Asthma Preventative and Remediation Services

****Revision****

Dear Provider,

For Asthma Awareness Month, Kern Health Systems is excited to shed a spotlight on our asthma resources. They include our Asthma Preventative Services (APS), Asthma Remediation (AR) Services, and the Breathe Better Program. KHS will host a webinar about these resources on

****June 12th, 2025****, from 12:00pm – 1:00pm. Topics will include:

- The APS benefit includes clinic-based and home-based asthma management and in-home environmental trigger assessments that can find asthma triggers commonly found in the home.
- Our Breathe Better Program includes classes that help members with asthma learn how to control their disease and prevent asthma attacks. Throughout two 90-minute classes, members will go over topics such as common asthma triggers, asthma-friendly cleaning, and medications. After the program, members can receive a series of follow-up calls from asthma educators who can check their asthma control and offer support with asthma management.
- Our AR program covers physical changes to a member's home that are necessary to ensure their health, welfare, and safety. They also ensure that the individual is able to function in the home and without acute asthma symptoms, which could result in the need for emergency services and hospitalization.
- We will review covered services, member eligibility criteria, referral process, and how to become an APS and AR provider.

Please RSVP to the webinar using the following link:
