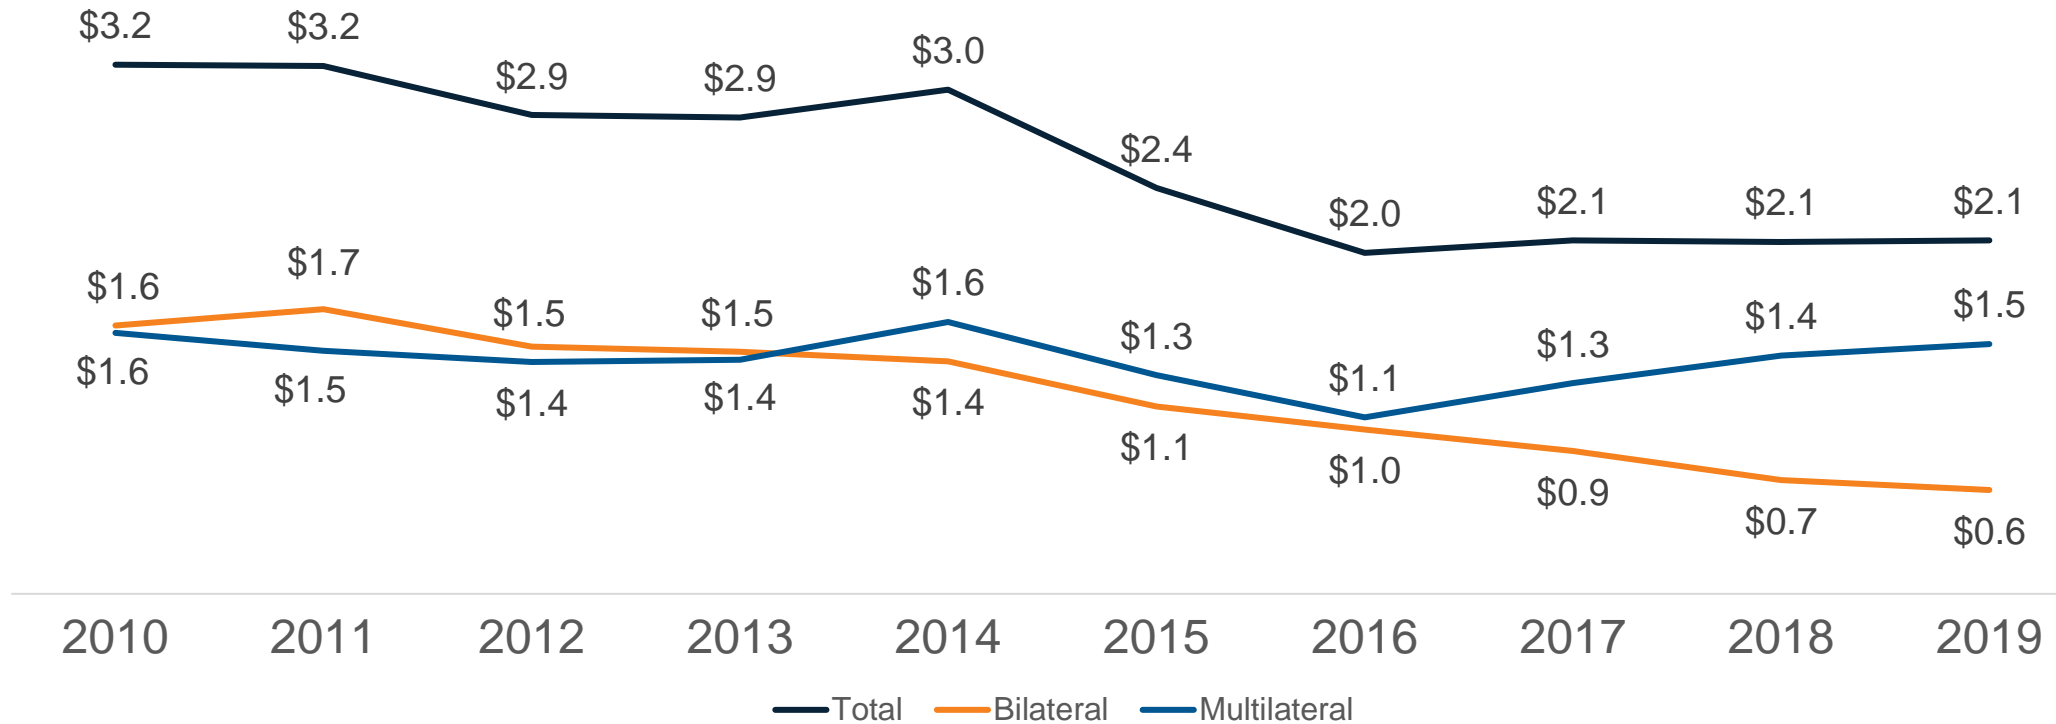

## Donor Governments as a Share of Funding for HIV, 2019

# Trends in Donor Government Funding for Family Planning, 2012-2019

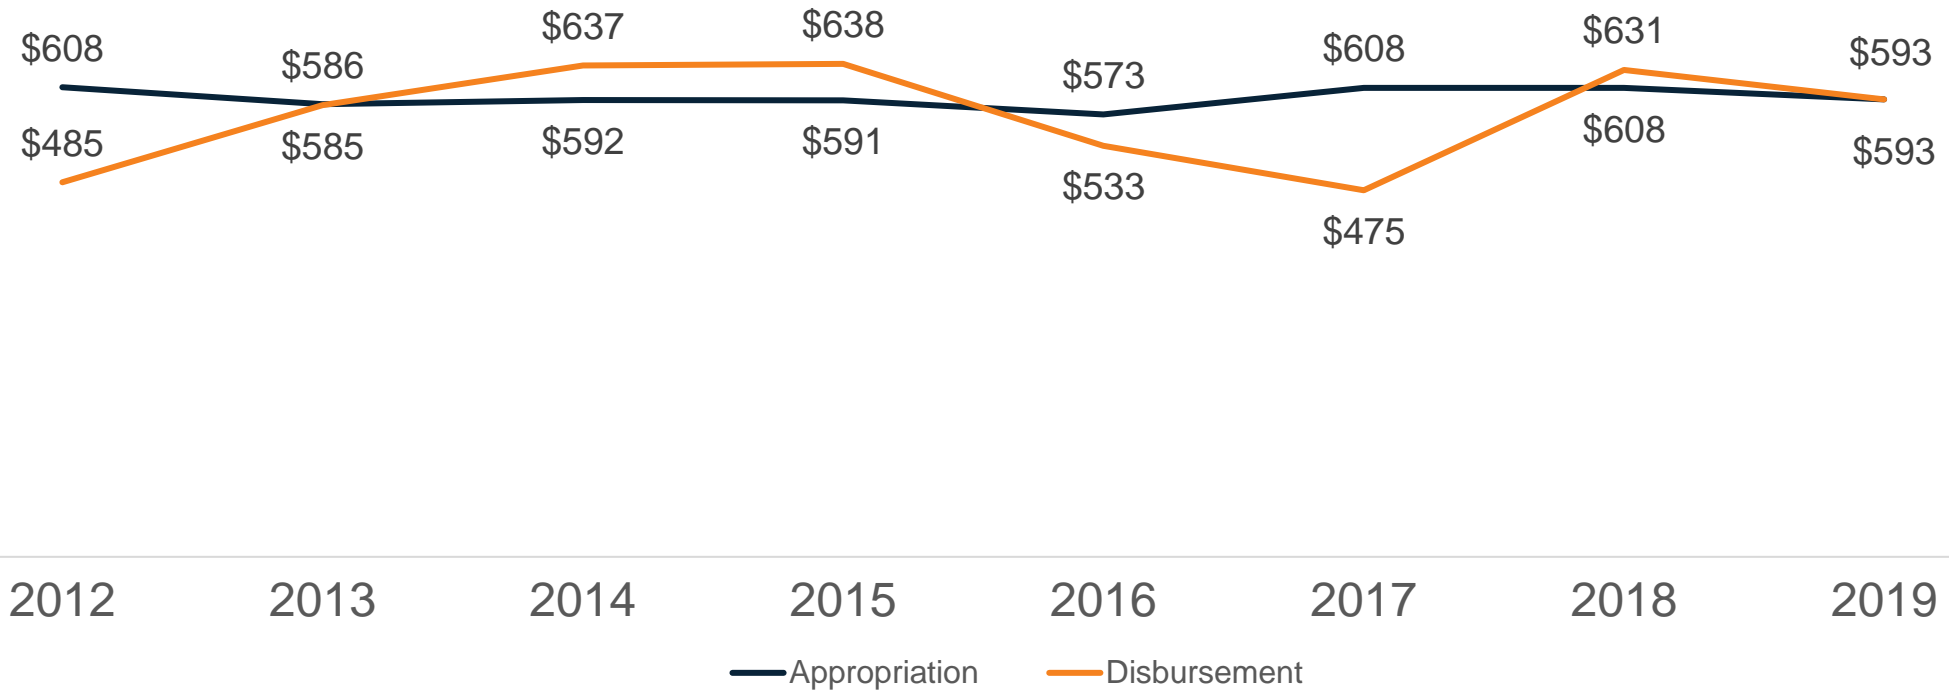

*In Millions*

SOURCE: KFF analyses of data from donor governments and OECD CRS database.

# Snapshot of U.S. Bilateral Funding for Family Planning, 2012-2019

*In Millions*

NOTE: KFF analysis of data from the U.S. Office of Management and Budget, Agency Congressional Budget Justifications, Congressional Appropriations Bills, and U.S. Foreign Assistance Dashboard ([www.foreignassistance.gov](http://www.foreignassistance.gov)). Based on current U.S. dollars in millions. In FY19, a comparable figure for funding disbursed was not available due to adjustments made in USAID's accounting system. Instead, the FY19 total is based on Congressionally appropriated amounts, which include US\$575.0 million in funding for family planning as well as US\$17.5 million transferred to family planning from the Congressional appropriation to UNFPA. It is important to note that U.S. appropriations for a given year may be disbursed over a multi-year period. Appropriations have remained relatively flat for several years while disbursements have fluctuated largely due to the timing of payments.

The background features a large, stylized blue 'K' shape on the left side, set against a light grey background. The right side of the image is white.

Thank you.
