Where { healthy } comes from
The Campaign for Emanate Health

With an eye toward the future, Emanate Health is proud to launch, “Where { healthy } comes from: The Campaign for Emanate Health.” As a regional health care system, we are building on recent clinical achievements and creating new, world-class facilities to enhance services and provide comprehensive care for more people in the San Gabriel Valley, making a local difference in the communities we serve.

Emanate Health is a 501(c)3 regional, nonprofit health care system serving approximately one million residents of the area. Three acute care hospitals, a multi-specialty outpatient clinic, 16 other care clinics, an in-patient hospice and home care offer comprehensive health care services with 3,700 employees, 1,000 physicians, 700 volunteers, and eight health service lines.

With a passionate commitment to recruiting the best medical talent for our communities of Glendora, Covina, West Covina, and the surrounding areas, we are building modern facilities with advanced medical technology and offering cutting-edge treatments to further enhance patient care.

Creating a healthier community begins with giving our doctors, nurses and technicians the most advanced tools and facilities that they need to provide quality health care services, which is vital to our mission: “Emanate Health exists to keep people well in body, mind and spirit by providing quality health care services in a safe, compassionate environment.”

In recent years, Emanate Health has established itself as a recognized leader in providing Heart, Stroke, and Orthopedic care, as well as an expertise in Robotics surgery by using state-of-the-art technology and treatments to provide less invasive care and shorter hospital stays to boost patient outcomes. To enhance these health service lines, Emanate Health aspires to establish Centers of Excellence for Heart, Stroke, Orthopedics and Robotics—a national designation emblematic of high-quality care.

Building individual Centers of Excellence in each of what was once three separate community hospitals is transforming these facilities into a comprehensive regional health system. We are now the place for complex health care. But great health care is not just made by better facilities and technology—it’s made by committed people with a vision for the health of their community. Your financial partnership is part of the Emanate Health story and you are welcome to join us today.

Following are just a few specific initiatives in our near future:
INVESTMENT IN MODERNIZATION
AND ADVANCED TECHNOLOGY ($20 million)

Queen of the Valley Hospital Emergency Department and Intensive Care Unit – Built in 1962 for 35,000 visitors a year, Queen of the Valley Emergency Department now serves nearly 85,000 patients a year and is predicted to surpass 100,000 visitors in the near future.

As one of Los Angeles County’s busiest emergency departments, it is extremely undersized at only 7,000 square feet and 24 beds. Despite the size and capacity constraints, the medical team continues to provide superb care throughout the region, particularly during the pandemic.

Emanate Health is replacing its existing facility with a new, state-of-the-art, 60-Bed Emergency Department on the first floor with a new 24-bed Intensive Care Unit on the second floor. Looking ahead, the goal will be to create a Center of Excellence for Emergency Care and ICU, redefining the level of service for urgent care patients.

Inter-Community Hospital Cardiac Catheterization (Cath) Lab – Cardiovascular disease is the #1 cause of death in the United States. The cardio cath labs in the Heart Center at Inter-Community Hospital are in high demand and each year perform more than 2,000 heart procedures—more than any other hospital in San Gabriel Valley.

A cath lab is a specialized hospital room where doctors perform minimally invasive tests and procedures to diagnose and treat cardiovascular disease. The lab possesses high-level imaging equipment to determine how well blood is flowing through the arteries of a patient’s heart. If these arteries are blocked, cardiologists perform highly technical procedures to restore flow.

To meet the demand for this care, Emanate Health will be adding a new cath lab, renovating an existing cath lab and replacing diagnostic equipment, allowing skilled interventional cardiologists and electro physiologists to treat more patients. Once complete, Inter-Community Hospital will have one of the most advanced cardiac hospitals in the country offering advanced equipment used by experienced physicians to provide highly sophisticated cardiac care.

Glendora Medical Office Building – A new ground-up medical office building with hospital-based clinics on the Foothill Presbyterian Hospital campus is being planned. The objective is to create a modern patient and family-centered Medical Office Building that will serve as a one-stop, multi-specialty care center for the community.

The proposed building will be adjacent to the new “Gold Line” transit plaza and promote Emanate Health services in Glendora and neighboring cities. Emanate Health’s total wellness principles merge with the city’s effort to improve connectivity and accessibility to Foothill cities along the Interstate 210 corridor.

Foothill Presbyterian Hospital Off-site Urgent Care – Emanate Health recently purchased a building in Glendora to develop our first Urgent Care Center in the community.
The site, located on the corner of Route 66 and Amelia Avenue, offers ample parking and serves as a gateway to residential communities in Glendora and neighboring San Dimas and La Verne.

The clinic will strengthen the presence of the Emanate Health brand and offer quality health care services in this part of our community, offering both urgent care and clinic space with 45 exam rooms.

**Operating Rooms** — The operating rooms at Emanate Health are essential to performing specialized surgeries and procedures. Our operating rooms are at capacity, and are in high demand. Additional operating rooms will enable our medical staff with a wide range of specialties to provide significantly enhanced care to the community.

**Cancer Care Center at Queen of the Valley Hospital** — A new, state-of-the-art Cancer Care Center at Queen of the Valley Hospital will offer radiation, chemotherapy and infusion therapy services, giving our patients local access to efficient treatment. Infusion services are noteworthy because they deliver medication and/or hydration directly into the bloodstream. The cancer center will have advanced equipment and knowledgeable staff who specialize in this procedure.

While 60% of the infusions will be used for cancer treatment, the other 40% will address a variety of other illnesses, like autoimmune disorders, congestive heart failure, dehydration, immune deficiencies, pain and infections that are unresponsive to oral antibiotics. The outpatient infusion center can accommodate up to 20,000 clinic visits, 14,000 radiation-oncology treatments, 9,500 infusion starts and 1,700 outpatient interventions each year.

**Queen of the Valley Hospital Comprehensive Stroke Center** — Stroke is the leading cause of long-term disability and ranks fourth among all causes of death, accounting for 1 in every 19 deaths in the United States.

Queen of the Valley Hospital has been designated a Comprehensive Stroke Center by the Los Angeles County Emergency Medical Services Agency. This means that the hospital is a 911 receiving hospital for urgent stroke patients that has met the high standards of the federal accrediting body, the Center for Medicare & Medical Services.

Comprehensive Stroke Centers have subspecialty neurology and neuro-interventional physicians available 24 hours a day and 7 days a week who can perform clot-removing procedures. Within minutes of a stroke patient’s arrival in the emergency department, our team is able to quickly assess stroke symptoms and provide treatment.

Your investment with us will provide the much-needed stroke research to aid in enhancing stroke prevention and treatment options. The overall goal of stroke research is to translate basic research findings into useful therapies and effective interventions for people suffering from stroke.
Upgraded Main Entryway and Lobby at Inter-Community Hospital – A new exterior façade, patient-visitor entryway and lobby will be built at the hospital befitting the Emanate Health Heart Center and other health care services offered there. The new expanded lobby will include remodeled information, admissions and security counters, in addition to an upgraded gift shop and coffee kiosk. The flow of traffic entering the building will also be redesigned.

Enhanced Main Entrance at Emanate Health Hospice and Home Care – We know that addressing a family member’s health can cause stress and anxiety. Providing your loved one with a sense of comfort and safety when you arrive helps to put both of you at ease. That’s why we are enhancing entrances to Emanate Health Hospice and Home Care to provide an enhanced feeling of harmony, tranquility, and safety.

**INVESTMENT IN MEETING COMMUNITY NEEDS ($1 million)**

Emanate Health is recognized for its community partnerships and honored for its positive impact on community health. We are advancing preventative care services that include screenings, check-ups, and patient counseling to prevent illnesses, disease, or other health problems, because the best way to solve a problem is preventing it from happening in the first place.

Investments from donors provide equipment, technology, charity care, and social programs.

Together we create opportunities for increased access to care and sustainability. Partner with us today to help people keep well in body mind and spirit by providing quality health care services in a safe, compassionate environment. Your generous contribution will support programs such as:

- Diabetes Education and Care Program
- Men’s Health and Enhanced Surgical & Urological Interventions
- Women’s Health with Enhanced Preventative Health & Breast Care Services

**INVESTMENT IN A SECURED FUTURE – ENDOWMENTS ($4 million)**

Emanate Health is committed to building a bright future for our health care system by establishing a self-sustaining endowment to help us weather any economic uncertainty. Promoting financial sustainability at every turn, ensures our community of best-in-class care.

Together with state-of-the-art facilities, technology and treatments, a healthy endowment sends a powerful message to prospective doctors, nurses, technicians and other medical staff as the backbone of Emanate Health, that the general public and the donor community are engaged and vested in the growth of the health care system.
A permanent endowment provides Emanate Health with a pool of money that offers a reliable income stream in perpetuity. Annual distributions help us to plan ahead and fund regular, ongoing programs.

A healthy endowment gives Emanate Health the flexibility and the capability to quickly respond to unforeseen events without diverting funds away from existing hospital programs.

An endowment gift allows donors to demonstrate their values in a sustainable way that can have a profound impact on the lives of other people, while exhibiting what’s important to them.

Donors are welcome to target their gifts to a specific hospital, ambulatory center, service line and program that aligns with their giving objectives.

Gifts of all sizes are welcome from individuals or large private entities, as long as they support the mission, goals, and vision of Emanate Health.

A world of opportunity is available to all donors as Emanate Health leverages clinical advancements and achievements, and builds the health care system of tomorrow with the construction of new, world-class facilities to strengthen medical services. You can be a part of the renaissance that’s taking place at Emanate Health today.
