

# CASCADE HEALTH ALLIANCE DRUG FORMULARY

Administered by MedImpact

## INTRODUCTION

### *Foreword*

This document represents the efforts of the Cascade Health Alliance Pharmacy and Therapeutics (P & T) Committee to provide physicians and pharmacists with a method to begin to evaluate the various drug products available. The medical treatment of patients is frequently relative to the practical application of drug therapy. Due to the vast availability of medication therapy and treatment modalities, a reasonable program of drug product selection and drug usage must be developed. The goal of the Cascade Health Alliance Drug Formulary is to enhance the physician and pharmacist's abilities to provide optimal cost effective drug therapy for patients.

The development, maintenance, and improvement of this process are evolutionary and require constant attention. This is accomplished by the Cascade Health Alliance P & T and Formulary Committees. The Formulary is a continually reviewed and revised list of drug products, which mirror the prevailing clinical opinion of the P & T and Formulary Committees. Unfortunately, this dynamic process does not allow this document to be completely accurate at all times. To accommodate the necessary changes of this document, newsletters and updates are sent regularly. As you use this Formulary, you are encouraged to review the information and

provide your input and comments to the Cascade Health Alliance P & T and Formulary Committees.

The Cascade Health Alliance P & T and Formulary Committees use the following criteria in the evaluation of product selection for the Cascade Health Alliance Drug Formulary:

- Product safety profile
- Product efficacy
- Product effectiveness
- Comparison of relevant product benefits to current formulary agents of similar use, while minimizing duplications
- Equitable cost and outcomes of the total cost of product and medical care

***How to Use the Drug Formulary***

The Drug Formulary is a list of covered and preferred drug agents for Cascade Health Alliance members. All products are listed by their generic names and most common proprietary (branded) name. The Drug Formulary may be accessed by using the index, either by generic or proprietary name (in small capital letters) and by therapeutic drug category. The brand names listed are for reference use only, and do not denote coverage, unless specifically noted. Any product not found in this Formulary listing, or any Formulary updates published by Cascade Health Alliance shall be considered a Non-Formulary drug.

- \$ Least expensive
- \$\$ More expensive
- \$\$\$ Significantly more expensive
- \$\$\$\$ Most Expensive

The prices used to calculate the relative dollar scale are based on the monthly cost of therapy or cost of treatment course to allow for dosing interval differences between various products. The number of dollar signs is a relative indication of cost and does not represent the true cost of the drug. For example, two dollar signs do not mean that a product is twice as expensive as a product with one dollar sign. They are intended only to provide general information regarding cost. Economics should not be the only factor involved with any therapeutic and clinical decision process. Price comparisons are reflective of pricing and contracts available through MedImpact. While this document can provide you with good information which can be used for non-health plan patients, it may not accurately reflect the drug cost for non-health plan patients.

For certain agents within the Drug Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols:

AGE	Age Edit
G	Generic
B	Brand
PA	Prior Authorization
QL	Quantity Limit
ST	Step Therapy
SP	Specialty Pharmacy Medication

Please refer to the prescribing guideline appendix within this document for details regarding specific agents.

### ***Benefit Coverage and Limitations***

The Formulary does not provide information regarding the specific coverage and limitations an individual member may have. Many members have specific benefit inclusions, exclusions, copays, or a lack of coverage, which are not reflected in the Drug Formulary.

The Drug Formulary applies only to outpatient drugs provided to members, and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should contact their Plan Sponsor or MedImpact at (800) 788-2949.

Depending upon a member's specific benefit parameters, the following topics may apply:

#### ***1. Generic Substitution***

When available, FDA approved generic drugs are to be used in all situations, regardless of the brand name indicated. Greater economy is realized through the use of generic equivalents. This policy is not meant to preclude or supplant any state statutes that may exist. All drugs that are or become available generically are subject to review by CCC's Pharmacy and Therapeutics Committee. MedImpact approves such multi-source drugs for addition to the MAC list based on the following criteria:

- A multi-source product manufactured by at least one (1) nationally marketed company.
- There must be a significant price spread between the brand and the generic product.
- At least one (1) of the generic manufacturer's products must have an "A" rating.
- Product will be approved for generic substitution by the CCC's P & T Committee.
- Certain drug products with complex pharmacokinetics, dosage forms, narrow therapeutic efficacy or where blood level maintenance is crucial will not be subject to substitution. These products are:
  - Neoral Oral Solution
  - Premarin

This list is reviewed and updated periodically based on the clinical literature and available pharmacokinetic principles of the drug products.

If a member or physician requests a brand name product in lieu of an approved generic, the member, based upon their coverage, will typically be required to pay the difference in cost between the brand and the generic. If a physician determines that there is a documented medical need for the brand equivalent, a request for coverage may be made using the medication request process.

## ***2. Preferred Branded Interchange***

Certain cross-licensed or multi-source branded drug products may be excluded from coverage. For example, the Proventil HFA™ brand of albuterol sulfate

may not be covered while the Ventolin HFA™ brand is. If a member requests the non-covered brand, the member must pay the full price.

### **3. Medication Request Process**

#### **A. Formulary Agents**

Drug products that are listed in the Formulary as Prior Authorization (PA) require evaluation, per Cascade Health Alliance P & T Committee guidelines, when the member presents a prescription to a network pharmacy. Each request will be reviewed on individual patient need. If the request does not meet the guidelines established by the P & T Committee, the request will not be approved and alternative therapy may be recommended.

#### **B. Non-Formulary Agents**

Any product not found in the Formulary listing (including OTC over-the-counter medications), or on any Formulary updates published by Cascade Health Alliance, shall be considered a non-formulary drug. Coverage of non-formulary agents may be applied for in advance. This can be done by the prescribing provider submitting a duly completed Medication Prior Authorization Request Form (together with supporting documentation). The form can be accessed through the “Policies, Procedures, and Forms” section under both the Provider and Member Portals. Once received, CHA’s clinical team will review the request and, if deemed necessary, contact the physician to discuss the medical need for a non-formulary drug. Approval will be granted when a documented medical need exists.

The following basic guidelines are used:

- The use of Formulary Drug Products is contraindicated in the patient.
- The patient has failed an appropriate trial of Formulary or related agents.
- The choices available in the Drug Formulary are not suited for the present patient care need, and the drug selected is required for patient safety.
- The use of a Formulary drug may provoke an underlying condition, which would be detrimental to patient care.
- If the request does not meet the guidelines established by the P & T Committee, the request will not be approved and alternative therapy may be recommended.

C. Obtaining Coverage

Coverage may be obtained by:

1. Faxing a completed Medication Request Form to CHA at 541-883-6104
2. Contacting CHA at 541-883-2947 and providing all necessary information requested.

Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis of medical necessity.

### ***General Exclusions***

- A. Over the Counter (OTC) medications or their equivalents are not covered, unless otherwise specified in the Formulary listing.
- B. Some Nicotine Smoking Cessation products (i.e. nicotine inhaler) require a Prior Authorization.
- C. Drug Products not listed in the Drug Formulary, or specifically listed as not covered are not covered.
- D. Any drug products used for cosmetic purposes are not covered.
- E. Experimental drug products, or any drug product used in an experimental manner, are not covered.
- F. Replacement of lost or stolen medication is not covered.
- G. Non self-administered injectable drug products, unless otherwise noted, are not covered.
- H. Foreign drugs or drugs not approved by the United States Food & Drug Administration are not covered.
- I. Mental Health medications are not included in CHA's formulary. These medications are covered directly by OHP.

The P & T Committee recognizes that not all medical needs can be met with this document and encourages inquiries about alternative therapies.

### ***Pharmacist and Physician Communication***

The Drug Formulary is a tool to promote cost-effective prescription drug use. The P & T and Formulary Committees have made every attempt to create a document that meets all therapeutic needs; however, the art of medicine makes this a formidable task. CHA welcomes the participation of

physicians, pharmacists, and ancillary medical providers, in this dynamic process. Physicians and pharmacists are highly encouraged to direct any suggestions, comments or formulary additions to CHA at the following address:

Cascade Health Alliance Pharmacy Services  
2909 Daggett Ave Suite 200  
Klamath Falls, OR 97601  
541-883-2947  
Medication Drug Request Form (MRF)

Can be found at:

<https://cascadehealthalliance.com/>

Select Provider: Policies, Procedures, and Forms

Please send completed forms to:

Cascade Health Alliance

Attn: Prior Authorization Department

2909 Daggett Ave. Suite 200

Klamath Falls OR 97601

Phone: 541-883-2947

Fax: 541-883-6104

Instructions:

This form is to be used by participating physicians and providers to obtain coverage for a non-formulary drug for which there is no suitable alternative available. Please complete this form and fax to CCC at 541-883-6104 or please call 541-883-2947 with this information. If you have any questions regarding this process, please contact CCC Pharmacy Service at 541-883-2947.

Review Criteria:

The following guidelines are used in reviewing medication requests:

1. The use of Formulary Drug Products is contraindicated in the patient.
2. The patient has failed an appropriate trial of Formulary or related agents.
3. The choices available in the Drug Formulary are not suited for the present patient care need and the drug selected is required for patient safety.
4. The use of a Formulary Drug Product may provoke an underlying medical condition, which would be
5. Detrimental to patient care.

## The refined ABCD assessment tool

<https://goldcopd.org/wp-content/uploads/2020/11/GOLD-REPORT-2021-v1.1->

# GOLD COPD 2021 STRATEGY

## INITIAL PHARMACOLOGICAL TREATMENT

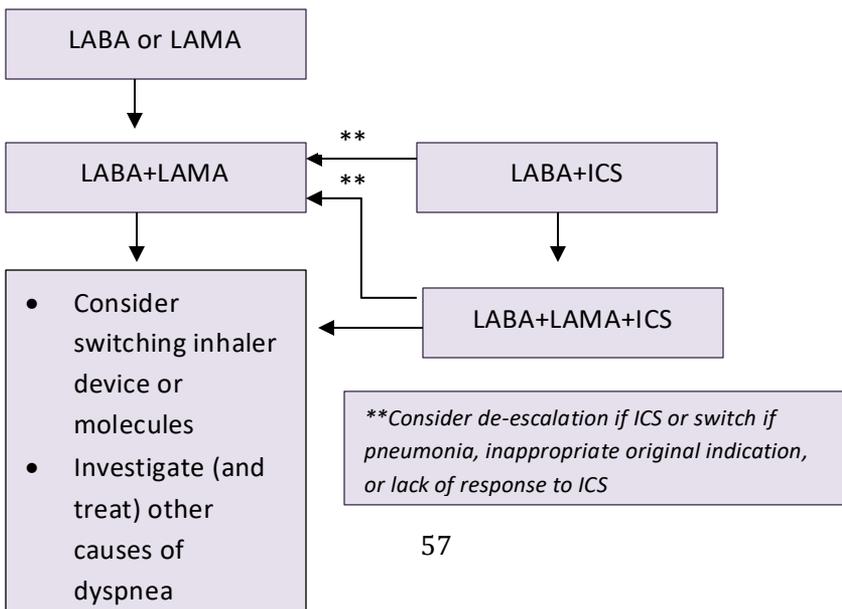

<https://goldcopd.org/wp-content/uploads/2020/11/GOLD-REPORT-2021-v1.1->

## FOLLOW-UP PHARMACOLOGICAL TREATMENT

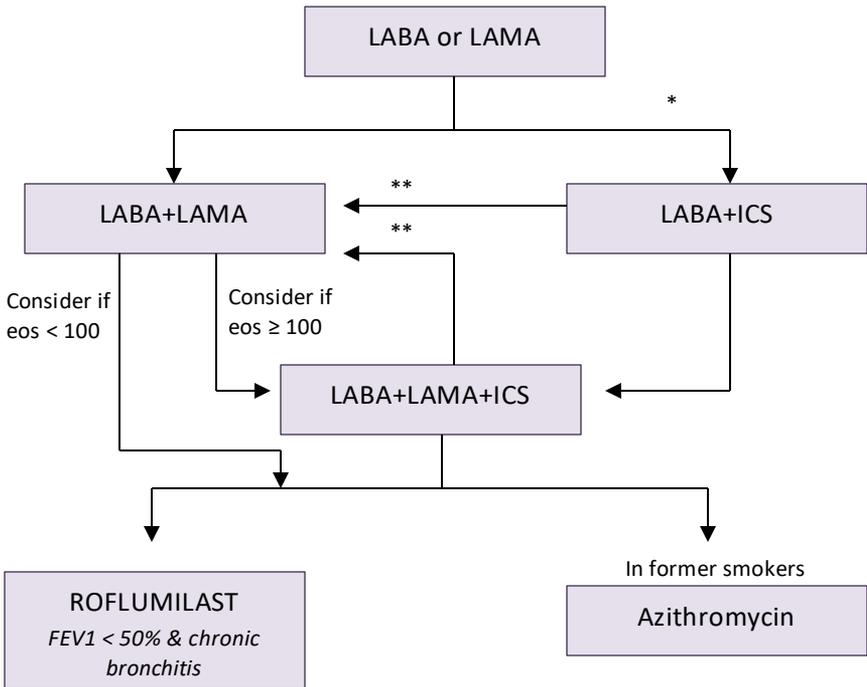

1. IF RESPONSE TO INITIAL TREATMENT IS APPROPRIATE, MAINTAIN IT.
2. IF NOT:
  - ✓ Consider the predominant treatable trait to target (dyspnea or exacerbations)  
-Use exacerbations pathways if both exacerbations and dyspnea need to be targeted
  - ✓ Place patient in box corresponding to current treatment & follow indications
  - ✓ Assess response, adjust and review
  - ✓ These recommendations do not depend on the ABCD assessment at diagnosis

## DYSPNEA

# FOLLOW-UP PHARMACOLOGICAL TREATMENT

## EXACERBATIONS

*eos = blood eosinophil count (cells/μL)*

*\*Consider if eos ≥ 300 or eos ≥ 100 and ≥ 2 moderate exacerbations/1 hospitalization*

*\*\*Consider de-escalation if ICS or switch if pneumonia, inappropriate original indication, or lack of response to ICS*

<https://goldcopd.org/wp-content/uploads/2020/11/GOLD-REPORT-2021-v1.1->

LEGEND	
SABA	short acting bronchodilator
LABA	long acting bronchodilator
LAMA	long acting muscarinic antagonist
ICS	Inhaled corticosteroid
*	PA required

CHA FORMULARY MEDICATIONS	
SABA	Albuterol HFA, Levalbuterol HFA
LABA	Striverdi*
LAMA	Spiriva*, Incruse Ellipta*, Atrovent HFA*
ICS	QVAR Redihaler, Pulmicort Flexhaler, Flovent HFA*
LABA+LAMA COMBO	Bevespi Aerosphere, Stiolto Respimat*
LABA+ICS COMBO	Airduo, Symbicort*, Dulera*, Advair Diskus*

### ***Initial pharmacological management***

Rescue short-acting bronchodilators should be prescribed to all patients for immediate symptom relief.

#### **GROUP A**

- All Group A patients should be offered bronchodilator treatment based on its effect on breathlessness. This can be either a short- or a long-acting bronchodilator.
- This should be continued if benefit is documented.

#### **Group B**

- Initial therapy should consist of a long acting bronchodilator. Long-acting bronchodilators are superior to short-acting bronchodilators taken as needed i.e. *pro re nata* (prn) and are therefore recommended.
- There is no evidence to recommend one class of long-acting bronchodilators over another for initial relief of symptoms in this group of patients. In the individual patient, the choice should depend on the patient's perception of symptom relief.
- For patients with severe breathlessness initial therapy with two bronchodilators may be considered
- Group B patients are likely to have comorbidities that may add to their symptomology and impact the prognosis, and these possibilities should be investigated.

#### **Group C**

- Initial therapy should consist of a single long acting bronchodilator. In two head-to-head comparisons, the tested LAMA was superior to the LABA regarding exacerbation prevention therefore it is recommended starting with a LAMA in this group.

### **Group D**

- In general, therapy can be started with a LAMA as it has effects on both breathlessness and exacerbations.
- For patients with more severe symptoms (order of magnitude of CAT $\geq$ 20), especially driven by greater dyspnea and/or exercise limitation, LAMA/LABA may be chosen as initial treatment based on studies with patient reported outcomes as the primary endpoint where LABA/LAMA combinations showed superior results compared to the single substances. An advantage of LABA/LAMA over LAMA for exacerbation prevention has not been consistently demonstrated, so the decision to use LABA/LAMA as initial treatment should be guided by the level of symptoms.
- In some patients, initial therapy with LABA/ICS may be the first choice; this treatment has the greatest likelihood of reducing exacerbations in patients with blood eosinophil counts $\geq$ 300/cells/ $\mu$ L. LABA/ICS may also be first choice in COPD patients with a history of asthma.
- ICS may cause side effects such as pneumonia, so should be used as initial therapy only after the possible clinical benefits versus risks have been considered.

# CHA 2021 DIABETIC TREATMENT PLAN

\*Adapted from the ADA

FIRST-LINE therapy is metformin and comprehensive lifestyle change (including weight management and physical activity)  
If HbA1C above target proceed as below

WITHOUT ESTABLISHED ASCVD OR CKD

COMPELLING NEED TO  
MINIMIZE HYPOGLYCEMIA

TZD

**if HbA1C above target**

DPP-4

**if HbA1C above target**

Continue with addition  
of either:

SGLT2 or GLP-1 RA

**if HbA1C above target**

Consider addition of  
later generation SU with  
lower risk of  
hypoglycemia or basal  
insulin

SU

TZD

**if HbA1C above target**

TZD

SU

**if HbA1C above target**

Basal Insulin

Or

DPP-4

**FIRST-LINE therapy is metformin and comprehensive lifestyle change (including weight management and physical activity)  
If HbA1C above target proceed as below**

**ESTABLISHED ASCVD OR CKD**

**ASCVD PREDOMINATES**

SGLT2 with proven CVD benefit  
If eGFR adequate

---

If SGLT2 not tolerated or contraindicated or if eGFR less than adequate add GLP-1 RA with proven CVD benefit

**if HbA1C above target**

If further intensification is required or SGLT2/GLP-1 RA is intolerable choose agents demonstrating CV safety:

- DPP-4 (if not on GLP-1 RA)
- Basal Insulin
- TZD
- SU

**HF OR CKD PREDOMINATES**

SGLT2 with evidence of reducing HF and/or CKD progression  
if eGFR adequate

---

If SGLT2 not tolerated or contraindicated or if eGFR less than adequate add GLP-1 RA with proven CVD benefit

**if HbA1C above target**

- Avoid TZD in the setting of HF

Choose agents demonstrating CV safety:

- DPP-4 (if not on GLP-1 RA)
- Basal Insulin

## 2021 DIABETES

### TREATMENT PLAN

\*Adapted from the ADA

<https://care.diabetesjournals.org/content/44/Supplement>

<b>FORMULARY OPTIONS</b>	
BIGUANIDES	Metformin, Metformin XR
TZD	Pioglitazone
SU	Glimepiride, Glipizide, Glipizide ER, Glyburide, Glyburide Micronized
DPP-4	Alogliptin*, Tradjenta*
SGLT-2	Steglatro*, Segluromet*
GLP-1	Adlyxin*, Bydureon*
BASAL INSULIN	Semglee, Basaglar*, Lantus*, Levemir*
<b>*PA REQUIRED</b>	
Formulary Biguanides, TZD's, and SU's are part of CHA's Choice 90 Formulary and will pay at the point of sale for a 30 or 90-day supply.	

# DIABETIC/RESPIRATORY SUPPLY POLICY

Supplies can be obtained at:  
2909 Daggett Ave, Suite 225  
541-883-2947

Office Hours: Monday-Friday 8:30am-4:30pm

## Supplies Available:

Meters  
Test Strips  
Lancets  
Syringes  
Pen Needles  
Sharps Containers  
Batteries  
Alcohol Swabs  
Syringe Magnifiers  
Masks  
Spacers  
Peak Flow Meters  
Nebulizers  
Compressors

A prescription is required for supplies, in accordance with  
OHP guidelines

We will send your provider a copy of your glucometer  
logbook, please bring your meter with you  
PA criteria must be satisfied for insulin pens, pumps, and  
CGM's

\*\*We can also download your Medtronic and T-Slim insulin  
pumps!\*\*

## Calculating Morphine Milligram Equivalents (MME)

OPIOID (doses in mg/day except where noted)	CONVERSION FACTOR
Codeine	0.15
Fentanyl transdermal (in mcg/hr)	2.4
Hydrocodone	1
Hydromorphone	4
Methadone	
1-20 mg/day	4
21-40 mg/day	8
41-60 mg/day	10
≥ 61-80 mg/day	12
Morphine	1
Oxycodone	1.5
Oxymorphone	3

*These dose conversions are estimated and cannot account for all individual differences in genetics and pharmacokinetics.*

1. DETERMINE the total daily amount of each opioid the patient takes.
2. CONVERT each to MMEs—multiply the dose for each opioid by the conversion factor. (see table)
3. ADD them together.

**CAUTION:**

- Do not use the calculated dose in MMEs to determine dosage for converting one opioid to another—the new opioid should be lower to avoid unintentional overdose caused by incomplete cross-tolerance and individual differences in opioid pharmacokinetics. Consult the medication label.

**USE EXTRA CAUTION:**

- Methadone: the conversion factor increases at higher doses
- Fentanyl: dosed in mcg/hr instead of mg/day, and absorption is affected by heat and other factors

## Pharmacy References/Guides

Arabic Number	Roman Numeral
½	ss
1	I or i
5	V or v
10	X or x
50	L or l
100	C or c
500	D or d
1000	M or m
Apothecary Weight And Volume	
Weight	Volume
1 grain (gr) = 65 mg	1 fluid dram (fl. dr) = 3.75 mL
60 grains (gr) = 1 dram (dr)	8 fluid drams (fl. dr) = 1 fluid ounce (fl. oz)
8 drams (dr) = 1 ounce (oz)	16 fluid oz (fl. oz) = 1 pint (pt)
12 ounces = 1 pound (lb)	2 pints (pt) = 1 quart (qt)
	4 quarts (qt) = 1 gallon (gal)
Metric Weight And Volume	
Weight	Volume
1 kilogram (kg) = 1000 grams (g)	1 liter (L) = 1000 milliliters (mL) or cc
1 gram (g) = 1000 milligram (mg)	1 deciliter (dL) = 100 milliliters (ml) or cc
1 milligram (mg) = 1000 microgram (mcg)	1 deciliter (dL) = 0.1 liter (L)
1 milligram (mg) = 0.001 grams (g)	
1 microgram (mcg) = 0.001 milligram (mg)	

<b>Common Household Measurements</b>	
1 tablespoon (tbsp) = 3 teaspoons (tsp)	
1 pint (pt) = 16 fluid oz (fl oz)	
2 tablespoons (tbsp) = 1 ounce (oz)	
1 cup (c) = 8 ounces (oz)	
1 pint (pt) = 2 cups (c)	
1 quart (qt) = 4 cups (c) = 2 pints (pt)	
<b>Commonly Used Conversions Between Measurement Systems</b>	
20 drops = 1 mL	1 grain = 65 mg
1 oz = 30 mL	5 grains = 325 mg
1 tbsp = 15 mL	1 lb = 0.454 kg
1 tsp = 5 mL or cc	1 kg = 2.2 lb
1 pt = 480 mL	1 oz = 28.35 g
1 qt = 960 mL	1 cc = 1 mL
1 gal = 3840 mL = 3.84 L	

<b>Commonly Used Sig Codes</b>			
q	every	qh	every hour
qam	every morning	qpm	every evening
qhs	nightly at bedtime	qd	everyday
qod	every other day	qwk	every week
qmo	every month	bid	twice daily
tid	three times daily	qid	four times daily
c	with	ac	before a meal
pc	after a meal	hs	at bedtime
prn	as needed	ud	as directed
qs	quantity sufficient	gtt	drop
od	right eye	os	left eye
ou	both eyes	ad	right ear
as	left ear	au	both ears
po	by mouth	sl	sublingual
pr	rectally	pv	vaginally
im	intramuscular	sq	subcutaneous

## NORMAL CHOLESTEROL VALUES

Test (mg/dL)	Preferred	Boderline	Poor	Very Poor
Total Cholesterol	Below 200	200-239	Above 240	
HDL	Above 60	50-59	Below 40	
LDL	100-129	130-159	160-189	Above 190
Triglycerides	Below 150	150-199	200-499	Above 500

## NORMAL DIABETES VALUES

Diabetes Test*	ADA Goal for	
	Diagnosis of Diabetes	Increased risk [Prediabetes]/IFG
<b>HbA1c</b> Using a method certified by NGSP and standardized to the DCCT assay. or	≥6.5%	5.7-6.4%
<b>Fasting Plasma Glucose</b> Fasting is defined as no caloric intake for at least 8 hours. or	≥126 mg/dL (7.0 mmol/L)	100-125 mg/dL (6.9 mmol/L)
<b>2 Hour Plasma Glucose [OGTT]</b> The test should be performed as described by the WHO, using a glucose load containing the equivalent of 75 g anhydrous glucose dissolved in water.	≥200 mg/dL (11.1 mmol/L)	140-199 mg/dL (7.8-11.0 mmol/L)

## NORMAL CBC VALUES

Parameter	Range of Normal Values
RBC (millions of cells/cu mm)	2.5 - 4.5
PCV (packed cell volume)	35% - 55%
polychromasia	slt (slight)
anisocytosis	slt (slight)
WBC (cells/cu mm)	5000 - 15000
het (heterophils)	40 - 75%
lymphs (lymphocytes)	20 - 50%
baso (basophils)	0 - 5%
eos (eosinophils)	0 - 2%
monos (monocytes)	0 - 3%
buffy coat	1% or less
COMMENTS	none
Thrombocytes	present
Plasma color	clear or pale yellow
T.P. (total protein) gm/dl	2.5 - 5.5
parasites	none
