Finance Committee Meeting Minutes BRH Boardroom – July 10, 2019

Called to order at 7:00 a.m. by Finance Committee Chair, Dr. Bob Urata.

Finance Committee & Board Members: Dr. Bob Urata (Chair), Mark Johnson, Deb Johnston, Kenny Solomon-Gross

Staff: Kevin Benson, CFO, Billy Gardner, COO, Rose Lawhorne, CNO, Chuck Bill, CEO, Dallas Hargrave, HR Director, Scott Chille, IS Director, Megan Costello, CBJ Law, and Megan Taylor, **Executive Assistant**

Mr. Johnson made a MOTION to approve the minutes from the June 12, 2019 Finance Committee Meeting. Dr. Urata noted no objections and they were approved.

May 2019 Finance Review – Kevin Benson, CFO

Mr. Benson explained that Bartlett Regional Hospital didn't perform as well as was expected, financially. In-patient revenues were down, but outpatient revenues were up. This doesn't offset, however, because outpatients create less revenue per individual. BOPS revenue was also up for the month of May. Salaries and wages were \$439,700 over budget, but this is due to an overlap of filling permanent positions while temporary employees finish their contracted terms. Once complete, most of the contracted positions will not be re-recruited.

IT Project Updates – Scott Chille

Mr. Chille presented to the Finance Committee about the current and upcoming projects related to the \$2.5 million capital that has been approved for upgrades. The primary upgrade is the conversion of the current three "silo" system, with a six towers, a large footprint, outdated hardware, and three independently functioning units, to the VxBlock system with three cabinets, increased versatility of storage and utilization capabilities, a smaller footprint, and less demand for power and cooling. Five years of maintenance costs are included in the initial cost. The current setup, once "sanitized" will be sold to slightly offset some of the cost, with an expected return of about \$300,000.

Meditech is being upgraded to "Expanse", which is expected to go live March 2020. Replacement of network core switches should happen in September, resulting in a major downtime of 8-10 hours.

Certified Public Expenditures – Kevin Benson

Mr. Benson explained that following conversations with Donna Stewart at the State of Alaska, it appears that a 5% cut, as proposed, would affect BRH in the amount of about \$1.5 million. Behavioral health programs are exempt from the cut, as well as Critical Access Hospitals. It was noted that this effect would be drastic due to BRH's substantial Medicaid population. Ms. Stewart looked at the data, and agreed. She and her team came back with the idea of Certified Public Expenditures, which has been in use at other states. This follows a model used in the state of Washington. It uses the Medicare Cost Report, through federal reimbursements, so it doesn't cost the state anything to advocate for this. The drawback is that the reimbursements may not be received by BRH until December 2020. The additional reimbursement would likely be about \$2.1 million, but is dependent on Rural Demonstration Project base

year values, so will change, but this number should be nearly accurate. 2021 is the next base year, as the RDP lasts five years.

It is likely that because Bartlett Regional Hospital is a critical source of behavioral health services for Southeast Alaska, state entities are more willing to offer assistance so that as a company BRH isn't forced to look at areas that aren't producing as much revenue, as expendable.

Anesthesia Capital Request - Kevin Benson

Due to director turnover, the need for new machines wasn't known until servicing was requested. Four new anesthesia machines are needed, at a cost of \$70,000 each. Request will be covered by some of the \$2 million of unused capital from FY 2019's budget.

Mr. Johnson made a MOTION to approve the request for \$281,000, and move the request to the board. Ms. Johnston seconded, and noting no objections, the motion passed.

Next Meeting: August 14th, 2019 at 7:00 a.m. in BRH Boardroom

Adjourned - 8:00 a.m.

DATE: August 8, 2019

TO: BRH Finance Committee

FROM: Kevin Benson, Chief Financial Officer

RE: June Financial Performance

June marked the end of the Fiscal Year for BRH. 2019 was a challenging year both operationally and financially. The year concluded with a number of unusual adjustments both positive and negative but overall finished on a strong note achieving a Net Income of \$1.5 million.

Operationally June was a very busy month. Statistics show Inpatient Days to be 12% greater than budget reversing the trend of not meeting budget volumes for the past 5 months. Outpatient volumes were strong in almost all areas but particularly in observation and surgery. This resulted in Hospital Revenues that were \$800,000 greater than budget. Physician revenues was also very strong exceeding budget by \$319,000.

Deductions were greater than budget as a result of increased revenues and a significant shift of governmental payors to 69% up from the budget target of 65%. As a result, 75% of the \$1 million of additional revenue ended up going to deductions. After discounts Net Patient Revenue finished at only \$240,000 or 2.9% in excess of budget. Expenses exceeded budget by \$2,962,000 or 35.8%. However, \$2.2 million was recording of PERS expense to reflect the On-Behalf funding by the state of Alaska. The expense is offset by recording the funding in Other-Operating Revenue. This resulted in an Operating Loss of \$234,000 well below the budget target Operating Income of \$83,000. Interest Income was understated throughout the year. Final results showed a significant adjustment of \$1.5 million due to increased earnings. Therefore, after Non-Operating Revenue final Net Income was \$1,515,000.

On a year to date basis BRH has a Net Income of \$2,881,000 and finished 13% behind the budget target of \$3,310,000. The year to date Income from Operations is -3.42%, while the final Net Income is 2.84%.

Significant Items:

- Physician Revenue shows growth in the current year running 21.9% over the prior year.
- BRH received the attached letter indicating the state of Alaska made an Employer On-Behalf Funding to PERS for BRH in the amount of \$2,176,179.
- BRH saw 325 births in 2019 which was 10 more than the prior year. This may not seem significant but it reversed reductions that had been seen in the past two years.

RE: FY2019 Employer On-Behalf Funding - PERS ER 219

During the 2018 legislative session, House Bill HB286 (HB286) passed providing on-behalf funding for PERS employer contributions for Fiscal Year 2019 (FY2018). HB286, Section 25 reads as follows:

(b) The sum of \$135,219,000 is appropriated from the general fund to the Department of Administration for deposit in the defined benefit plan account in the public employees' retirement system as an additional state Contribution under AS 39.35.280 for the fiscal year ending June 30, 2019.

HB286 at http://www.akleg.gov/PDF/30/Bills/HB0286Z.PDF (Section 2 and 25).

The Alaska Retirement Management Board approved the actuarially determined rate of 27.58% for FY2019, with HB286 providing an on-behalf rate of 5.58% for each FY2019 employer payroll. On-behalf funding is applied with the processing of each employer payroll with payroll end dates between July 1, 2018 and June 30, 2019 and fully received by the Division by July 15, 2019. A fully received and processable payroll must include payment, an employer summary, and any other required documentation (WIRE and ACH payments must have a corresponding Memo). All such payrolls have been processed, thus we have trued-up your account and made an adjusting entry.

Included is a report detailing the Employer On-Behalf Funding allocated for fiscal year 2019 payrolls. **This is your <u>final</u> adjusted statement for FY2019.** Please work with your accountant or auditor to determine where to show this funding on your financial statements. Feel free to contact me via telephone at (907)465-2279 or email at <u>tamara.criddle@alaska.gov</u> if you have any questions or need additional information regarding HB286.

Sincerely,

Tamara Criddle, Accountant

Tamara Criddo

Patient Safety/Compliance/IT Security 1 End of Life/Revenue Enhancer/Cost saver 2 Future End of Life/Nice to have

Cap#	DEPT # DEPARTMENT	DESCRIPTION	CAPITAL S	ubstitution June 2019	Budget Balance Pi	iority FY	Notes
19-035	6210 OR	Washer Sterilizer	107,000		107,000	3	We have one washer sterilizer and several times throughout the year it has been nonfunctional interfering with operational needs in the surgery dept. and standard of care. In addition we are busier with more total joint replacements and have added another surgeon. Having a second washer sterilizer would make our department more efficient in getting sterilized trays out.
19-008	6230 Emergency Room	Phillips Portable Monitors (2)	42,000	40,247	1,754	1	The ED currently has 5 hardwired cardiac monitors and two portable cardiac monitors, adding two more portable cardiac monitors will allow 9 of the 12 ED rooms to be able to become a monitored bed. During busy summers the ED frequently has to move less sick monitored patients into a hall bed to make room for a critical patient. Having two extra monitors would allow the patients to continue to be monitored even though they 2019 are in a hall bed. * quote was sent for one, I am requesting two.
19-009	6230 Emergency Room	Sonosite Ultrasound Probe	11,500	11,285	215	1	This ultrasound probe allows providers to do bedside screening on patients that have a large habitus. Having this probe in the ED would allow for early recognition of potentially life threating conditions that the 2019 current probes have less of sensitivity for.
							With CMS requiring ETCO2 monitoring for more patients this capital request would allow the majority of the ED's hardwired monitored beds to have ETCO2 monitoring. I am also asking for two ETCO2 modules for our two portable monitors, this would allow ETCO2 monitors to be used in non-hardwired rooms. * Please keep in mind that the attached quote includes ETCO2's for CCU.)

FROM: Kevin Benson, CFO and Billy Gardner, COO

RE: Capital Projects

There are a number of facility projects that BRH must address (see attached Listing). Most of these projects were included in the Capital Budget. However even if they were included, the estimated cost was significantly underestimated and amounts to \$783,663. Due to the cost variance in order to proceed with these projects approval of the Board of Directors is needed. In order to fund this variance, projects that were included in the budget will either be delayed or will not be completed.

Preliminary Design/Cost Estimates have been obtained for these projects better defining the scope of the projects and associated cost. Listed below is a description of each project.

ASU-11 Supply Fan Upgrade:

BRH surgery wing includes three operating suites along with surgery support spaces located on the 2nd floor of the hospital. The surgical area of the hospital was last renovated in 1988, and records show that the supply fan for ASU-11 about 8-9 years ago when there was an unexpected failure. Data is not available on this replacement fan but it appears to be a like for like replacement of the original. Murray and Associates did perform an evaluation on the HVAC system serving these spaces in 2015. An outcome of this evaluation was the 2016 BRH OR Surgery Ventilation System Upgrade which address the cooling, dehumidification and humidification needs of the space. This work did not include any modifications to the supply or return fan for the air handler unit and made minimal modifications to the internal parts of the air handler unit. Air filtration occurs with the ASU-11 downstream of the supply fan section.

As noted above, the issues related to temperature and humidity to the operating spaces were addressed in the 2016 upgrades. However, with the original supply fan and return fan in the ASU-11 unit, there are issues regarding upgrades to air ventilation rate requirements for the operating room. In addition, if ASU-11 fails, all surgery suites will have to be shut down until repairs or replacements are made. Replacement of the supply fan to ASU-11 with a more powerful unit is critical to maintaining the minimum flow rates to the surgical operating rooms. Replacing SF-11 with a pair of plenum style fans would allow for a higher air flow rate and would, in turn, offer a redundancy that is currently not present.

We estimate a five-month lead time to get the equipment built and shipped to Juneau. February has the lowest volumes for surgeries and would have the least amount of impact on operations for installation. We estimate the OR will be down for about five days (we would schedule the down time to

occur over President's Day weekend for minimal OR time loss) and strongly encourage Surgeons and staff to plan vacation time for this week.

Endoscopy Workroom Ventilation Upgrades

The endoscopy work rooms in BRH share ventilation air from ASU-11 and EF-11 with Surgery Operating Suites 1-3. These Areas have strict ventilation requirements that exceed the current capacity of the air handling system. The three OR suites requirements are currently starving the Endoscopy Suite of necessary ventilation to meet regulation. This project, along with other ASU-11 upgrades, will be necessary to ensure compliance. This project will run concurrent with the ASU-11 Supply Fan Upgrade to minimize operational flow impacts on the schedule.

Central Sterilization Room Upgrades

This project allows for the addition of an Ultrasonic Ophthalmology Instrument cleaner, a new triple sink, a new sterilizer, a new pass through window to the CSR, and new sterilizer pumps. Modification of the existing Central Sterilization room is complex and will require several phases of construction. The project will take 4 weeks to complete but should not result in any OR downtime.

Lab Ventilation and Cooling Upgrades

The laboratory is located on the second floor of the Main Hospital and directly over the facility boiler room. This project will increase ventilation and cooling in the lab and reduce the overall temperature of the space. Several primary factors contribute to the elevated lab temperatures: excessive heat transfer through the floor and reduced cooling air from AHU-15. The average floor temperature throughout the lab is 83 degrees F, with some places reaching 91 degrees F. In addition to the added heat load from the floor, the cooling system is not capable of operating at full capacity during the winter. The only cooling to the lab comes from tempered outside air through AHU-15, but during winter months the air flow is reduced as much as 70% to prevent the heating coil from freezing. This reduction in cooling air amplifies the excessive heat load in the space and results in air temperatures regularly exceeding 80 degrees F.

Overheating in the lab has been a well-documented problem for over 10 years and is much more than just an employee comfort issue. Sensitive laboratory supplies have strict storage temperature requirements and several of the supplies used in this area must be stored in other spaces to meet those requirements. Recently, we have had to dispose of supply kits which were exposed to out of range temperatures in the lab. Additionally, some lab equipment and processes require ambient air temperatures lower than the building mechanical system is capable of achieving. This has forced staff to implement work-around solutions and carefully monitor temperatures to achieve required results.

The proposed design seeks to address both causes of excessive heat in the lab. The first step is to eliminate or significantly reduce the heat load from the floor, the second step is to ensure that full design air flow can be supplied to the space throughout the year. These two areas of improvement should allow the existing ventilation/cooling system to function as originally designed and maintain the space throughout the year at the desired temperature set point.

Chiller No. 2 Replacement

The existing water chiller #2 located on the roof of BRH has reached the end of its useful life. It also broke down this July and required repairs. Continuing to rely on the unit will lead to increasing maintenances costs and reduced reliability. This project will replace the chiller, adjacent isolation

valves, and related sensors and accessories to ensure facility chilled water operation and to reduce maintenance requirements. The replacement will be sized to match existing performance, size and electrical load as closely as possible to limit additional work.

ASU-1 Heating Coil Upgrade to Glycol

Project scope is to upgrade the heating loop at the main heating coil for ASU-1 to an antifreeze loop to prevent coil damage from freezing conditions. Ideally the work will be performed during warmer weather where the need for the heating coil is minimized and heating needed can be picked up by the Heat Recovery coil and the ASU-1 hot deck heating coil. This heating coil supplies heat to one third of the main hospital building and to multiple floors. It is imperative that we minimize the risk of coil failure due to freezing.

Other Future Projects in Cue:

Stairwell doors: Current design poses a safety risk as doors freely swing into the stairwell. There is no warning to a person who is on a landing between floors and they could very easily be struck by a door being swung open. We are finding design solutions (new doors with windows, slower hinges, new door frames etc.) and will have pricing soon.

After hours Main Hospital Lockdown: We are planning on installing badge readers on all entrances into the main hospital after hours. We have had incidences where disgruntled members of the public have malingered on the second and third floor of the main hospital after being discharged from the ED. This has resulted in arson on the second floor and misuse of facilities on the third. The lock down project is estimated at \$206,000. We suspect the actual costs of this project, however, may come back much higher than the above estimate.

ER Waiting Area/PAS Desk: The first task I was given in my new role as COO by Chuck was to escalate the priority of this project. While the overall design and layout of our ED will need long term strategies, we must still look at short term improvements of the patient waiting area to ensure employee safety, patient safety, and operational workflow. The first meeting I attended to discuss this project was on June 25th with our safety officer, security officer, the PAS Director, Facilities Director and the ED Director. Recent events involving employee safety at the PAS desk were discussed to determine the scope of the project and the measures which needed to happen immediately to ensure the safety of our employees. Marc Walker and I then met with Wilson Engineering on August 1st to begin getting construction designs and costs together so that safety concerns are adequately addressed for the employees while still maintaining a presence in the ED waiting area for patient safety and registration.
