

## **Cascade Health Alliance, LLC**

Welcome from Cascade Health Alliance (CHA's) Case Management Department!

The Case Management Department is part of CHA's care team. Our team has nurses who are experts in care management. They are here to help you get health care services you may qualify for. They will make sure your health care needs are met.

We offer general care management. We specialize in Intensive Care Management (ICM) to help people who may have special or complex health care needs. Members who require ICM services could be disabled, people over the age of 65, or be members eligible for both Medicare and Medicaid services.

CHA's intensive care case management team can help you with the health care system. We can help you get the services and equipment you need. If you think you need help managing your care, please contact us at 541-883-2947 and ask to be transferred to the Case Manager Department. If you are hearing impaired or in need of language line services, please call 1-800-774-4344.

Thank You,

Case Management Department
