## **A WARNING**

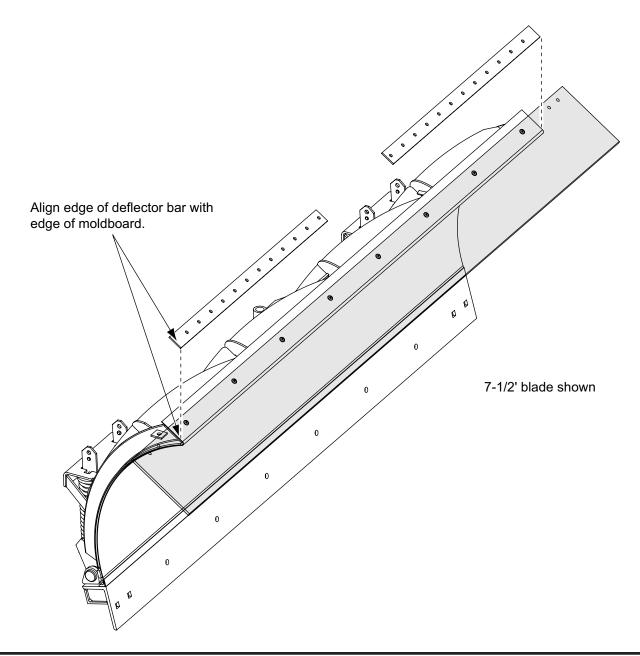

Do not exceed GVWR or GAWR including blade and ballast. The rating label is found on the driver-side vehicle door cornerpost.

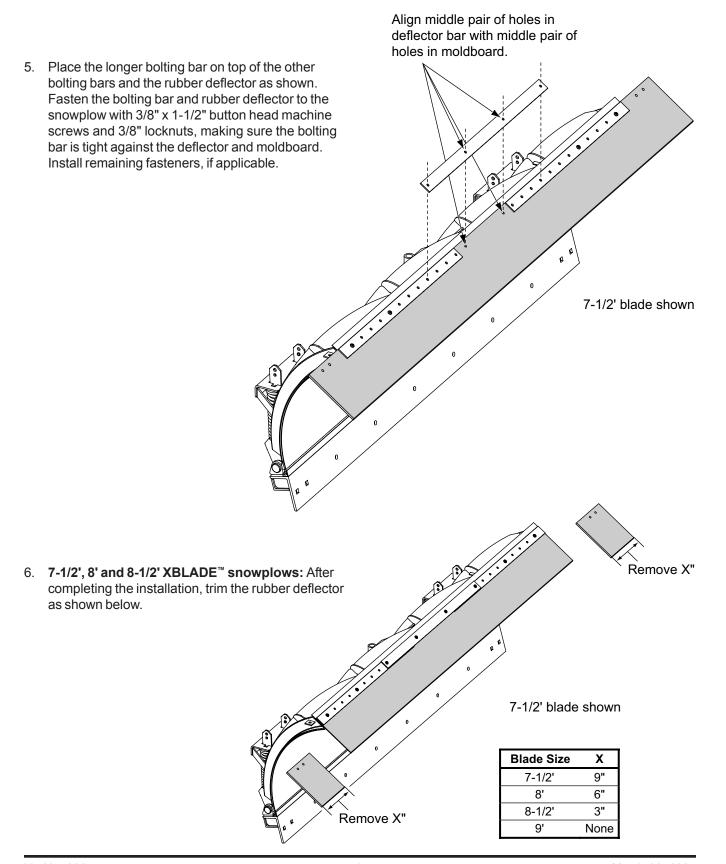

NOTE: See your FISHER® outlet for application recommendations. The Kit Selection Guide has specific vehicle and snowplow requirements.

TORX is a registered (®) trademark of Textron, Inc.

## **INSTALLATION INSTRUCTIONS**

- 1. Starting from the driver side, remove half of the 3/8" x 1" button head machine screws that attach the moldboard to the blade frame.
- 2. Place the rubber deflector on top of the moldboard and align the deflector holes with the corresponding holes in the snowplow. The deflector will extend beyond both blade ends on the shorter blades.
- 3. Place one of the shorter bolting bars on top of the rubber deflector and blade as shown below. Starting on the outside, fasten the bolting bar and rubber deflector to the snowplow with two 3/8" x 1-1/2" button head machine screws and 3/8" locknuts, making sure the bolting bar is tight against the deflector and moldboard.
- 4. Repeat Steps 1–3 on passenger side.
