

RENDY ANDIKA

Frontend Engineer | React | Next.js | Vue | TypeScript | Remote-Ready

(62) 851-7528-2801 | rendyndika@gmail.com | rdydika.dev | Medan, North Sumatra, Indonesia

PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of proven expertise building scalable, production-grade web applications across fintech, enterprise, and SaaS domains. Specialized in React/Next.js and Vue/Nuxt architectures, payment gateway integration, and secure authentication systems. Demonstrated success translating complex business requirements into performant, maintainable interfaces while collaborating asynchronously with distributed cross-functional teams.

CORE TECHNICAL SKILLS

Frontend Frameworks: React.js | Next.js | Vue.js | Nuxt.js | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | SCSS

Styling & UI: Tailwind CSS | Bootstrap | Vuetify | Framer Motion

Backend & APIs: REST APIs | OAuth 2.0 | Authentication Flows | Payment Gateway Integration | Session Management

Tools: Git | GitHub | npm | Webpack | Build Optimization

Key Competencies: Scalable Component Architecture | Payment Processing | Secure Authentication | Browser Plugin Development | Cross-functional Collaboration | Asynchronous Communication | Performance Optimization

PROFESSIONAL EXPERIENCE

FRONTEND ENGINEER — PT Bank CIMB Niaga Tbk | Jakarta, Indonesia

October 2025 – December 2025

- Built Training Request system serving 1,000+ users: 60% reduction in manual administrative overhead, by architecting modular React components with form validation.
- Engineered reusable UI component library: 40% improvement in team velocity and 85% code reuse, by designing scalable component patterns.
- Reduced feature delivery time by 30% with zero-defect shipping, by fostering clear communication with backend engineers, QA, and product teams.

FRONTEND ENGINEER — PT. Privy Identitas Digital | Jakarta, Indonesia

December 2022 – June 2025 (2.5+ Years)

- API Playground platform (500+ QA testers, 200+ developers): 45% faster validation cycles, 80% reduction in onboarding time.
- OAuth-based SSO platform (10,000+ monthly auth events): 99.9% uptime, <200ms latency, secure token storage and session persistence.
- Document signing web app and CMS: 5,000+ documents monthly with full audit trails and digital signature verification.
- Browser plugins (Google Docs, Microsoft Word, Dropbox): 2,000+ monthly activations with Chrome extension architecture.
- Stripe and Midtrans payment integration: 99.8% transaction success rate, \$2M+ annual GMV processed with PCI-compliant forms.
- Government-scale signing dashboard (1,000+ concurrent users): 50,000+ annual signings, 30,000+ transactions, optimized React rendering.

FRONTEND DEVELOPER (FREELANCE) — PT Vodjo Teknologi Indonesia | Remote

September 2020 – July 2023 (2.8 Years)

- Built 4+ CMS-based web applications for enterprise clients: 99% uptime, sub-2-second page loads, 95% user satisfaction.
- E-commerce platform with dynamic configuration: \$500K+ annual transactions, 10,000+ SKUs, integrated payment systems.
- Logistics tracking system: 98% delivery accuracy, \$1M+ managed shipment value, real-time GPS visualization.
- Internal operations platforms (healthcare/retail): 40% reduction in manual data entry, 25% inventory turnover improvement across 15+ locations.
- Warehouse management system: 1,000+ orders daily, 99% fulfillment accuracy, inventory dashboards and order routing.

EDUCATION

Bachelor's Degree in Information Systems — State Islamic University of North Sumatera

Graduated: April 2022 | Cumlaude Honors (GPA 3.84)

Professional Certification — Menjadi Front-End Web Developer Expert | Dicoding Indonesia (June 2021 – Present)

ADDITIONAL INFORMATION

Languages: Indonesian (Native) | English (Professional Fluency)

Remote Work Readiness: 4+ years distributed teams | Independent project management | Excellent written communication | Multi-timezone collaboration | Self-motivated
