

The ProAct Advantage tiered formulary references the most commonly prescribed medications available to treat a variety of conditions. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription plan. The list is not all-inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

PLEASE NOTE: Brand-name drugs may move to nonformulary status if a generic version becomes available during the year. Not all drugs listed may be covered by your prescription plan, please review your summary plan description for a list of exclusions. Tier associated with trade name below is subject to change based on medication strength, dosage form, and-or manufacturer.

For the most current listing of covered medications or if you have questions, please visit www.proactrx.com or call the ProAct Help Desk at 1-877-635-9545.
