SUMMARY

Frontend Engineer with 5+ years of experience delivering production-grade web applications across education technology, digital identity, banking, e-commerce, logistics, and enterprise operations. Specializes in React.js, Next.js, Vue.js, Nuxt.js, and TypeScript, with experience building administrative platforms, user-facing products, job portals, CSR dashboards, secure authentication journeys, payment integrations, and HTML email communications. Translates complex business and operational requirements into reusable, maintainable frontend experiences for distributed cross-functional teams.

EXPERIENCE

FRONTEND ENGINEER

03/2026 - Present

PT Pintar Pemenang Asia ↗

- Built the core learning platform serving thousands of users — end-to-end course discovery, enrolments, live classes, certifications, and multi-brand deployments across enterprise, skills, and degree verticals.
- Developed a full-featured admin panel powering the entire platform — managed 40+ modules including course/user/billing management, reports, gamification, surveys, learning providers, and whitelabel configuration.
- Built a multi-tenant job portal from scratch — complete job listing, apply flow with resume validation, screening questions, and candidate pipeline management. Deployed for 3+ clients with distinct branding and rules.
- Developed a CSR management dashboard for Amman Mineral — end-to-end grant lifecycle, project execution, budget tracking, multi-level approval workflows, and reporting. Used by both admin and vendor roles.
- Maintained security and stability across 7 frontend applications — patched vulnerabilities, locked dependencies to prevent breaking changes, reduced technical debt across the board.

FRONTEND ENGINEER

10/2025 - 12/2025

PT Bank CIMB Niaga Tbk ↗

- Built Training Request system serving 1,000+ users: 60% reduction in manual administrative overhead, by architecting modular React components with form validation.
- Engineered reusable UI component library: 40% improvement in team velocity and 85% code reuse, by designing scalable component patterns.
- Reduced feature delivery time by 30% with zero-defect shipping, by fostering clear communication with backend engineers, QA, and product teams.

FRONTEND ENGINEER

12/2022 - 06/2025

PT. Privy Identitas Digital ↗

- API Playground platform (500+ QA testers, 200+ developers): 45% faster validation cycles, 80% reduction in onboarding time.
- OAuth-based SSO platform (10,000+ monthly auth events): 99.9% uptime, <200ms latency, secure token storage and session persistence.
- Document signing web app and CMS: 5,000+ documents monthly with full audit trails and digital signature verification.
- Browser plugins (Google Docs, Microsoft Word, Dropbox): 2,000+ monthly activations with Chrome extension architecture.
- Stripe and Midtrans payment integration: 99.8% transaction success rate, \$2M+ annual GMV processed with PCI-compliant forms.
- Government-scale signing dashboard (1,000+ concurrent users): 50,000+ annual signings, 30,000+ transactions, optimized React rendering.

- Built 4+ CMS-based web applications for enterprise clients: 99% uptime, sub-2-second page loads, 95% user satisfaction.
- E-commerce platform with dynamic configuration: \$500K+ annual transactions, 10,000+ SKUs, integrated payment systems.
- Logistics tracking system: 98% delivery accuracy, \$1M+ managed shipment value, real-time GPS visualization.
- Internal operations platforms (healthcare/retail): 40% reduction in manual data entry, 25% inventory turnover improvement across 15+ locations.
- Warehouse management system: 1,000+ orders daily, 99% fulfillment accuracy, inventory dashboards and order routing.

EDUCATION

Information System
State Islamic University of North Sumatera - Bachelor's degree
Bachelor's Degree with Cumlaude predicate (GPA 3.84)

09/2017 - 04/2022

CERTIFICATES

Menjadi Front-End Web Developer Expert ↗
Dicoding Indonesia

06/2021 - Present

SKILLS

Clear technical communication	REST APIs, OAuth, Authentication Flows
Problem solving	Tailwind CSS, Bootstrap, Vuetify
Cross-functional collaboration	HTML5, CSS3, SCSS
Performance Optimization	Next.js, Nuxt.js
Component-Based Architecture	React.js, Vue.js
Payment Gateway Integration	JavaScript (ES6+), TypeScript

LANGUAGES

Indonesia	English
