

ImPACT™

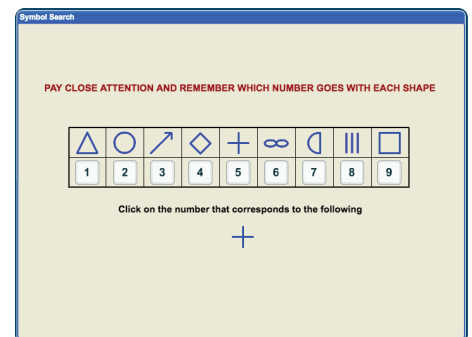

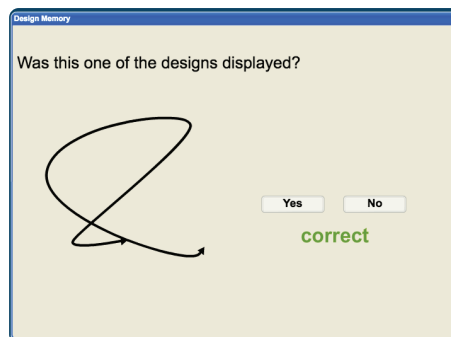

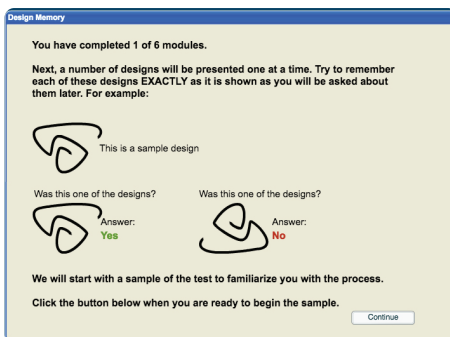

The first FDA-cleared aid in the assessment and management of concussion for ages 12-59.

Trusted by sports teams, schools, corporations, hospitals, and clinics, ImPACT® (Immediate Post-Concussion Assessment and Cognitive Test) is the most widely used computerized neurocognitive test to help evaluate and manage concussions. Since 2006, ImPACT is the clinician's choice for delivering an effective concussion management solution that professional healthcare providers need to inform their decisions.

Comprehensive Neurocognitive Testing

- 25-minute online test for ages 12-59
- Taken on an internet enabled computer (PC or MAC)
- Delivered via a secure web portal
- Produces a PDF report of test results

ImPACT measures visual memory, verbal memory, sustained and selective attention, and reaction time.

The ImPACT Advantage™

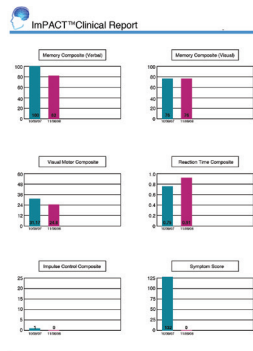

ImPACT is created by ImPACT Applications, Inc., the concussion evaluation and management technology developer that provides healthcare systems, healthcare providers, and sports organizations validated, research-backed, and regulatory compliant concussion tools.

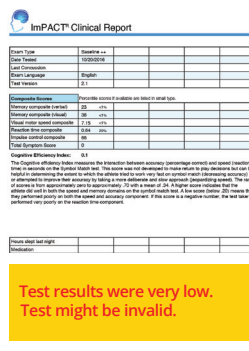

When you choose ImPACT, you get the concussion assessment aid that has led the industry for over 10 years, has been administered over 12 million times, and which is often referred to as the standard of care in concussion management.

ImPACT has been shown to be equal to or more reliable than many common medical tests

Produces a report with age-referenced normative comparisons, standard score and Reliable Change Index (RCI) scores

ImPACT detects and flags attempts to manipulate test scores

ImPACT for Ages 5-11

Pediatric concussion management is a growing concern. Give your patients ages 5-11 the ImPACT advantage with FDA-cleared ImPACT Pediatric.
