

# CASCADE HEALTH ALLIANCE DRUG FORMULARY

## Administered by MedImpact

### INTRODUCTION

#### *Foreword*

This document represents the efforts of the Cascade Health Alliance Pharmacy and Therapeutics (P & T) Committee to provide physicians and pharmacists with a method to begin to evaluate the various drug products available. The medical treatment of patients is frequently relative to the practical application of drug therapy. Due to the vast availability of medication therapy and treatment modalities, a reasonable program of drug product selection and drug usage must be developed. The goal of the Cascade Health Alliance Drug Formulary is to enhance the physician and pharmacist's abilities to provide optimal cost effective drug therapy for patients.

The development, maintenance, and improvement of this process are evolutionary and require constant attention. This is accomplished by the Cascade Health Alliance P & T and Formulary Committees. The Formulary is a continually reviewed and revised list of drug products, which mirror the prevailing clinical opinion of the P & T and Formulary Committees. Unfortunately, this dynamic process does not allow this document to be completely accurate at all times. To accommodate the necessary changes of this document, newsletters and updates are sent regularly. As you use this Formulary, you are encouraged to review the information and provide your input and comments to the Cascade Health Alliance P & T and Formulary Committees.

The Cascade Health Alliance P & T and Formulary Committees use the following criteria in the evaluation of product selection for the Cascade Health Alliance Drug Formulary:

- Product safety profile
- Product efficacy
- Product effectiveness
- Comparison of relevant product benefits to current formulary agents of similar use, while minimizing duplications
- Equitable cost and outcomes of the total cost of product and medical care

## ***How to Use the Drug Formulary***

The Drug Formulary is a list of covered and preferred drug agents for Cascade Health Alliance members. All products are listed by their generic names and most common proprietary (branded) name. The Drug Formulary may be accessed by using the index, either by generic or proprietary name (in small capital letters) and by therapeutic drug category. The brand names listed are for reference use only, and do not denote coverage, unless specifically noted. Any product not found in this Formulary listing, or any Formulary updates published by Cascade Health Alliance shall be considered a Non-Formulary drug.

\$	Least expensive
\$\$	More expensive
\$\$\$	Significantly more expensive
\$\$\$\$	Most Expensive

The prices used to calculate the relative dollar scale are based on the monthly cost of therapy or cost of treatment course to allow for dosing interval differences between various products. The number of dollar signs is a relative indication of cost and does not represent the true cost of the drug. For example, two dollar signs do not mean that a product is twice as expensive as a product with one dollar sign. They are intended only to provide general information regarding cost.

Economics should not be the only factor involved with any therapeutic and clinical decision process. Price comparisons are reflective of pricing and contracts available through MedImpact. While this document can provide you with good information which can be used for non-health plan patients, it may not accurately reflect the drug cost for non-health plan patients.

For certain agents within the Drug Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols:

AGE	Age Edit
G	Generic
B	Brand
PA	Prior Authorization
QL	Quantity Limit
ST	Step Therapy
SP	Specialty Pharmacy Medication

Please refer to the prescribing guideline appendix within this document for details regarding specific agents.

### ***Benefit Coverage and Limitations***

The Formulary does not provide information regarding the specific coverage and limitations an individual member may have. Many members have specific benefit inclusions, exclusions, copays, or a lack of coverage, which are not reflected in the Drug Formulary.

The Drug Formulary applies only to outpatient drugs provided to members, and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should contact their Plan Sponsor or MedImpact at (800) 788-2949.

Depending upon a member's specific benefit parameters, the following topics may apply:

#### ***1. Generic Substitution***

When available, FDA approved generic drugs are to be used in all situations, regardless of the brand name indicated. Greater economy is realized through the use of generic equivalents. This policy is not meant to preclude or supplant any state statutes that may exist. All drugs that are or become available generically are subject to review by CCC's Pharmacy and Therapeutics Committee. MedImpact approves such multi-source drugs for addition to the MAC list based on the following criteria:

- A multi-source product manufactured by at least one (1) nationally marketed company.
- There must be a significant price spread between the brand and the generic product.
- At least one (1) of the generic manufacturer's products must have an "A" rating.
- Product will be approved for generic substitution by the CCC's P & T Committee.
- Certain drug products with complex pharmacokinetics, dosage forms, narrow therapeutic efficacy or where blood level maintenance is crucial will not be subject to substitution. These products are:
  - Neoral Oral Solution
  - Premarin

This list is reviewed and updated periodically based on the clinical literature and available pharmacokinetic principles of the drug products.

If a member or physician requests a brand name product in lieu of an approved generic, the member, based upon their coverage, will typically be required to pay the difference in cost between the brand and the generic. If a physician determines that there is a documented medical need for the brand equivalent, a request for coverage may be made using the medication request process.

## **2. Preferred Branded Interchange**

Certain cross-licensed or multi-source branded drug products may be excluded from coverage. For example, the Proventil HFA™ brand of albuterol sulfate

may not be covered while the Ventolin HFA™ brand is. If a member requests the non-covered brand, the member must pay the full price.

## **3. Medication Request Process**

### **A. Formulary Agents**

Drug products that are listed in the Formulary as Prior Authorization (PA) require evaluation, per Cascade Health Alliance P & T Committee guidelines, when the member presents a prescription to a network pharmacy. Each request will be reviewed on individual patient need. If the request does not meet the guidelines established by the P & T Committee, the request will not be approved and alternative therapy may be recommended.

### **B. Non-Formulary Agents**

Any product not found in the Formulary listing (including OTC over-the-counter medications), or on any Formulary updates published by Cascade Health Alliance, shall be considered a non-formulary drug. Coverage of non-formulary agents may be applied for in advance. This can be done by the prescribing provider submitting a duly completed Medication Prior Authorization Request Form (together with supporting documentation). The form can be accessed through the “Policies, Procedures, and Forms” section under both the Provider and Member Portals. Once received, CHA’s clinical team will review the request and, if deemed necessary, contact the physician to discuss the medical need for a non-formulary drug. Approval will be granted when a documented medical need exists.

The following basic guidelines are used:

- The use of Formulary Drug Products is contraindicated in the patient.
- The patient has failed an appropriate trial of Formulary or related agents.
- The choices available in the Drug Formulary are not suited for the present patient care need, and the drug selected is required for patient safety.
- The use of a Formulary drug may provoke an underlying condition, which would be detrimental to patient care.
- If the request does not meet the guidelines established by the P & T Committee, the request will not be approved and alternative therapy may be recommended.

### C. Obtaining Coverage

Coverage may be obtained by:

1. Faxing a completed Medication Request Form to CHA at 541-883-6104
2. Contacting CHA at 541-883-2947 and providing all necessary information requested.  
Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis of medical necessity.

### ***General Exclusions***

- A. Over the Counter (OTC) medications or their equivalents are not covered, unless otherwise specified in the Formulary listing.
- B. Some Nicotine Smoking Cessation products (i.e. nicotine inhaler) require a Prior Authorization.
- C. Drug Products not listed in the Drug Formulary, or specifically listed as not covered are not covered.
- D. Any drug products used for cosmetic purposes are not covered.
- E. Experimental drug products, or any drug product used in an experimental manner, are not covered.
- F. Replacement of lost or stolen medication is not covered.
- G. Non self-administered injectable drug products, unless otherwise noted, are not covered.

- H. Foreign drugs or drugs not approved by the United States Food & Drug Administration are not covered.
- I. Mental Health medications are not included in CHA's formulary. These medications are covered directly by OHP.

The P & T Committee recognizes that not all medical needs can be met with this document and encourages inquiries about alternative therapies.

***Pharmacist and Physician Communication***

The Drug Formulary is a tool to promote cost-effective prescription drug use. The P & T and Formulary Committees have made every attempt to create a document that meets all therapeutic needs; however, the art of medicine makes this a formidable task. CHA welcomes the participation of physicians, pharmacists, and ancillary medical providers, in this dynamic process. Physicians and pharmacists are highly encouraged to direct any suggestions, comments or formulary additions to CHA at the following address:

Cascade Health Alliance Pharmacy Services  
2909 Daggett Ave Suite 200  
Klamath Falls, OR 97601  
541-883-2947

Medication Drug Request Form (MRF) can be found at:

<https://cascadehealthalliance.com/>

Select For Provider: Provider Resource Center

Please send completed forms to:  
Cascade Health Alliance  
Attn: Prior Authorization Department  
2909 Daggett Ave. Suite 200  
Klamath Falls OR 97601  
Phone: 541-883-2947  
Fax: 541-883-6104

### Instructions:

This form is to be used by participating physicians and providers to obtain coverage for a non-formulary drug for which there is no suitable alternative available. Please complete this form and fax to CCC at 541-883-6104 or please call 541-883-2947 with this information. If you have any questions regarding this process, please contact CCC Pharmacy Service at 541-883-2947.

### Review Criteria:

The following guidelines are used in reviewing medication requests:

1. The use of Formulary Drug Products is contraindicated in the patient.
2. The patient has failed an appropriate trial of Formulary or related agents.
3. The choices available in the Drug Formulary are not suited for the present patient care need and the drug selected is required for patient safety.
4. The use of a Formulary Drug Product may provoke an underlying medical condition, which would be detrimental to patient care.
