Managed Care Accountability Set (MCAS) MY 2022 Audit

Dear Provider,

As mandated by the California Department of Health Care Services (DHCS), Kern Health Systems (KHS) is required to report data for the annual Managed Care Accountability Set (MCAS, formerly referred to as HEDIS). This data is used to determine the quality of care provided to KHS members.

This year, KHS has contracted with Cotiviti for the retrieval of medical records. Cotiviti will provide your office with a list of KHS member records that will need to be provided. This information will be used to calculate MCAS/HEDIS performance levels for the measurement year 2022.

Provider offices will receive a letter containing more details and contact information in the next few days from Cotiviti. Thank you for your support.

Sincerely,

Melissa McGuire
Deputy Director of Provider Network Management
Kern Health Systems
