

BUCKET, SNOW AND LIGHT MATERIAL

REQUIREMENTS

FEATURES & BENEFITS

Snow & Light Material Buckets: Have predrilled holes to accept bolt-on cutting edge.

- Large capacity for loading and handling various light materials such as snow and mulch.
- High backs to help with pushing snow.
- Straight sides to penetrate snow and mulch piles.

OUR LIGHT MATERIAL BUCKETS ARE APPROVED ON LOADERS WITH THE MAXIMUM MATERIAL DENSITY OF 800 KG/M³

Description: Because snow is relatively light compared to soil, gravel or other construction materials, the capacity of the snow bucket is much greater than those usually used in construction. The back of the snow bucket is also higher, which lets you push more snow without having it flow over the top. Spill guards are available, they are meant to protect the operator, door, tilt cylinders and the Bob-Tach pivot area from debris that spills over the back of the bucket.
