

ALL-NEW PRO-PLOW® 3

STRAIGHT BLADE PLOW

GET IT STRAIGHT AND STAINLESS.

The all-new PRO-PLOW 3 line of straight blade plows offers the first stainless steel straight blade model from Western Products. With limited moving parts and full hydraulic range of motion—these straight blade plows are workhorses that move snow efficiently season after season.

BLADE SIZES **7'6" | 8'**
BLADE CONSTRUCTION **Mild Steel & Stainless Steel**
TRUCK CLASS **2 & 3**

MORE JOBS. **DONE FASTER.**

PRO-PLOW® 3 STRAIGHT BLADE PLOW

NO NONSENSE PERFORMANCE

PLOW BLADE CONSTRUCTION

The rugged moldboard is 29" tall and comes in 14-gauge powder-coated steel or 14-gauge stainless steel in 7'6" or 8' widths for Class 2 and 3 trucks. The durable blade provides an aggressive 70-degree attack angle for a clean scrape.

STRUCTURAL REINFORCEMENT

Eight vertical ribs paired with the exclusive POWER BAR provides structural reinforcement for exceptional torsional strength and rigidity to eliminate blade twisting. High-strength steel at the base channel offers added support to the bottom of the plow blade.

RELIABLE HYDRAULICS

We manufacture our hydraulic components to ensure the highest standards of quality and reliability for fast and durable performance. The fully-enclosed system is protected from the elements.

TRIP PROTECTION

The full trip blade uses two springs to protect your plow and vehicle when striking hidden obstacles while plowing. Elastomeric bumpers reduce jarring and soften the blade return when tripping occurs. For added dampening, shock absorbers are available as an accessory.

CUTTING EDGE

The 3/8" thick high-carbon steel cutting edge is 6" high, reducing wear and extending the life of the moldboard. Accessory cutting edges are available.

FEATURED ACCESSORIES

- 1/2" Steel Cutting Edge
- Rubber Cutting Edge
- Poly Cutting Edge
- Back Drag Edge
- Curb Guard (Pair)
- Rubber Deflector
- Shock Absorber
- Shoe Kit
- Cup Holder Control Mount
- PRO-GRIP Mount
- Grille Plate – 11-Pin & 14-Pin

HEADLAMP OPTIONS

Choose between LED or dual-halogen NIGHTHAWK™ headlamps. The LED headlamps feature EdgeView™ technology, providing 180 degrees of light from plow edge to edge and producing up to twice the light output of traditional halogen bulbs.

The dual-halogen headlamp option offers improved brightness and reach with better low- and high-beam performance than traditional halogen headlamps.
