Best Practices:

- ▶ Use the Inovalon® INDICES® Provider Insights Dashboards to identify members with gaps in care.
- ▶ Make outreach calls and/or send letters to advise members of the need for a visit. Ensure that outreach methods include educational information.
- ▶ Schedule mammogram screenings for your female patients ages 50 to 74 who have not had a mammogram screening since October 1 (two years prior).
- ▶ Encourage testing by educating your patients on the importance of early detection at every point of contact. This includes during clinic visits, telehealth or phone calls and outreach methods.
- ▶ Document and code screening mammograms and mastectomies (bilateral or unilateral) on claims / encounter data in a timely manner.
- ▶ Note: Mammograms do not require prior authorization. Provide the member with a list of nearby contracted imaging / mammography centers.
- ▶ Assist members by scheduling an appointment, whenever possible, to increase probability of compliance.

¹ Measures reported using the *administrative* data collection method report on the entire eligible population and use only administrative data sources (e.g. claims, encounter, lab, immunization registries) to evaluate if services were performed.
