## ABOUT US

White Space Art Asia was created in conjunction with the Heng Artland Gallery of Singapore to discover and promote new artists. The challenge we set ourselves is to identify and introduce contemporary ink artists that stand the test of time. We maintain a basic philosophy that when an artist has strong fundamental grounding in art, a good story to tell and with the right cultural context, we have the makings of good art. To translate this broad statement into reality, we have created a framework based on our decades of experience to evaluate and identify high potential up-and-coming artists. With so many voices and competing philosophies in contemporary art, we want to be able to speak to something real and human that engages our intellect and most importantly, our hearts. At the same time, we want to assist our clients in growing the value of their collection.

# ART SYNOPSIS

Born in Padang, Indonesia, Indra Dodi earned his bachelor's degree in fine arts at the Indonesian Institute of Arts in Yogyakarta.

Childlike but bold and expressive, Dodi's oeuvre retains a quintessential Indonesian rawness. His art conveys the angst of growing up: a bittersweet phase where one struggles to grapple with the change from a wide-eyed child to a socially cognizant not-yet- adult, a rebellious era where one dreams of establishing a sense of self after taking a bite of the ever-delicious apple of independence. Wisdom is a double- edged sword—comprehension comes at a price, and something is always lost when knowledge is gleaned. Children learning to cope with the world drives the pathos behind his naïve figurative paintings. Adults are acclimatized to perceiv- ing the world as rational, while children see the world through the lens of wonder. Just as a child learns to make sense of the universe around them, Dodi frequently questions the universally accepted laws of order. Why must objects be of a certain colour? Why should we follow ratios and proportions? Thus, in Dodi's art, each stroke is a careful calibration of defiance, a desperate attempt to hold fast to the fleeting of innocence. His works are not just a visual poetry of willfulness, but also a question: if given a chance to begin again, whether one would choose to pay the price of biting the apple.
