**EXECUTIVE SUMMARY**

In collaboration with the Health Equity Alliance of Rock County (HEAR), Mercyhealth conducted a Community Health Needs Assessment (CHNA) designed to identify health and quality of life issues in the Rock County, Wisconsin community. This systematic approach identified issues where changes in the healthcare delivery system, along with continued collaboration, could improve patient care, preventive services and overall health and quality of life in the community.

Results from this study can be used for strategic decision-making purposes as they relate to the health needs of the community and to ensure that programs and services closely match the priorities and needs of the Rock County community.

In addition, this report has been prepared in compliance with IRS Notice 2011-52 relating to community health needs assessment (CHNA) required by Internal Revenue Code Section 501-r-(3). It includes:

1. A description of the community served by Mercyhealth Hospital & Trauma Center - Janesville
2. A description of the process and methods used.
3. An account of how the broad interests of the community served were obtained and incorporated into the assessment.
4. A prioritized description of the health needs identified.
5. A description of existing health care facilities and other resources available to meet the community health needs identified through the CHNA.

## **INTRODUCTION**

### **Background**

For over 125 years, Mercyhealth has touched the lives of millions of individuals throughout southern Wisconsin and northern Illinois. Our innovative services, committed professionals and dedication to community outreach, and to meeting the needs of the underserved, have led to Mercy's incredible transformation over the last 25 years. Beginning as a stand-alone hospital, Mercy has become a vertically integrated health system with 70 facilities serving 26 communities throughout southern Wisconsin and northern Illinois. Today, Mercyhealth is a vertically integrated health care delivery system organized to provide a continuum of care to our communities.

### **Mercy Hospital and Trauma Center – At a Glance**

Admissions:	7,435
Outpatient Visits	1,027,138
ER Visits	32,691
Births	846
Beds	240
Employees	1591
Medical Staff	226+

For the purposes of this report we define the Mercy Hospital and Trauma Center community as Rock County, Wisconsin, where a majority (approximately 76%) of the patients served by Mercy Hospital and Trauma Center in 2016 reside.

### **METHODOLOGY**

Over the last 12 months, in collaboration with our community partners, Mercyhealth Hospital and Trauma Center conducted a Community Health Needs Assessment (CHNA) by gathering health-related information specific to Rock County and surrounding areas. Key informant interviews were conducted and community health surveys were collected to identify concerns relating to the health of the community, while assessing area-based programs and organizations available to address the community's needs. These needs were prioritized based on level of importance to the community as well as the hospital's ability to impact those needs.

Multiple sources were utilized to complete the CHNA. A detailed analysis of secondary data was used to assess the community profile, morbidity rates, and causes of mortality and health status of the community. Additionally, a community based survey was completed to examine perceptions of the community health issues, unhealthy behaviors, quality of life issues, healthy behaviors and access to healthcare. Finally, community leaders and stakeholders participated in key informant interviews to further enhance the versatility of the data utilized in this survey.

## Secondary Data

Secondary data was derived from a variety of publicly available sources, including the United States Census Bureau, Community Commons, WISH and the Center for Disease Control's County Health Rankings. Within each section of the report there are definitions, data analysis and interpretations.

## Primary Data Collection

In addition to secondary data sources, primary data was also collected. This section describes the methods used to collect, verify and analyze primary survey data.

### A. Survey Design

An initial review of publicly available health needs assessments was conducted to evaluate and identify common themes and approaches to collecting the necessary data. Working in collaboration with the Health Equity Alliance of Rock County (HEAR) (Appendix E), a survey was designed to ensure all critical health areas were being addressed for the county.

To properly assess the perceived health needs of the community, the surveys asked specific questions to rate and assess, including:

- a. Health issues in the community;
- b. Unhealthy behaviors in the community;
- c. Well-being;
- d. Accessibility to healthcare; and
- e. Healthy behaviors

A copy of the survey is available in APPENDIX F (English & Spanish).

### B. Sample Size

We calculated sample size needed by using a standard formula based on the population size, margin of error, confidence level and standard of deviation. Our calculation encompasses a 95% confidence level, a +.5margin of error and a standard deviation of .5.

$$\text{Necessary Sample Size} = (Z\text{-score})^2 * \text{StdDev} * (1 - \text{StdDev}) / (\text{margin of error})^2$$

For this survey, the minimum sample size was 384 surveys. The data collection for this community health needs assessment yielded a total of 1468 responses, exceeding the confidence interval threshold.

### C. Data Collection

Several data collection techniques were used. The primary technique was the creation of a survey in both English and Spanish versions. This survey was mailed to 2000 registered voters. In addition, the survey was made available online via *Survey Monkey*. The survey web link was distributed via email, the Mercyhealth website and also included on the printed survey.

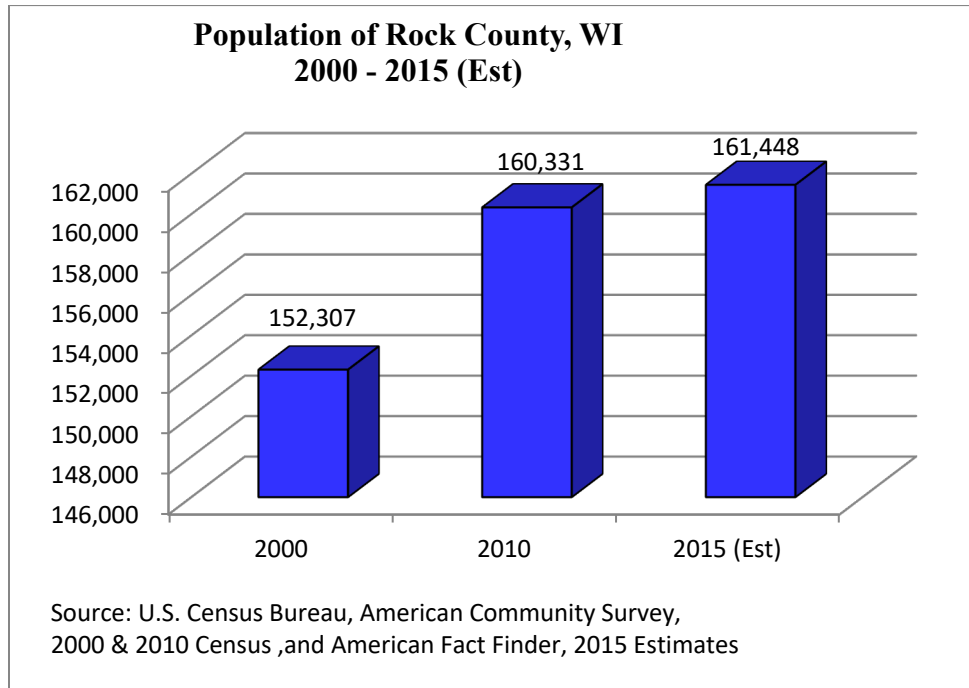

## DEMOGRAPHIC PROFILE

## Population

Population data characterize individuals residing in Rock County, providing an overview of population growth trends. Population data is the foundation for analysis of data.

### Population Growth

US Census data and population estimates indicate the population of Rock County increased 6% between 2000 and 2015. The bulk of this population increase occurred between 2000-2010 when the population increased 5.27%. Data shows only a slight increase in population from 2010-2015.

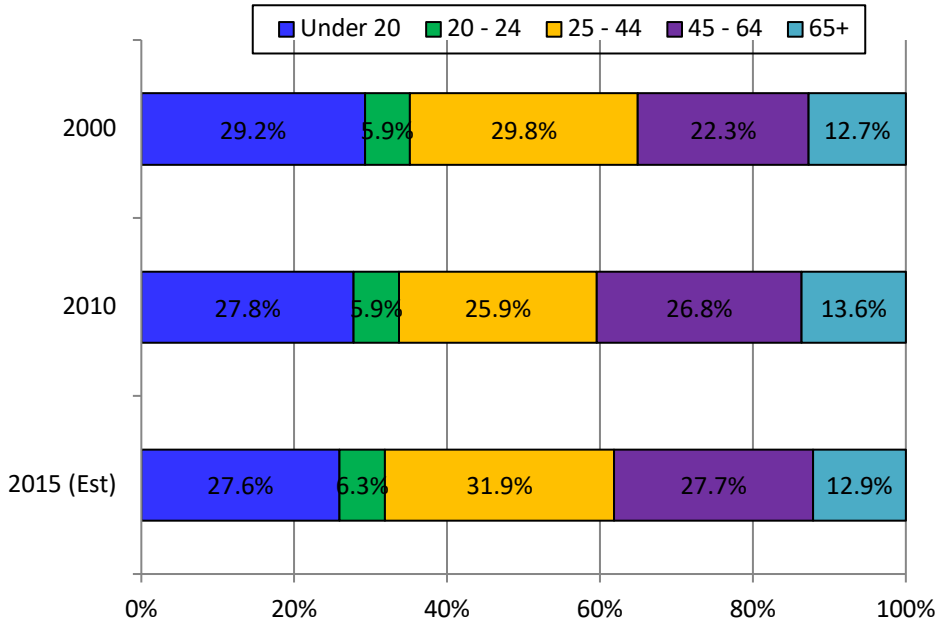

### Age, Gender and Race Distribution

Population data broken out by age, gender and race provide a foundation to analyze issues and trends impacting demographic factors, including economic growth and the distribution of healthcare services. Understanding the cultural diversity of communities is necessary when considering healthcare service delivery systems and infrastructure.

#### Age

The graph below shows that the percentage of individuals in Rock County in the age groups 25-44, 45-64 and 65+ all increased, while the age groups of Under 20 and 20-24 decreased. The median age of Rock County residents is 38.9 years.

### Age Distribution - Rock County, WI 2000 - 2015 (Est)

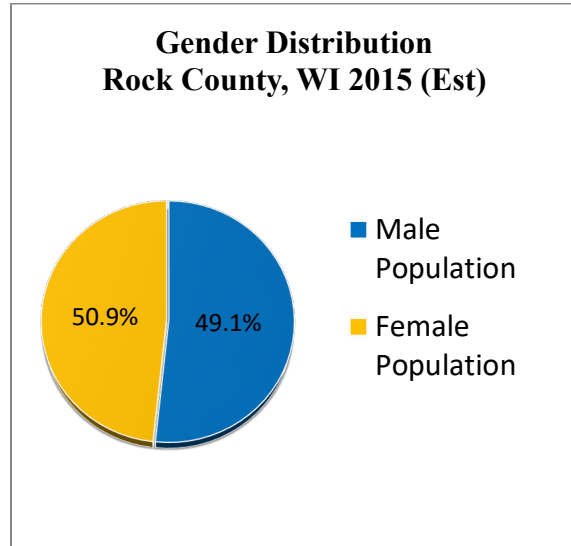

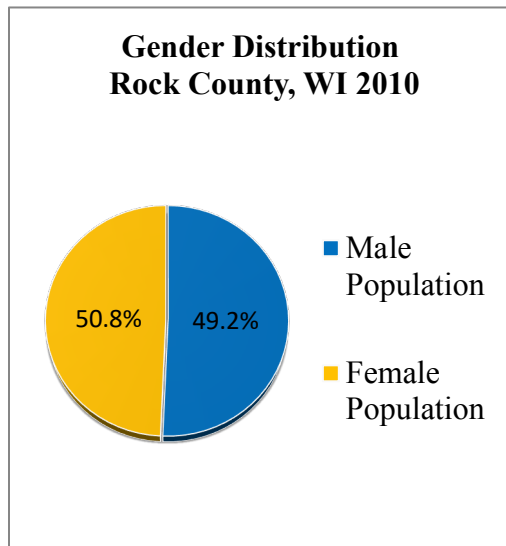

**Median Age  
of Rock County  
Residents  
in 2015:  
38.9 years**

Source: U.S. Census Bureau, American Community Survey, 2000, 2010 and 2011-2015 ACS 5-year Estimates

### Gender

The gender distribution of Rock County residents has remained consistent from 2010 to 2015, for both male and female residents.

Source: US Census Bureau

The racial distribution in Rock County has not significantly changed from 1990 to 2015.

Race Distribution - Rock County, Wisconsin				
	1990	2000	2010	2015 (Est)
White	93.7%	91.0%	87.7%	90.1%
Black or African American	4.8%	4.6%	5.0%	3.5%
American Indian and Alaska Native	0.3%	0.3%	0.3%	0.2%
Asian	0.7%	0.8%	1.0%	1.2%
Other	0.5%	1.8%	3.7%	1.2%
Two or more races	-	1.5%	2.3%	3.8%

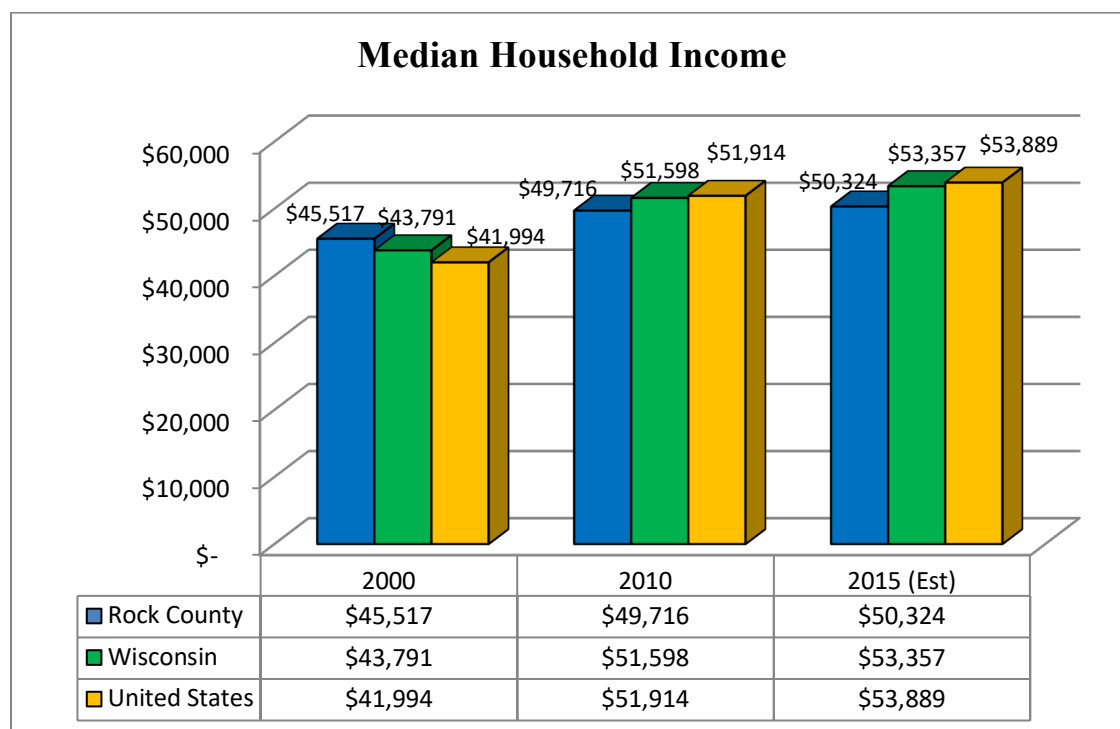

Source: US Census Bureau

### Economic Information

Median income divides households into two segments, with one-half of households earning more than the median income and the other half earning less. Median income is considered a more reliable factor than average income because it is not significantly impacted by unusually high or low-income values. The definition of poverty is lacking sufficient income to meet one's basic needs. Therefore, poverty is associated with numerous chronic social, health, education, and employment conditions.

### Median Income Level

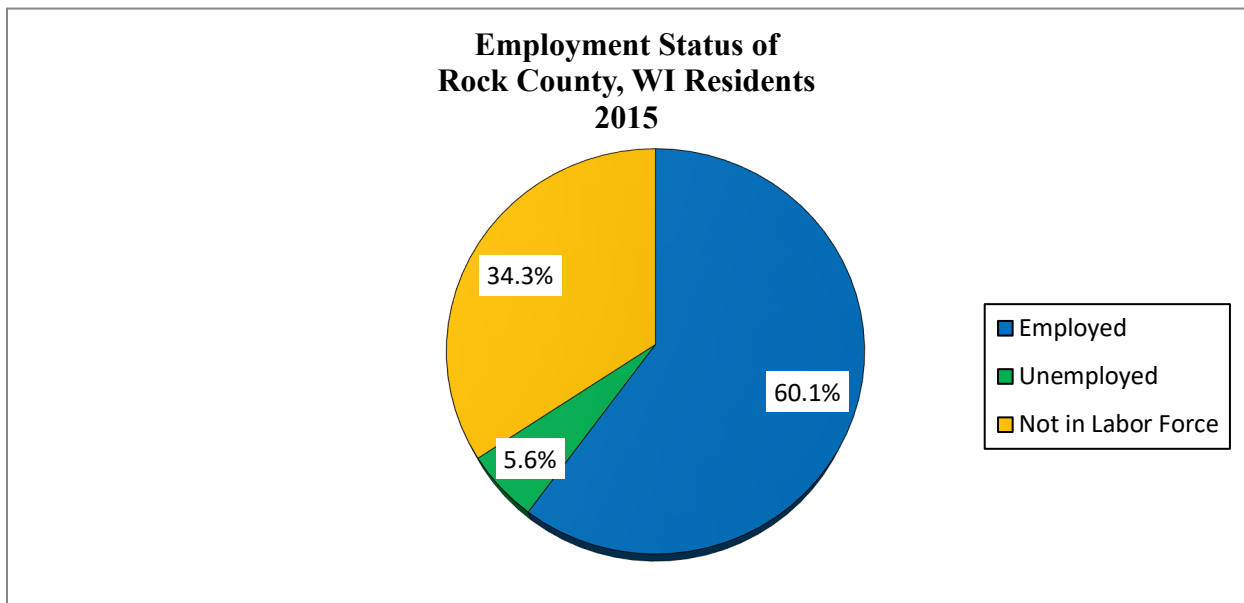

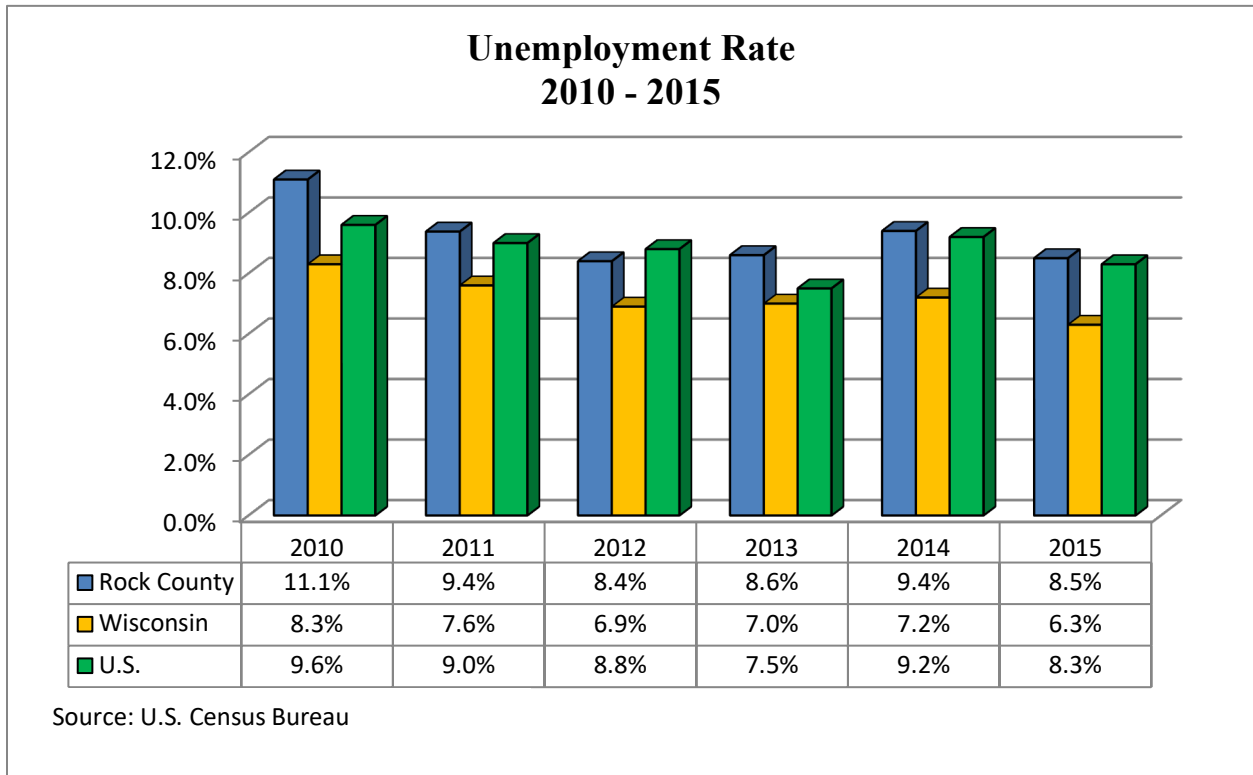

The median household income (MHI) of Rock County residents is \$50,324, lower than both the state and national medians.

Source: U.S. Census Bureau, 2000 Census, American Community Survey, Selected Economic Characteristics, 2010 and 2015

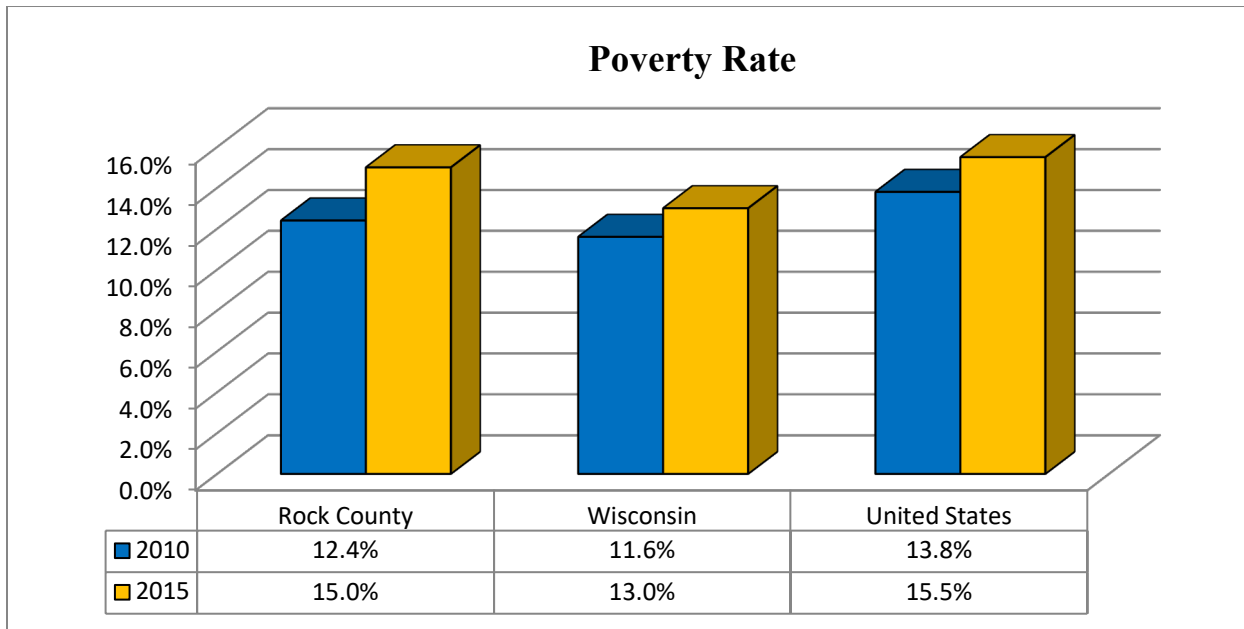

## Unemployment

Rock County's most recent unemployment rate sits at 8.5%, compared to 6.3% for the State of Wisconsin and 8.3% nationally.

## Families in Poverty

Poverty has a significant impact on the development of children and youth. In 2015, 15% of Rock County residents lived below the poverty level, greater than the state average of 13% but less than the national average of 15.5%.

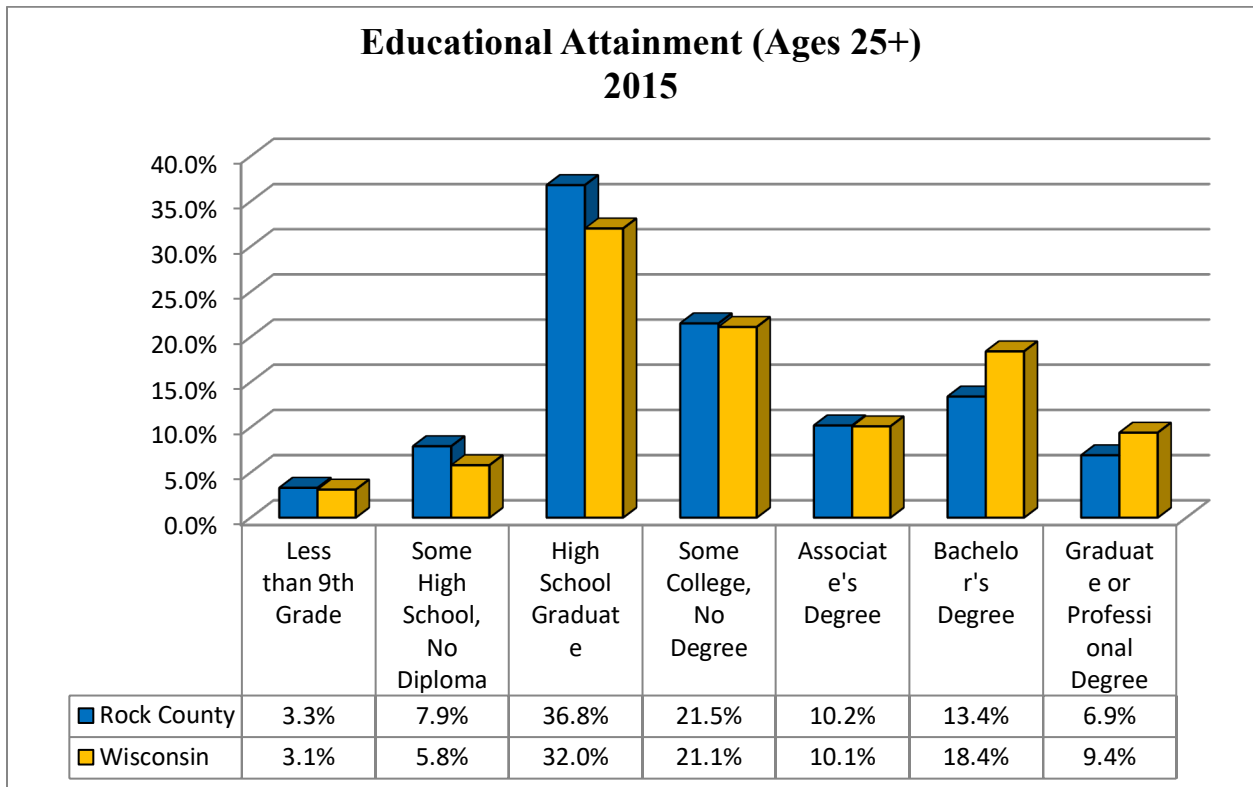

Source: U.S. Census Bureau, American Community Survey, Selected Economic Characteristics, 2015

## Education

Research suggests that the higher level of educational attainment and the more successful one is in school, the better one's health will be and the greater likelihood of one selecting healthy lifestyle choices. Accordingly, an increase in years of education is strongly related to an individual's propensity to earn a higher salary, obtain better employment and foster multidimensional success in life.

Rock County has a higher rate of residents graduating high school than the State of Wisconsin. However, Rock County has fewer residents with a college degree than the State of Wisconsin.

Source: U.S. Census Bureau, American Community Survey, Educational Attainment, 2015

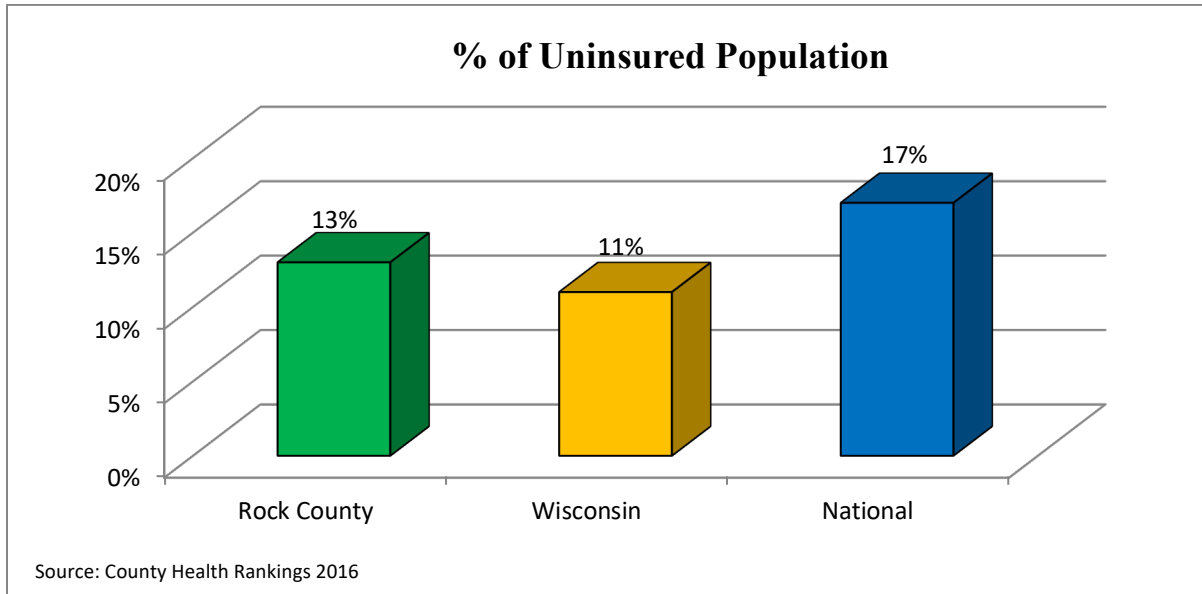

## PREVENTION BEHAVIORS

### Accessibility

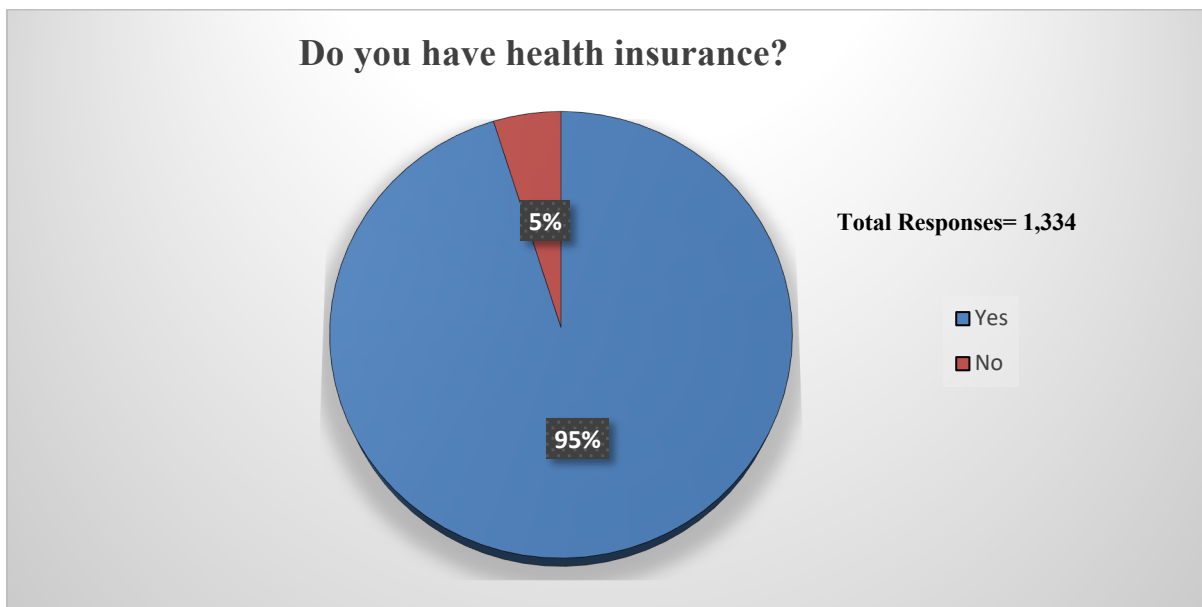

The availability of healthcare services is critical. As such, healthcare accessibility must address both the associated financial costs and the supply and demand of medical services.

### Insurance Coverage

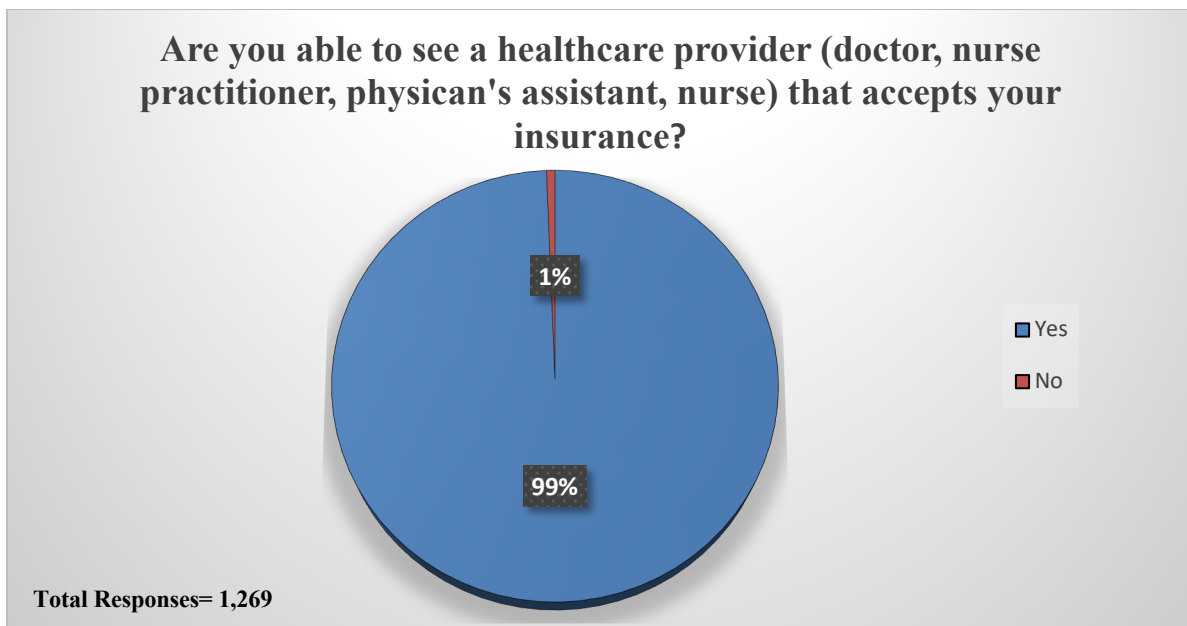

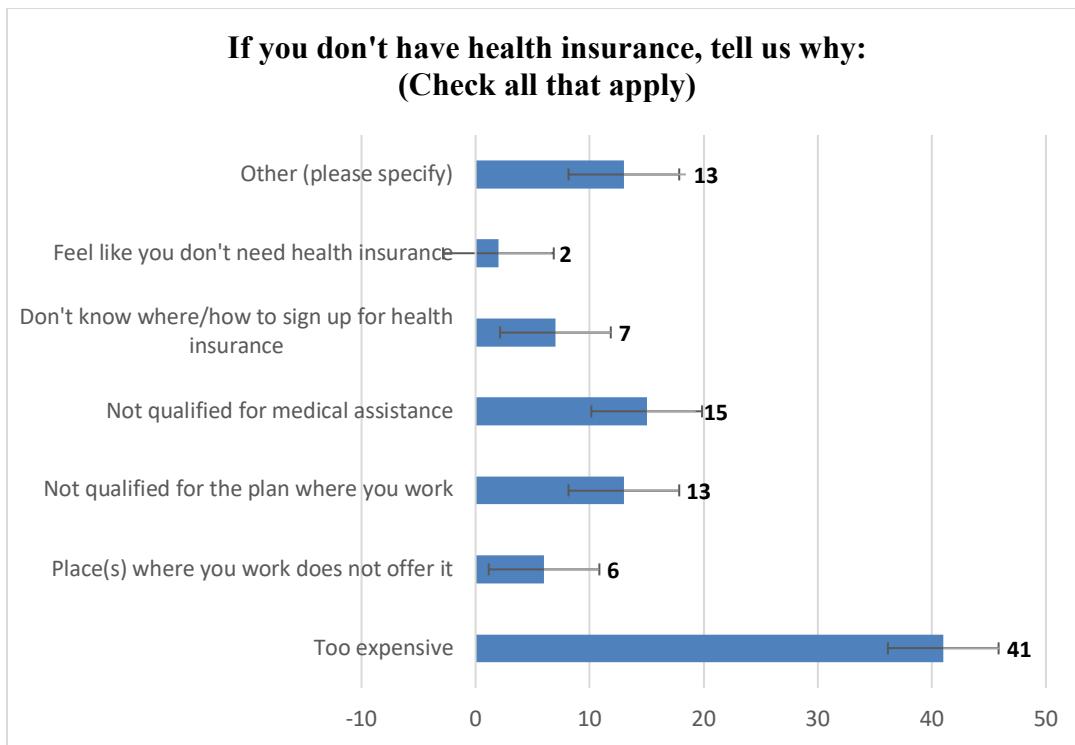

Information gathered from the County Health Rankings and the U.S. Department of Health and Human Services show Rock County residents possess healthcare coverage at a lower rate than the state average but above the national average.

Community survey respondents indicated that 95% had health insurance. In addition, 99% of survey respondents reported they were able to see a healthcare provider that accepts their insurance.

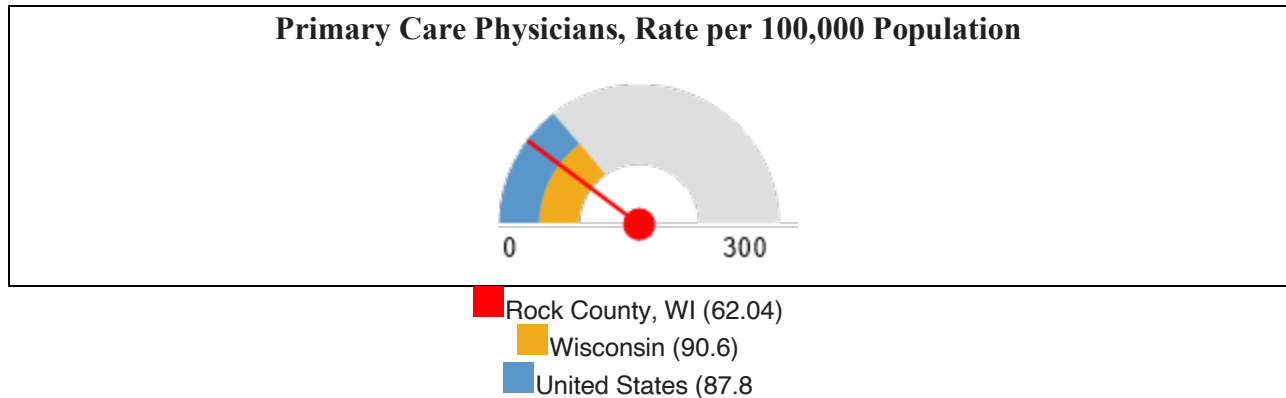

In response to the survey question, “if you don’t have health insurance, tell us why,” the majority of respondents (90%) answered “not applicable.” The second highest response to this question was “too expensive.”

### Access to Care

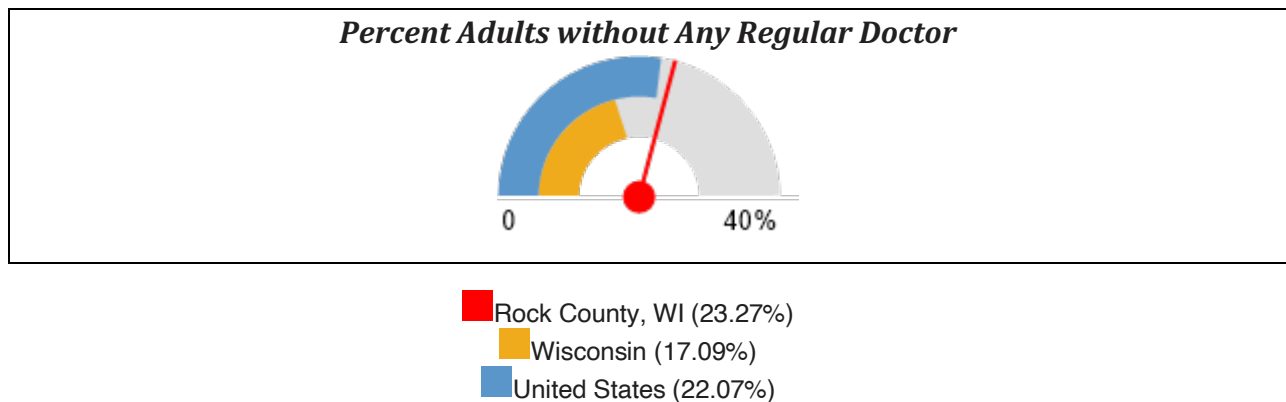

A wide variety of health care services are available in Rock County (Appendix G). The following indicator reports the number of primary care physicians per 100,000 population. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Source: Community Commons

### Medical Care

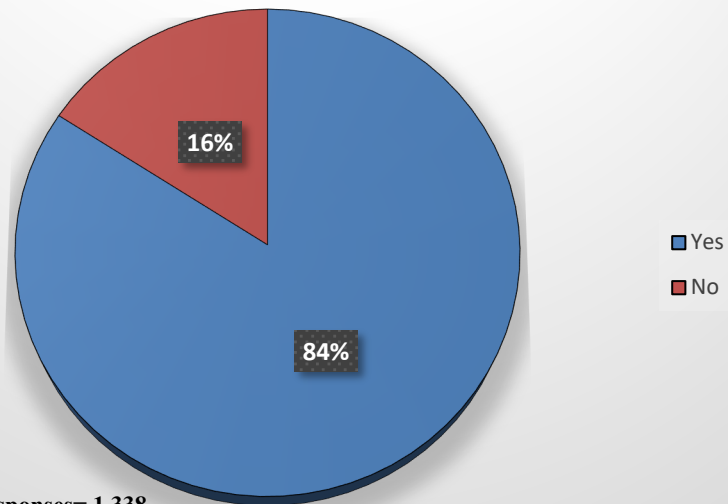

Having access to regular primary care is important to preventing various health issues and emergency department visits.

Source: Community Commons

Respondents were asked if, over the previous 12 months, they saw a healthcare provider they considered a regular provider.

**In the past 12 months, have you seen a healthcare provider (doctor, nurse practitioner, physician's assistant, nurse) that you consider a regular provider?**

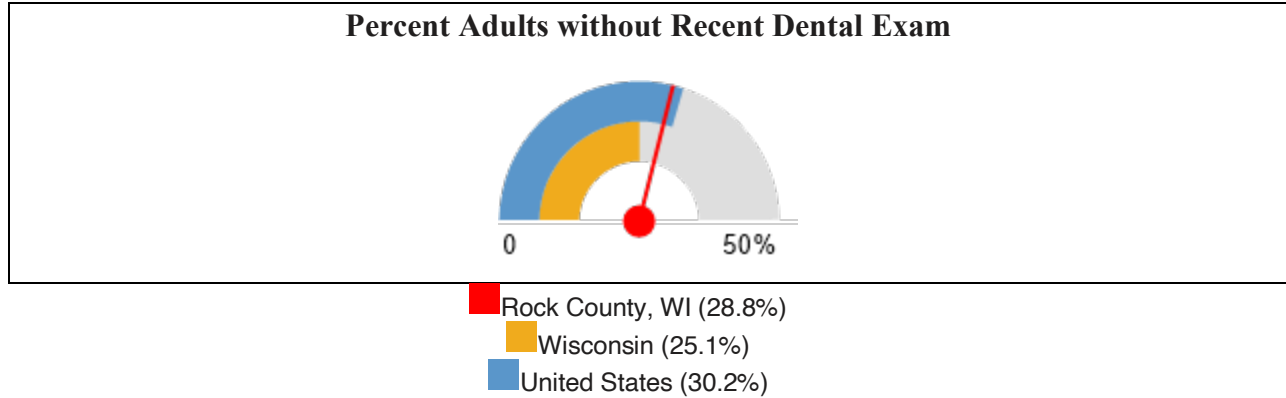

**Total Responses= 1,338**

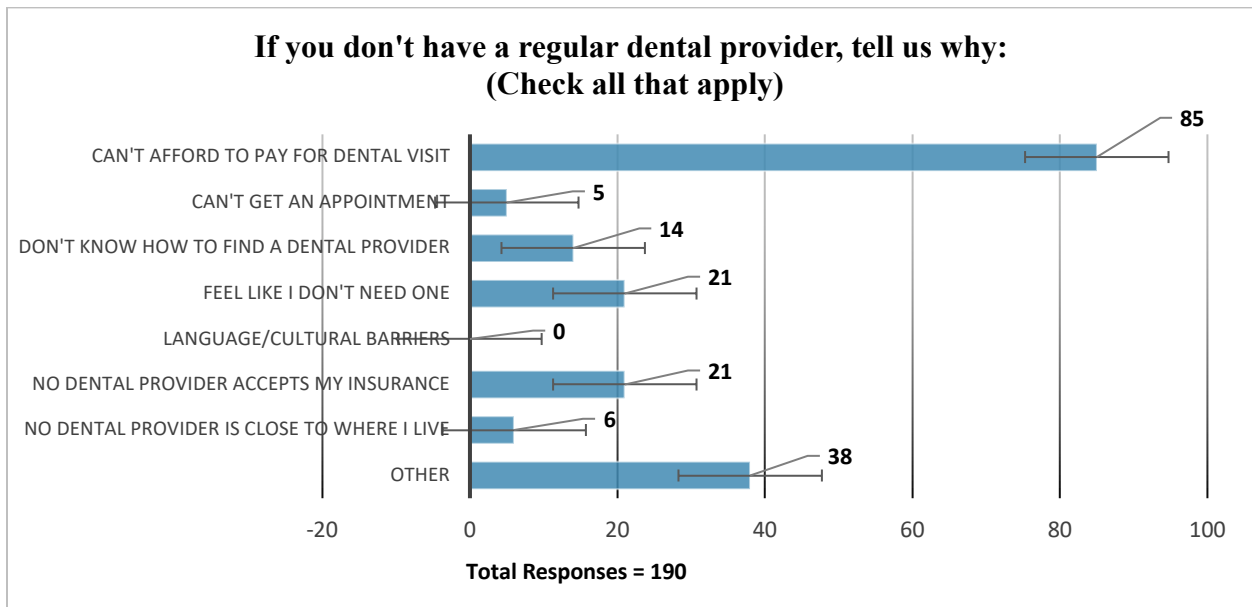

## Dental Care

This indicator is relevant because engaging in preventive behaviors decreases the likelihood of developing future health problems. Additionally, this indicator can identify lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and possible social barriers preventing utilization of services.

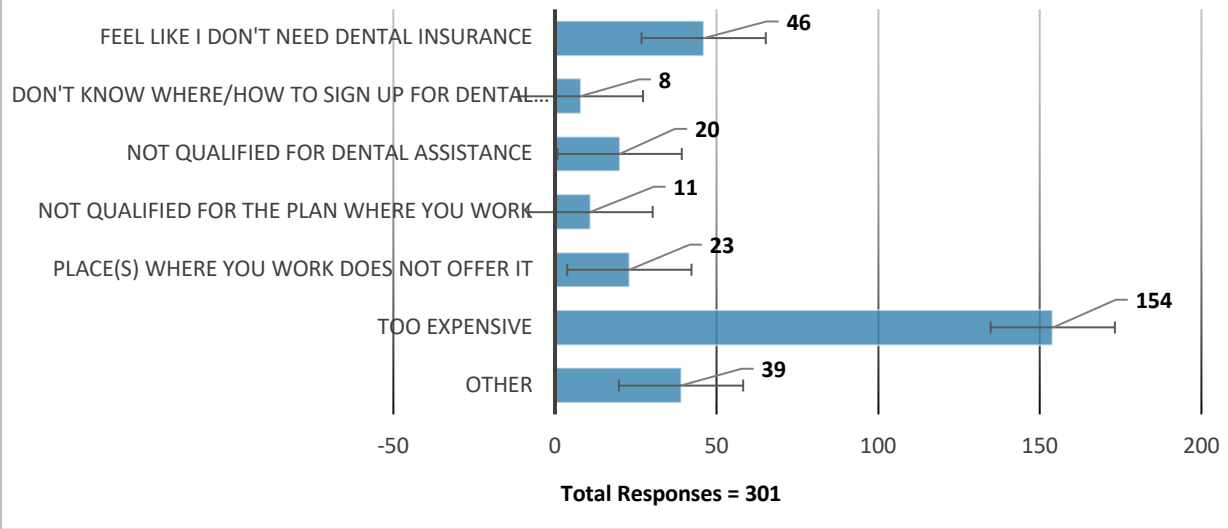

Source: Community Commons

Respondents selected “can’t afford to pay for a dental visit” the primary reason they don’t have a regular dental provider. When asked why they don’t have dental insurance, “too expensive” and “feel like you don’t need dental insurance” were selected as the primary reasons.

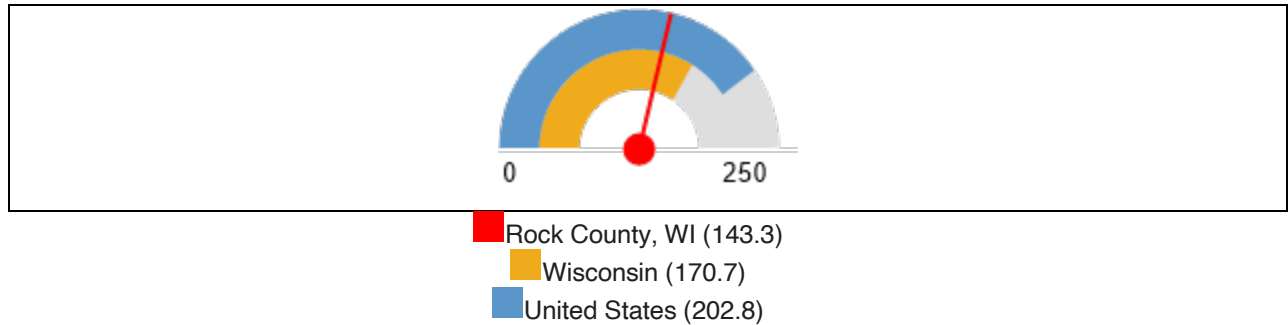

**If you don't have dental insurance, tell us why:  
(Check all that apply)**

**Mental Health**

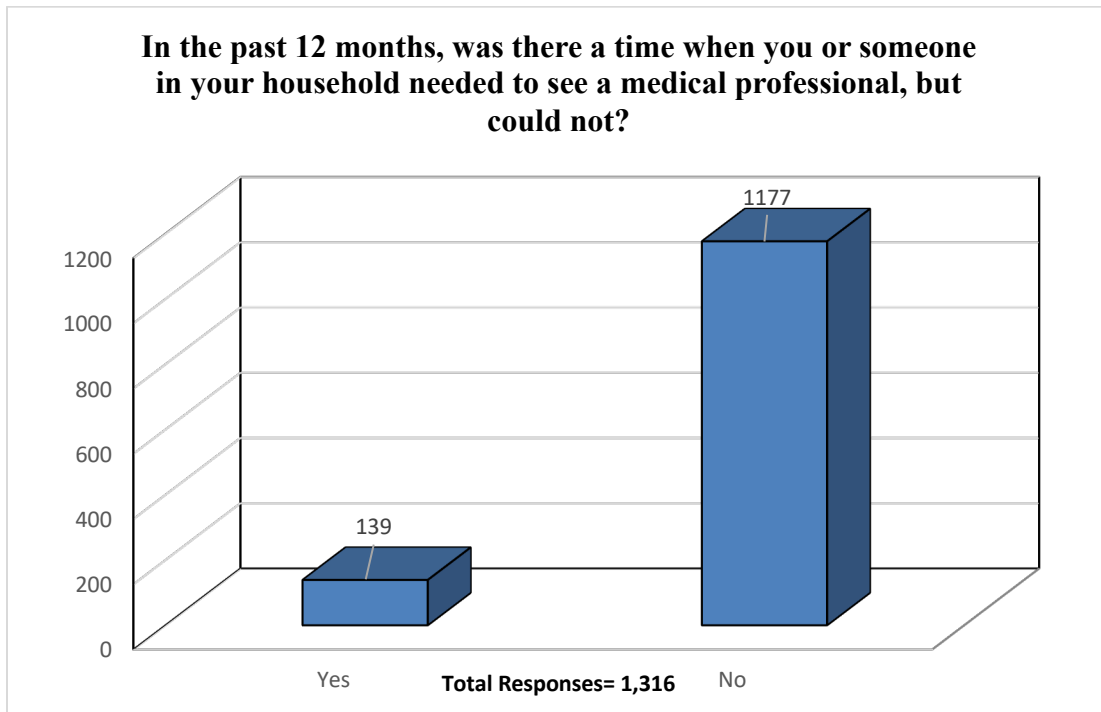

This indicator reports the rate of the county population to the number of mental health providers.

**Mental Health Care Provider Rate (Per 100,000 Population)**

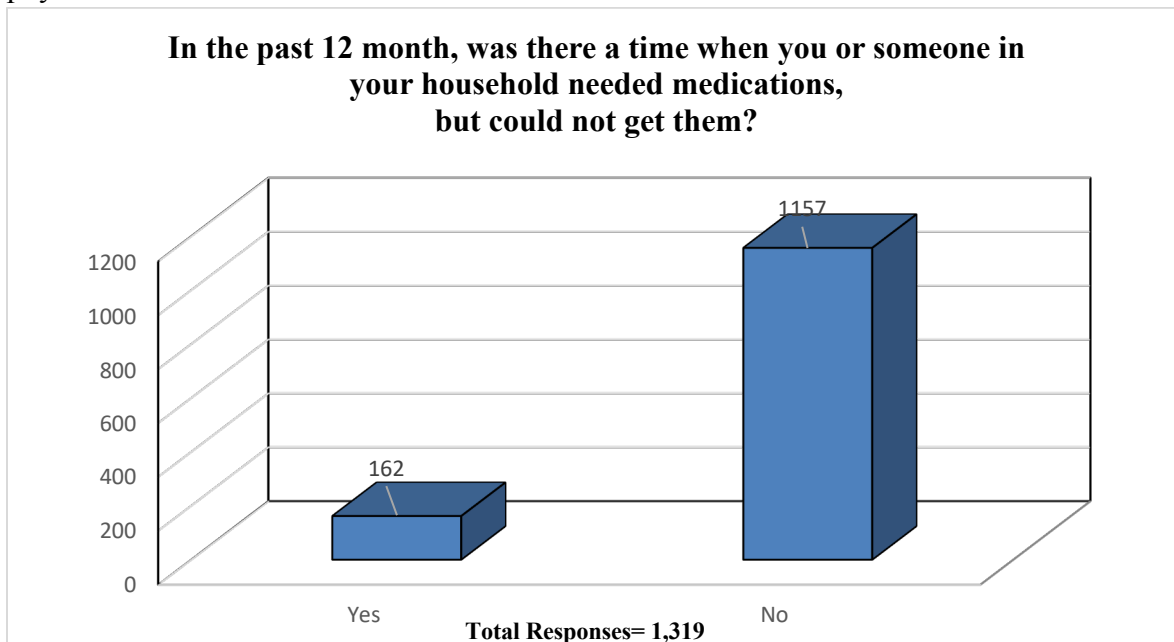

Source: Community Commons

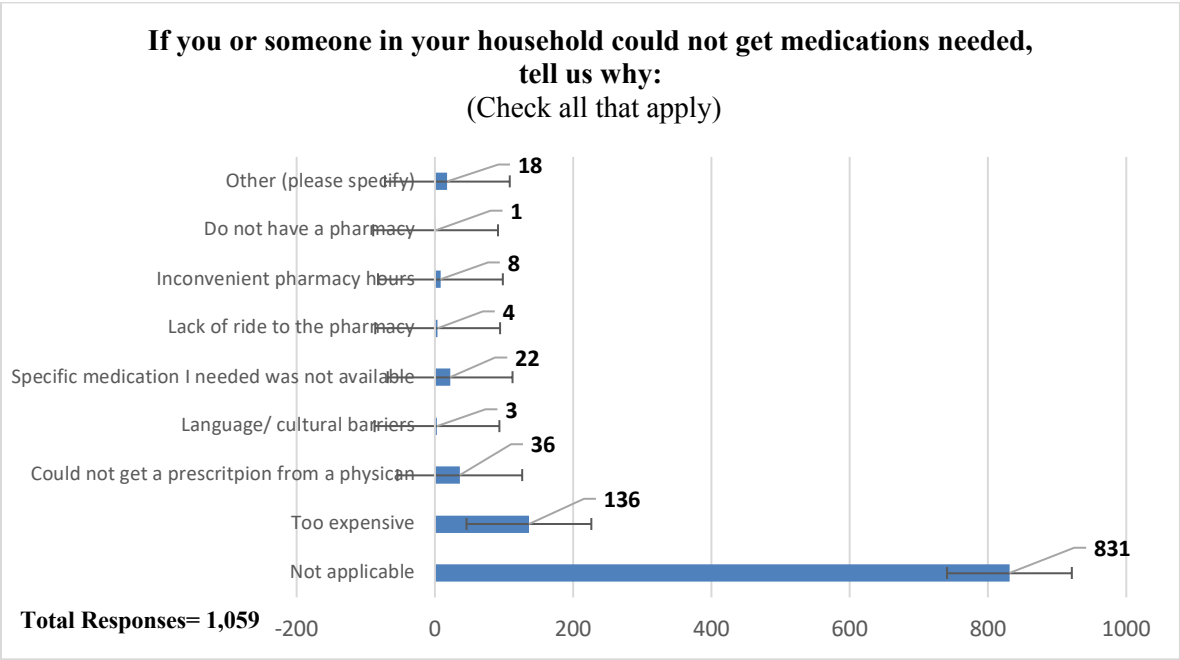

When asked if someone in their household needed to see a mental health professional but could not, 11% of respondents answered “yes.”

### Medications

Twelve (12%) percent of respondents reported that in the past 12 months, they or someone in their household needed medications but could not get them. The primary reason selected was “too expensive” and the secondary reason was the “could not get a prescription from a physician.”

**Wellness**

Preventative healthcare measures, including a routine well-visit, obtaining a flu shot, living a healthy lifestyle and getting screenings for diseases, are essential to fighting morbidity and mortality while reducing healthcare costs.

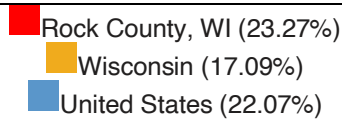

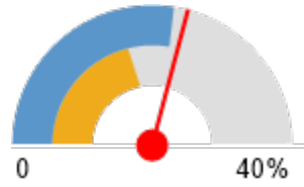

**Frequency of Checkups**

The Centers for Disease Control and Prevention reports that regular health exams and tests can help find problems before they start. These checkups can also help identify problems early, when chances for treatment and cure are better. By getting the appropriate health services, screenings, and treatments, individuals are taking steps to improve their chances for living a longer, healthier life.

**Regular Healthcare Provider**

Research suggests that individuals with a regular or established healthcare provider are more likely to seek preventative care and less likely to use emergency services for care. This saves both resources and funds in the healthcare system overall. This indicator reports the percentage of adults aged 18 and older who self-report that they do not have at least one person who they think of as their personal doctor or health care provider.

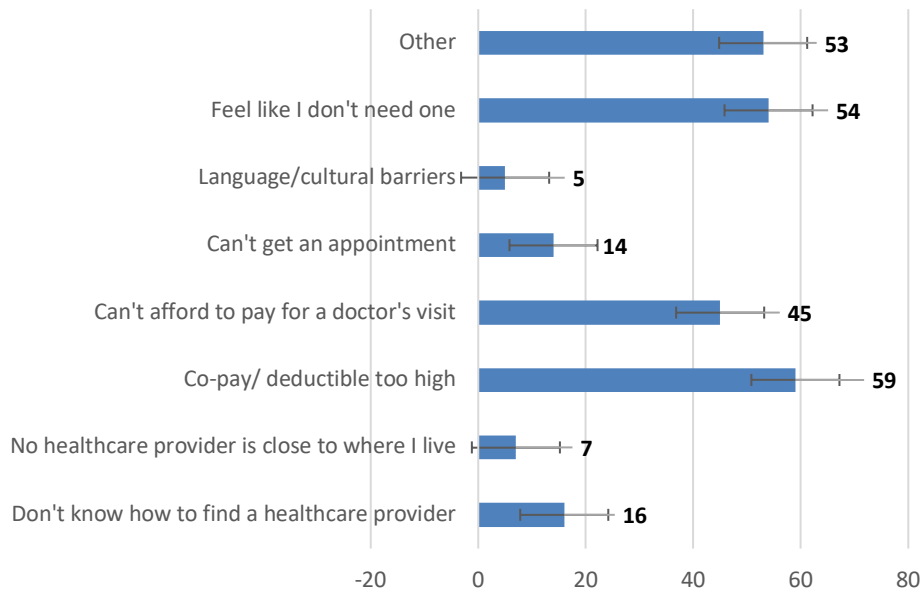

## Percent Adults without a Regular Doctor

Source: Community Commons

Respondents selected “co-pay/deductible too high” and “feel like I don’t need one” as the top reasons they don’t have a primary physician or seek medical care. Access to health care is greatly diminished when residents are uninsured and lack a primary care provider.

### If you don't have a regular healthcare provider (doctor, nurse practitioner, physician's assistant, nurse) tell us why: (Check all that apply)

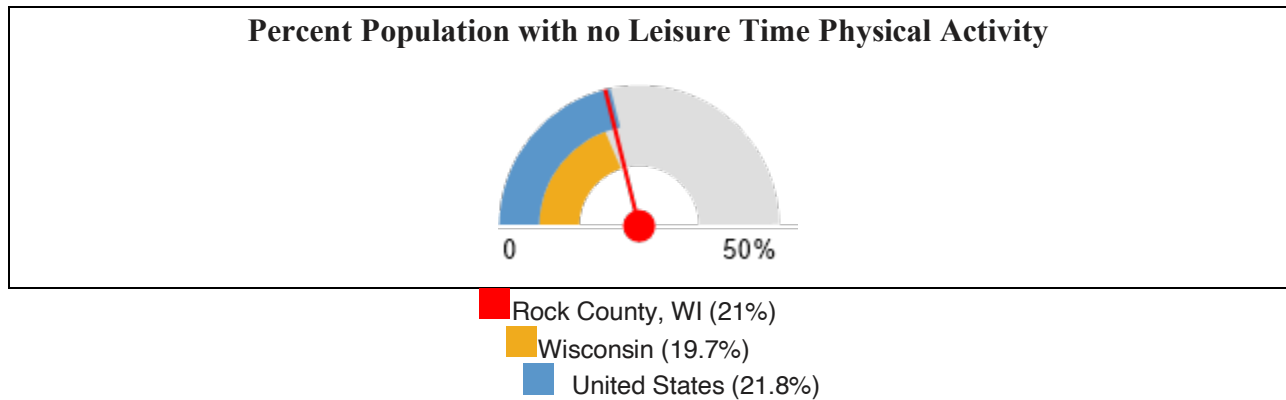

Total Responses= 253

### Physical Activity

Physical inactivity is relevant because current behaviors are determinants of future health and may indicate other significant health issues, such as poor cardiovascular health and obesity. Regular physical activity has been shown to increase emotional, physical and mental well-being.

Fifty-five (55%) percent of survey respondents stated that exercise/fitness was a health concern or problem for them or someone in their household.

Source: Community Commons

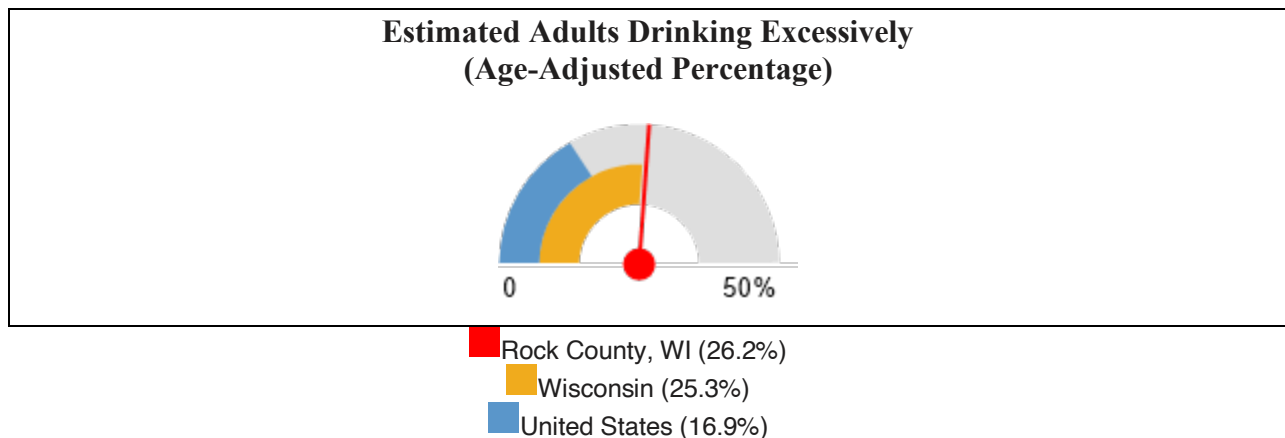

## SYMPTOMS AND PREDICTORS

An analysis of the leading indicators regarding morbidity and mortality must be conducted in order to properly allocate healthcare resources. This allows healthcare organizations to more effectively target affected populations.

### Alcohol Abuse

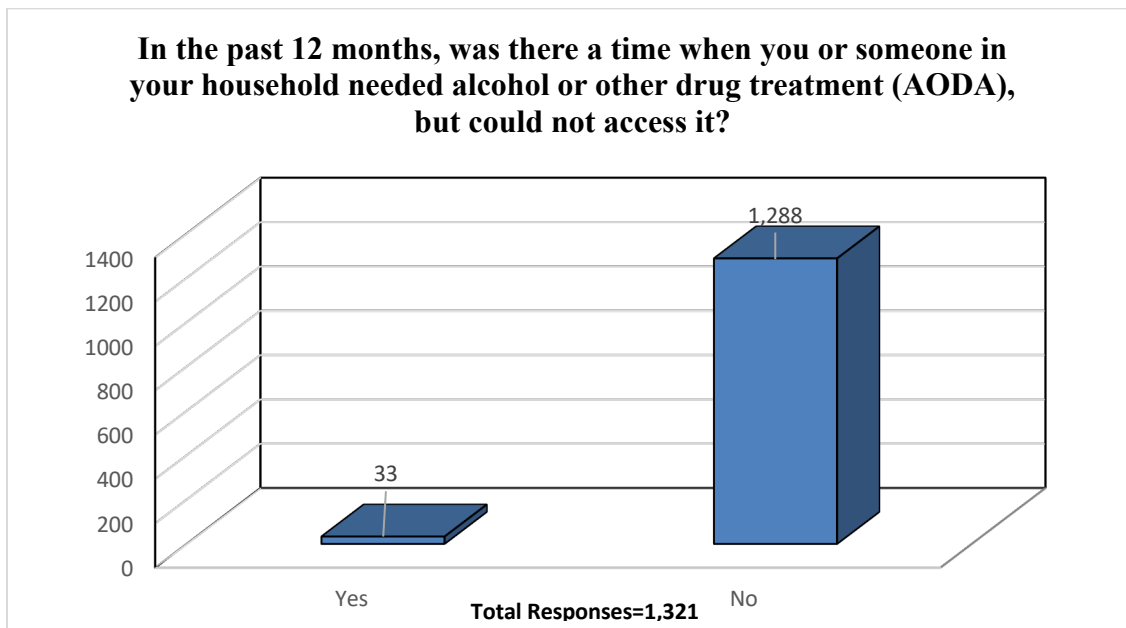

This indicator reports the percentage of adults age 18 and older who self-report heavy alcohol consumption, defined as more than two drinks per day on average for men and one drink per day on average for women. This indicator is relevant because current behaviors are determinants of future health and may indicate a cause of significant health issues such as cirrhosis, cancers and untreated mental and behavioral health needs.

Excessive alcohol used impairs decision-making, often leading to adverse consequences and outcomes. Excessive alcohol use/binge drinking directly contributes to a number of short- and long-term health risks. Short-term health risks include injuries such as automobile accidents, falls and other avoidable bodily injuries. Violence and risky sexual behaviors are also short-term health risks associated with binge drinking. Long-term health risks include cancers, heart disease, high blood pressure, mental health problems, social problems and alcoholism (CDC 2017).

Source: Community Commons

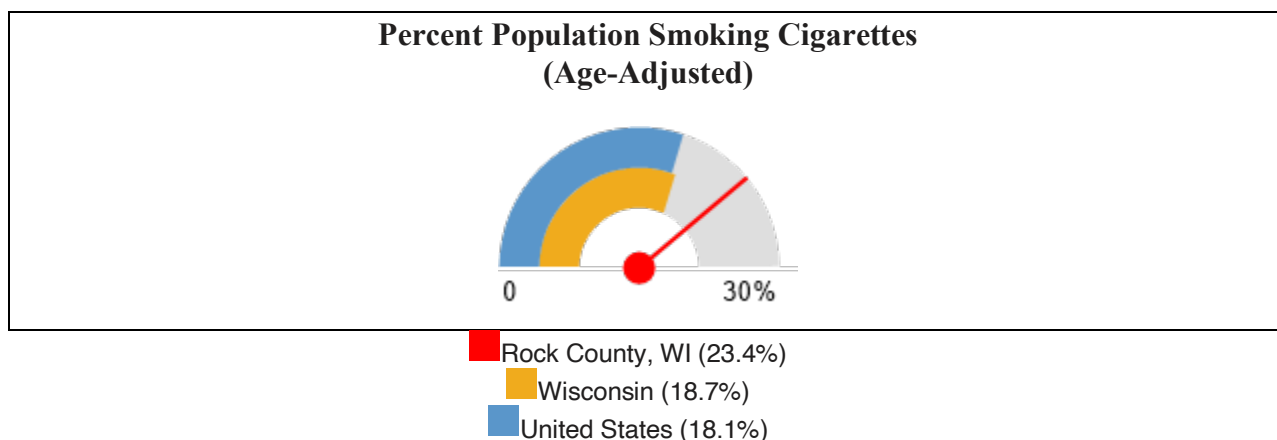

Three (3%) percent of survey respondents reported that in the past 12 months, they or someone in their household needed drug or alcohol treatment but could not access it.

### Tobacco Use

Research suggests tobacco use causes a wide variety of adverse medical conditions. In addition, tobacco use is linked to leading causes of death such as cancer and cardiovascular disease. The CDC reports tobacco use/smoking cigarettes is the leading cause of preventable disease and death in the United States. Although tobacco use continues to decline in the US, it remains high in certain populations. Those at risk for increased exposure to and use of tobacco are those with low levels of education, males, young adults, those living in the South and Midwest, LGBT individuals, individuals living below the poverty level, disabled people and certain races and ethnicities.

Rock County data indicate that 23.4% of the population smoke cigarettes, compared to 18.7% for the State of Wisconsin.

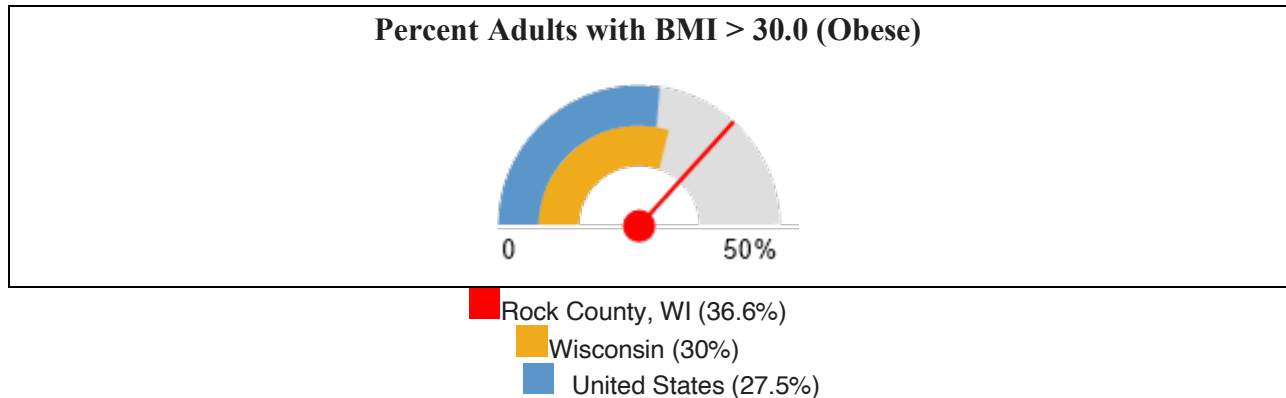

Source: Community Commons

### Overweight and Obesity

Nationally, obesity is a significant problem. Individuals with excess weight may indicate an unhealthy lifestyle and have a greater risk and occurrence of health issues due to the increased stress on their bodies caused by excess weight. Medical costs to treat weight related health issues is staggering and puts a financial crunch on state and federal health care monies.

In Rock County, 36.6% of adults aged 20 and older self-report that they have a Body Mass Index (BMI) greater than 30.0 (obese). This percentage is higher than both the State of Wisconsin and national obesity averages.

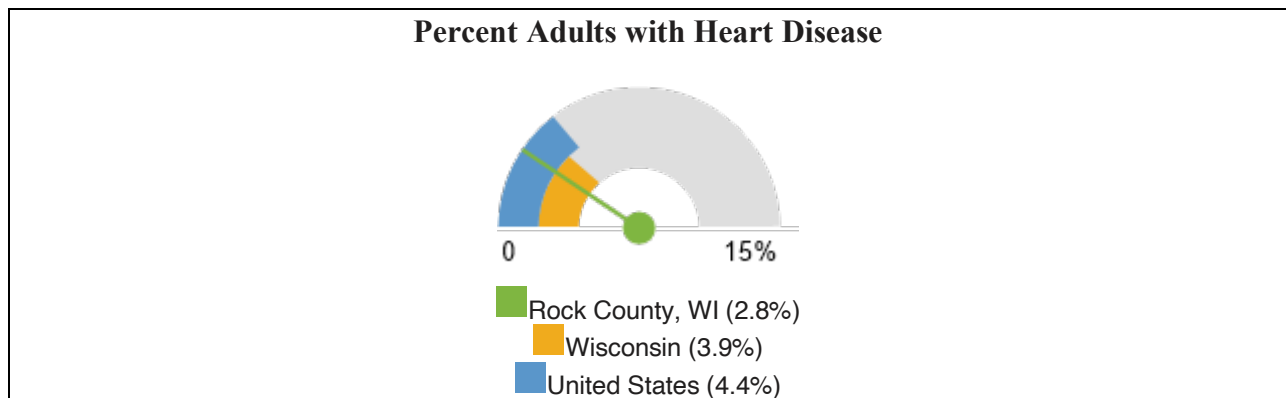

Source: Community Commons

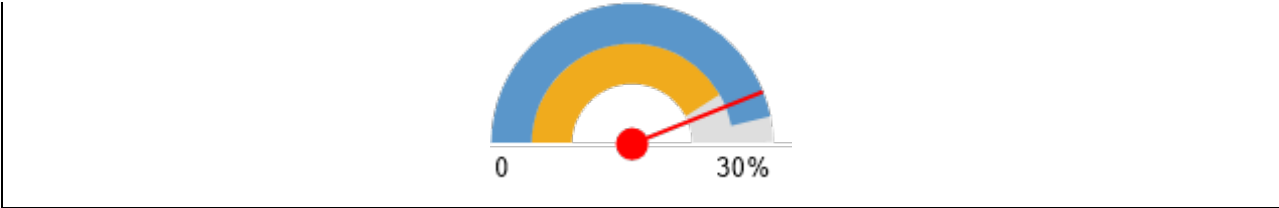

### Predictors of Heart Disease

Cardiovascular disease (CVD) is recognized as the leading cause of death worldwide. Numerous additional health conditions that occur as a consequence of cardiovascular disease, including coronary heart disease, atherosclerosis, cardiac arrhythmias, myocardial infarction, stroke, carotid artery disease and renal dysfunction or failure.

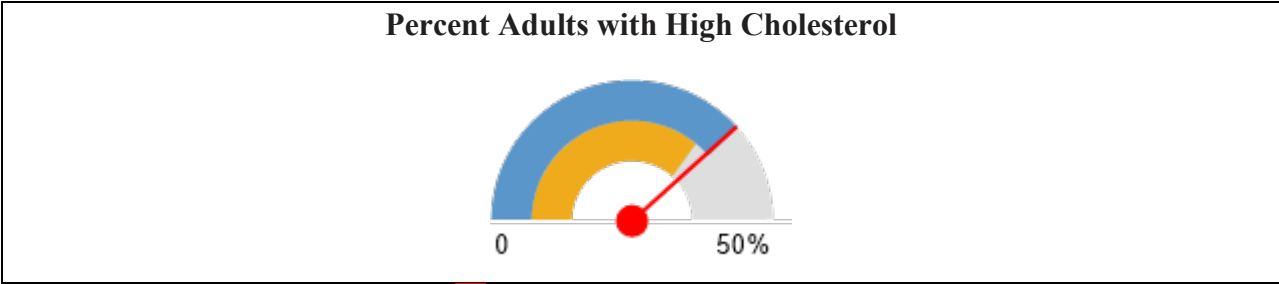

In Rock County, 2.8% percent of adults aged 18 and older have ever been told by a doctor they have coronary heart disease or angina. This indicator is relevant because coronary heart disease is a leading cause of death in the U.S. and is also related to high blood pressure, high cholesterol and heart attacks.

**Percent Adults with High Blood Pressure**

- Rock County, WI (26.4%)
- Wisconsin (25.2%)
- United States (28.16%)

- Rock County, WI (38.32%)
- Wisconsin (36.21%)
- United States (38.52%)

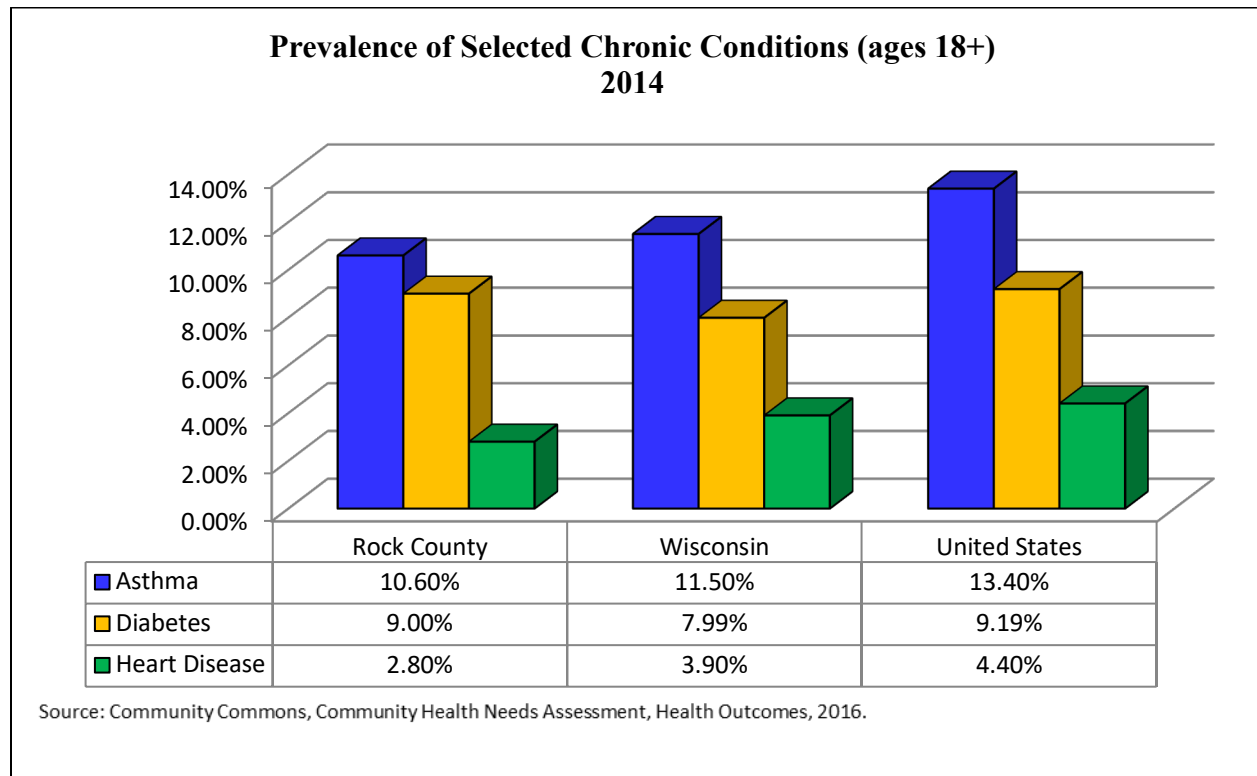

Source: Community Commons

## Diseases/Morbidity

Community Commons reports that measuring morbidity and mortality rates allows for assessment of connections between social determinants of health and outcomes. For example, by comparing the prevalence of certain chronic diseases to indicators in other health categories (e.g., lack of exercise and poor diet) with outcomes (e.g., high rates of diabetes and obesity), a better understanding of community health needs may be addressed.

### Cardiovascular, Respiratory & Diabetes

The majority of cardiovascular, respiratory and diabetes-related illnesses is chronic and requires continuous monitoring. Lack of adequate healthcare for these conditions can lead to recurrent hospital and physician visits, an increase in overall health issues and an increase in healthcare costs.

## Morbidity & Mortality

### Cancer

There are numerous types of cancer, each having their own symptoms, cure rates and methods for treatment. The chart below from the UW School of Medicine and Public Health shows that Rock County residents have higher rates of cancer incidences and mortality than the State of Wisconsin overall.

Rock County Cancer Incidence & Mortality, Major Sites					
	All Sites	Colon & Rectum	Lung & Bronchus	Female Breast	Prostate
<b>Incidence</b>					
Cases	4095	412	636	509	474
Rate	<b>499.0*</b>	50.5	<b>77.4*</b>	115.9	<b>124.7*</b>
State rate	473.3	47.6	63.3	121.7	148.2
<b>Mortality</b>					
Deaths	1614	129	507	121	78
Rate	<b>196.1*</b>	15.5	<b>61.9*</b>	26.5	24.9
State rate	182	16.5	48.5	22.6	27.1

\*significantly different from state rate

Source: UW School of Medicine and Public Health

Presenting data that focuses on causes of morbidity and mortality provides an opportunity to define and quantify which diseases are causing the most deaths. Cancer is the leading cause of death, followed by diseases of the heart, unintentional injuries, cerebrovascular diseases and respiratory disease.

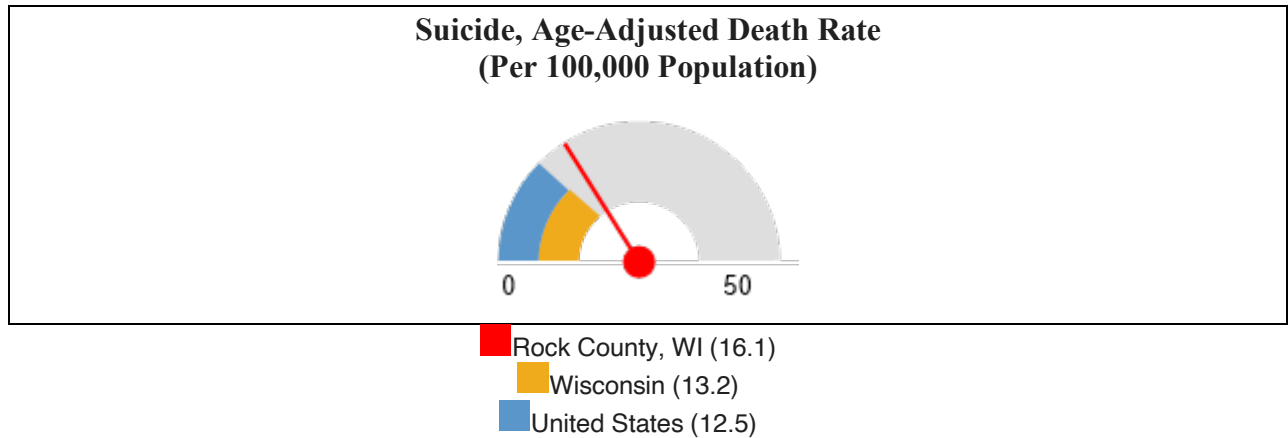

Cause of Death Rock County	Crude Rate
Cancer	207.5
Heart Disease	193.3
Accidents (unintentional injuries)	59.5
Cerebrovascular Diseases	53.9
COPD	51.4
Alzheimer's Disease	42.7
Diabetes Mellitus	26.6
Intentional Self-harm	18.6
Influenza & pneumonia	15.5

Note: Crude Rate = Count / Population \* 100,000

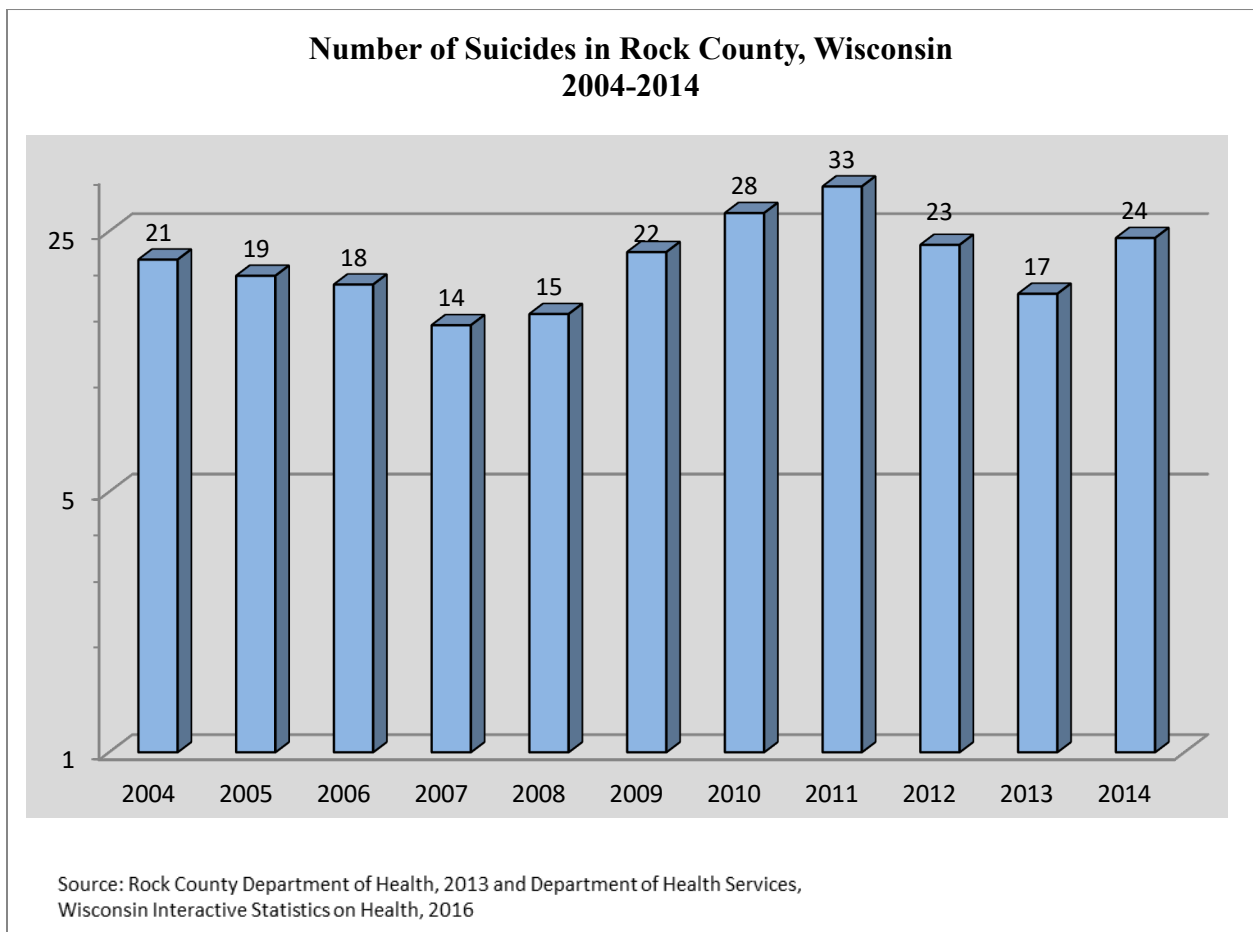

Source: Centers for Disease Control and Prevention, National Center for Health Statistics, Underlying Cause of Death 1999-2015 on CDC WONDER online database.

### Suicides

This indicator is relevant because suicide is an indicator of poor mental health. The age-adjusted suicide rate is higher in Rock County than both the State of Wisconsin and the U.S.

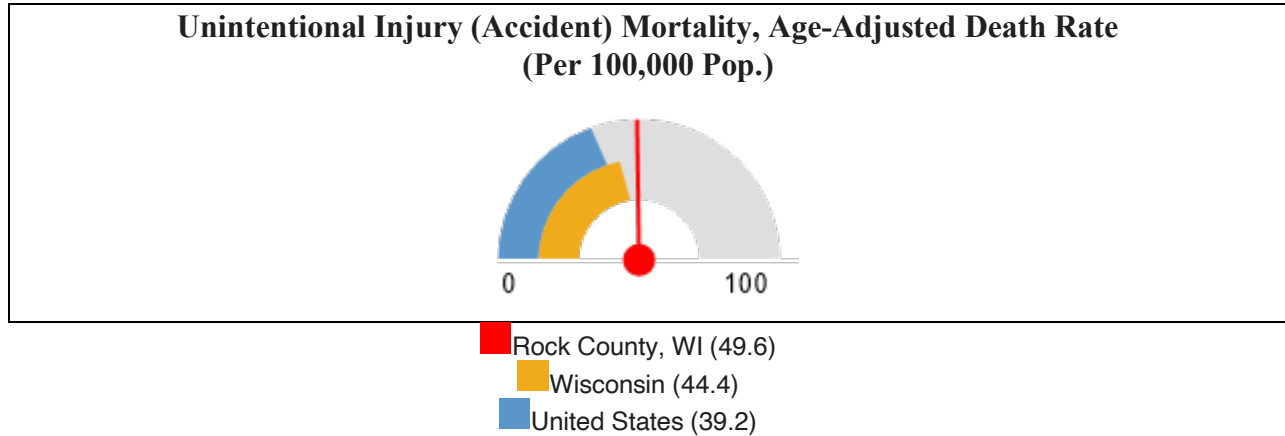

Source: Community Commons

### Unintentional Injury

This indicator is relevant because accidents are a leading cause of death in the United States, and the 3<sup>rd</sup> leading cause of death in Rock County. Rock County reports a higher incidence of unintentional injuries than both the State of Wisconsin and the U.S.

Source: Community Commons

### Hospitalizations

According to the Wisconsin DHS, the hospitalization rate for Rock County is 111.9 per 1000 persons, higher than both the State average (104.1 per 1000) and national average (104 per 1000). Leading causes for hospitalizations, excluding childbirth, include injuries (1537 cases), psychiatric conditions (1154 cases), coronary heart disease (571 cases), cancer (531 cases) and pneumonia and influenza (527 cases). Coronary heart disease and cancer have the highest average cost, while injury-related accidents and coronary heart disease have the highest cost (charge) per capita.

<b>Average Charges for Selected Diseases in Rock County, Wisconsin, 2014</b>			
<b>Disease</b>	<b>Average Charge</b>		<b>Hospitalization Charge per Capita</b>
Injury-Related	\$	46,530	\$ 446
Coronary Heart Disease	\$	79,462	\$ 283
Cancers	\$	59,955	\$ 198
Cerebrovascular Disease	\$	45,830	\$ 111
Pneumonia & Influenza	\$	27,427	\$ 90
Diabetes	\$	29,272	\$ 49

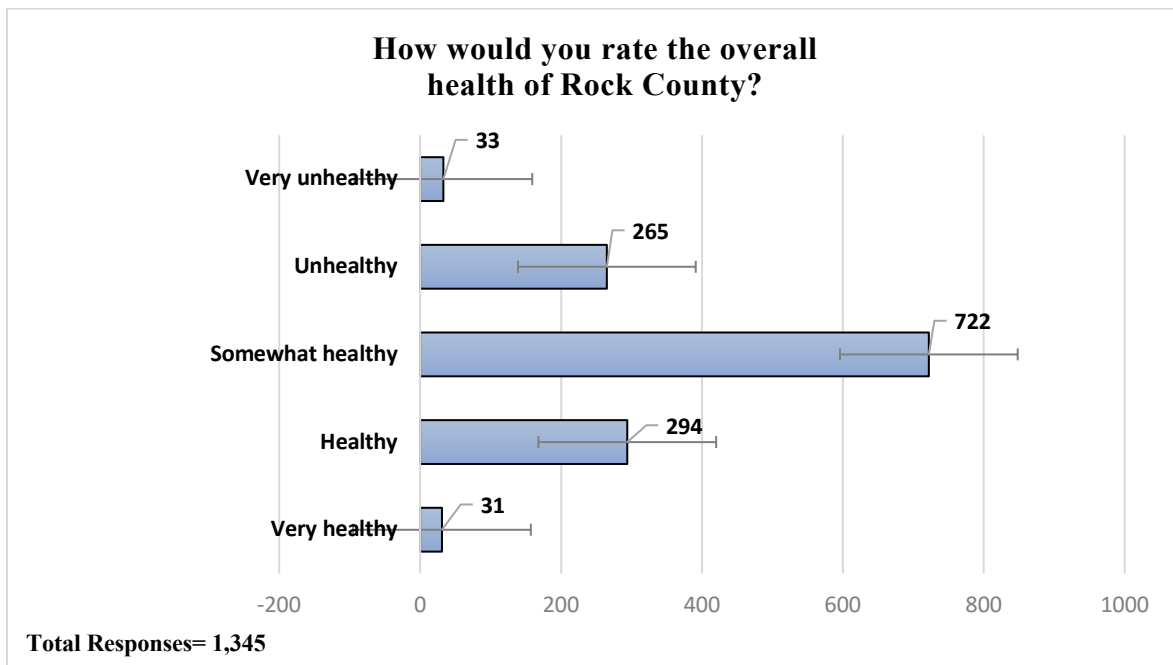

Source: Wisconsin Department of Health Services, Rock County Profile, 2016

## Prioritization of Health-Related Issues

The purpose and importance of this Community Health Needs Assessment is to identify the most critical health related needs in Rock County. To identify these needs, we must collect and consider community perceptions of health issues, unhealthy behaviors and issues relating to well-being. By combining community perception with the data outlined previously in this assessment, and taking community resources into account, we can prioritize the most important health concerns in the community.

## Perceptions of Health Issues

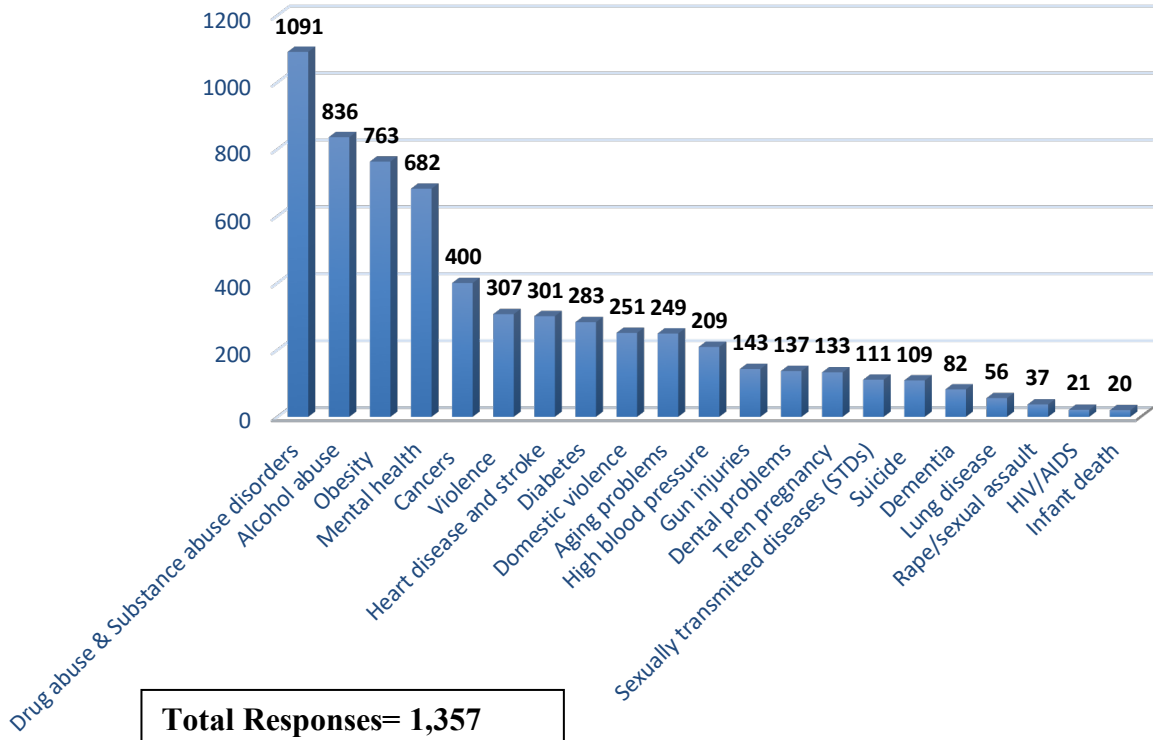

Survey participants were asked to rate the overall health of Rock County. Based on survey responses, 53.7% rated Rock County as “somewhat healthy,” while 21.9% rated the county as “healthy.”

The CHNA also asked survey participants, “What do you think are the five factors that make a healthy community?” Access to healthcare was the primary answer chosen by 67% of respondents. Low crime/safe neighborhoods, good schools, good jobs and a healthy economy and healthy behaviors and lifestyles followed closely.

Community perceptions of health problems may vary greatly from the actual health issues in the area. The CHNA survey asked participants to choose the top five health problems in their community based on a list of 21 options. Survey participant’s ranked drug and alcohol abuse as the top health problem, with obesity and mental health issues following closely.

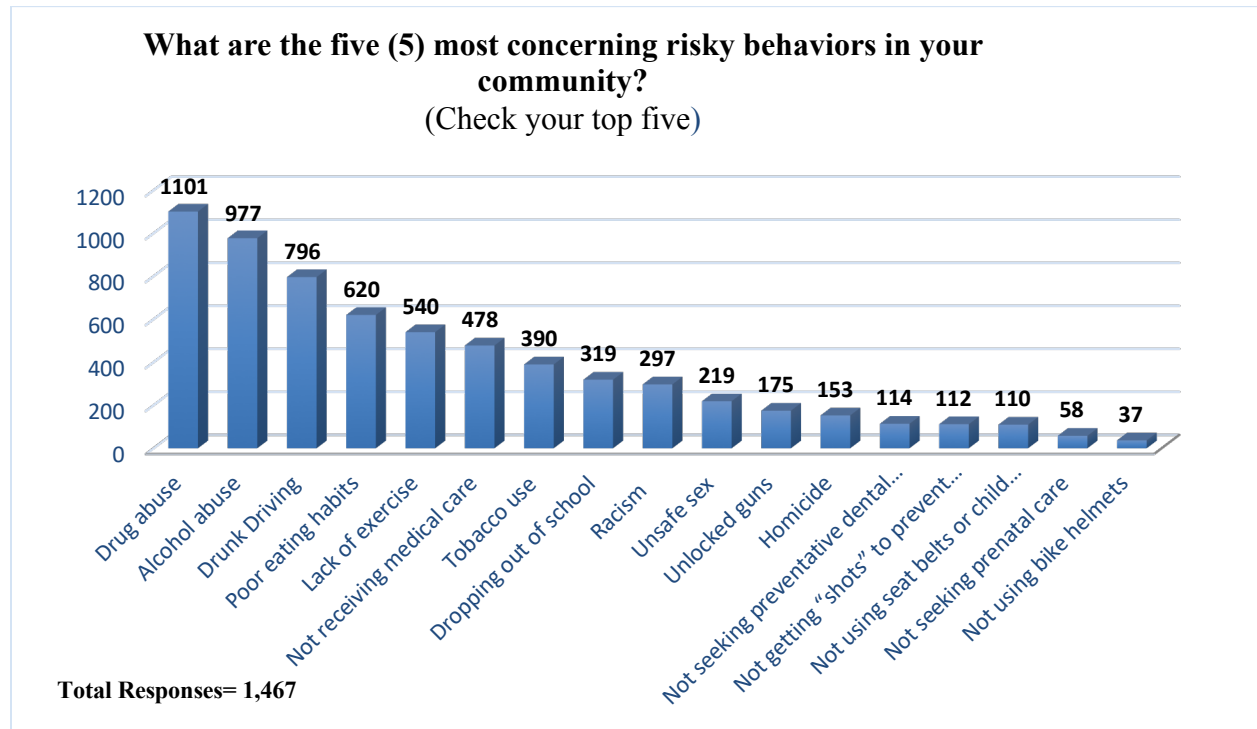

**What are the top five (5) health problems in your community?**  
 (Check your top five)

### Perceptions of Unhealthy Behaviors

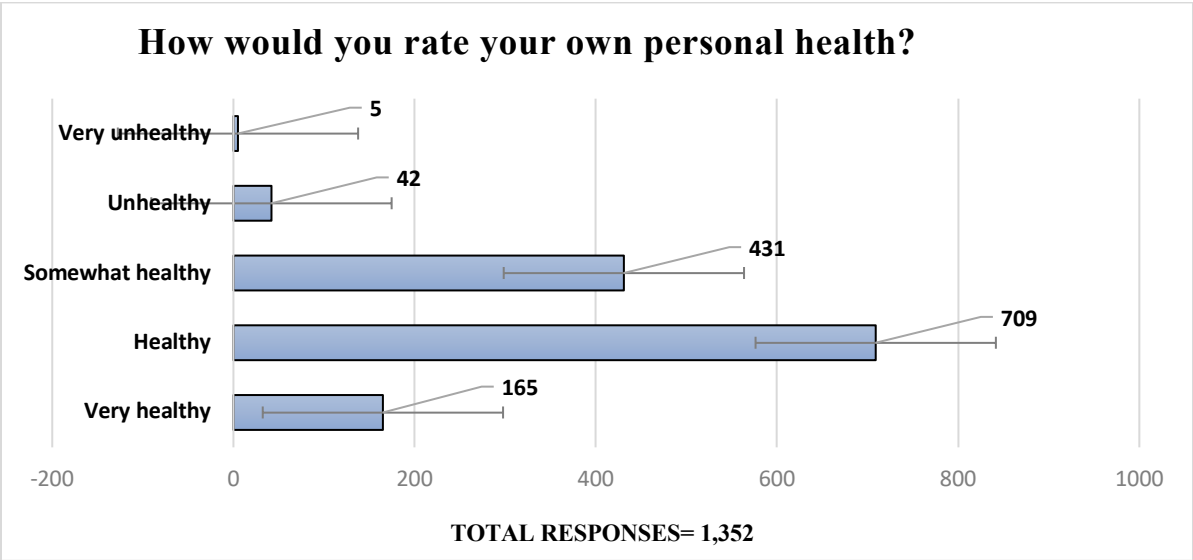

Respondents were asked to choose the top five most concerning risky behaviors in Rock County. They were given a list with 17 choices. Drug abuse was ranked number one, closely followed by alcohol abuse. Drunk driving, poor eating habits and lack of exercise rounded out the top five risky behaviors.

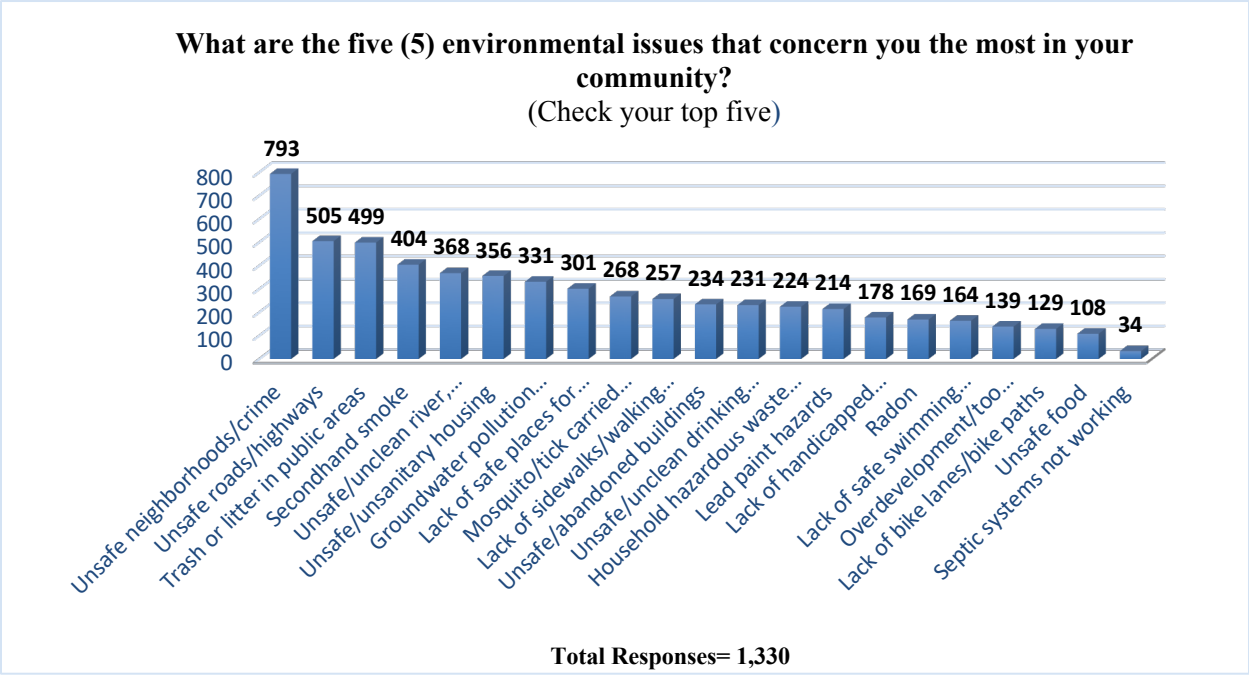

### Perceptions of Personal Health and Community Well-Being

Residing in a safe community with adequate housing, food and health care resources plays a large role in personal and community well-being. Survey participants were asked questions regarding their perceptions of personal health, household concerns and community environment.

Participants were asked, “How would you rate your own personal health?” Over half (52%) of the survey participants chose “healthy” while 32% chose “somewhat healthy.”

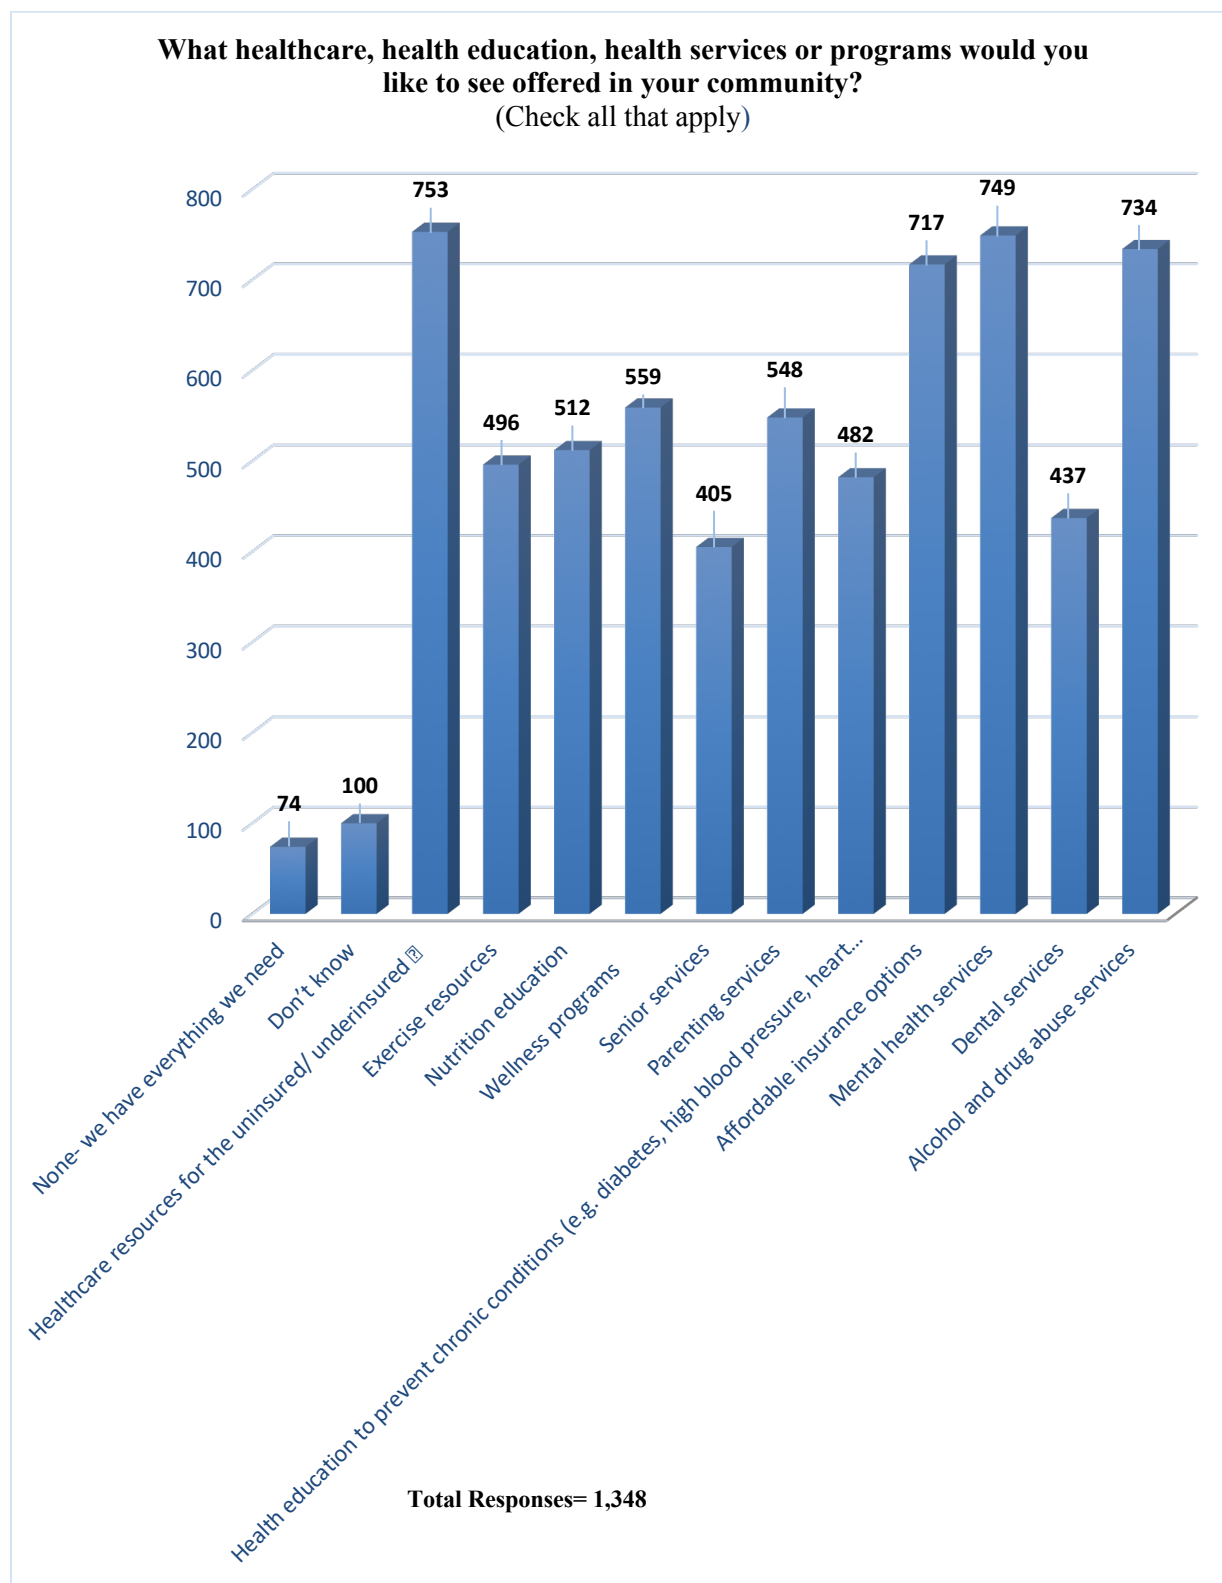

Participants were asked about household health problems and concerns. Their top five concerns were unsafe neighborhoods/crime, unsafe roads/highways, trash in public areas, secondhand smoke and unsafe/unclean river, creek and lake water.

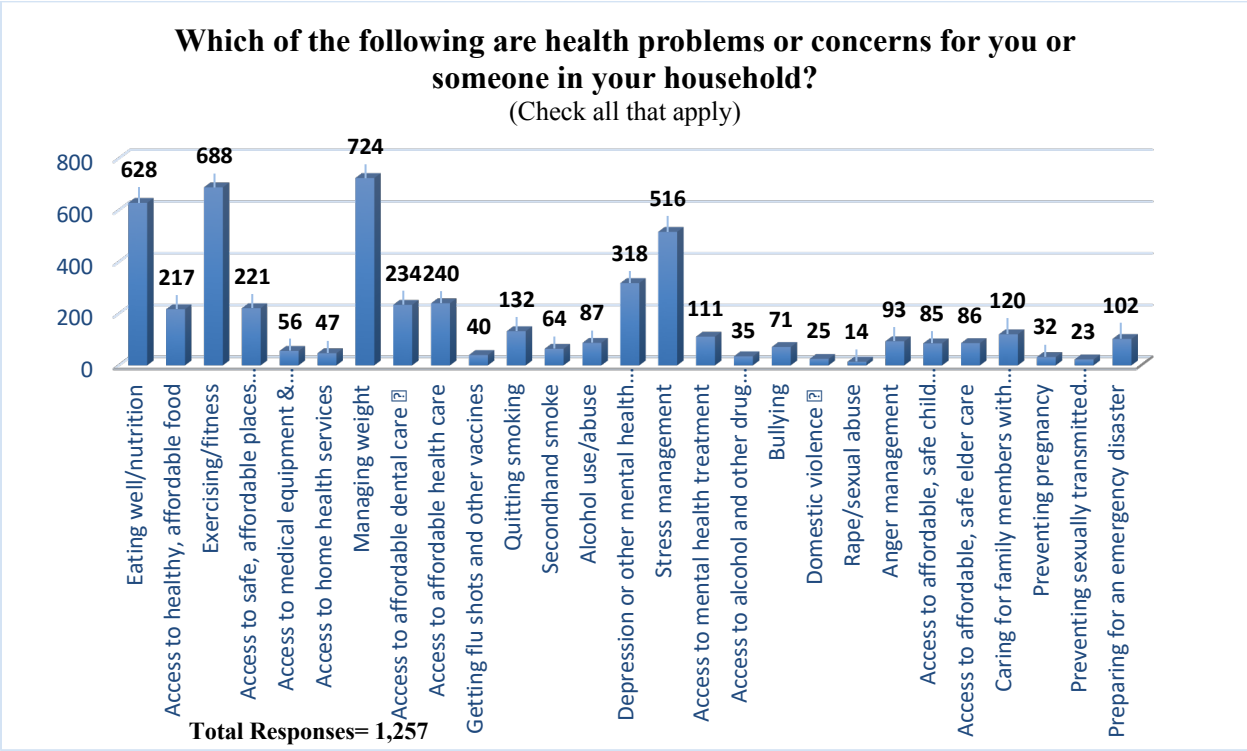

Participants were asked what health education, program or services they would like to see offered in Rock County. Respondents' top concerns was healthcare resources for the under- and

uninsured, mental health services, alcohol and drug abuse services, wellness programs, parenting services and nutrition education.

Participants were asked what were the health concerns or problems for them or someone in their household. Out of 27 options, respondents' top concerns were managing their weight, exercising/fitness, eating well/nutrition, depression or other mental health concerns and access to affordable health and dental care.

**Community Leader Health Perceptions**

Key informant interviews were conducted representing the broad interests of the Rock County community (Appendix D). These community experts, with their particular knowledge and understanding, can provide insight on health needs and give recommendations for solutions. The interviews included 12 public health officials and subject matter experts, local law enforcement, and school and religious leaders. Subjective questions asked were related to general community issues and concerns, issues in the community that promote poor health, issues related to health care access and perceptions of local community health care.

Answers varied based on the participant’s occupation/role in the community. Issues identified were lack of mental health services, access to care, dental care, poverty, geriatric services, obesity and drug abuse.

## **Summary of Key Findings - Community Health Issues**

A thorough analysis of the data in this document was used to identify the most important health-related issues in the community.

- Compared to state of Wisconsin statistics, Rock County has a greater proportion of residents who use tobacco and engage in excessive drinking.
- The portion of Rock County residents with diabetes is larger than that of the State of Wisconsin.
- Rock County residents have higher rates of cancer incidence and mortality rates than the State of Wisconsin overall.
- The portion of Rock County residents with a BMI of >30.0, or obesity, is greater than both the state and national rates.
- Fewer Rock County residents have health insurance than the State of Wisconsin overall.
- The ratio of mental health providers by 100,000 population is much lower in Rock County than the State of Wisconsin overall.
- Poverty and unemployment in Rock County continue to exceed the state average.

## **Prioritization**

Mercyhealth reviewed and prioritized the health needs of the Rock County community. They are as follows:

1. Access to healthcare services
2. Prevention – General Wellness
3. Poverty
4. Alcohol & Drug Use/Abuse
5. Obesity & Nutrition
6. Prevention – Diabetes

All significant health needs identified above are addressed in the Implementation Plan for the CHNA, which details how MHTC intends to respond to these needs over the next three years (Appendix A). The Implementation Plan in Appendix A was approved by the Mercyhealth Board of Directors in June 2017. Appendix B details actions related to the 2014-2017 Implementation Plan.

# Appendix A

## Mercyhealth Hospital and Trauma Center 2017-2020 Implementation Plan

MERCYHEALTH ROCK COUNTY  
COMMUNITY BENEFIT PLAN  
2017-2020 IMPLEMENTATION PLAN

Strategic Objective: Based on priorities established by an in-depth study conducted in and about Rock County, Mercyhealth will develop and implement a multifaceted community benefit plan to improve the overall health and well-being of residents in the primary service area.

## Appendix C

### Characteristics of Survey Respondents

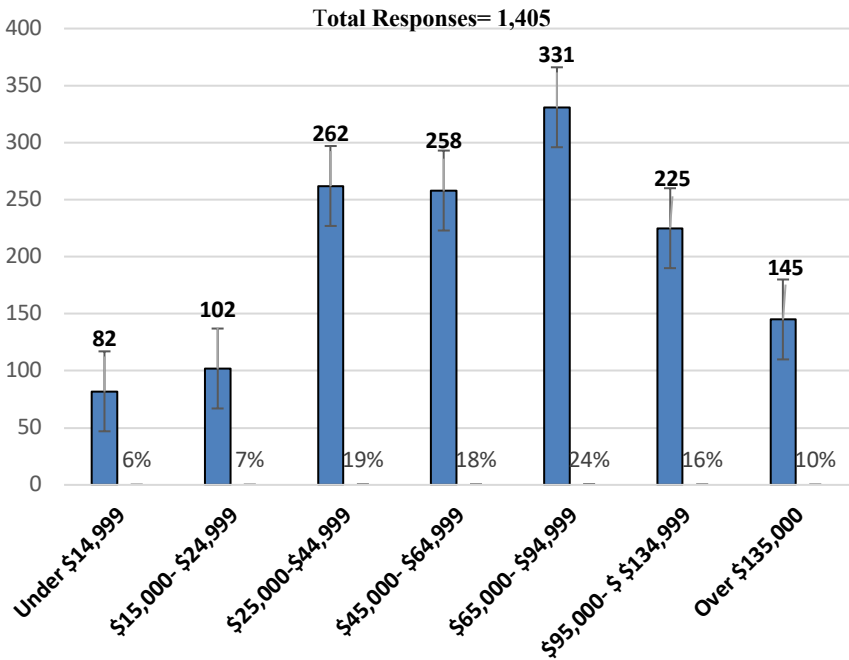

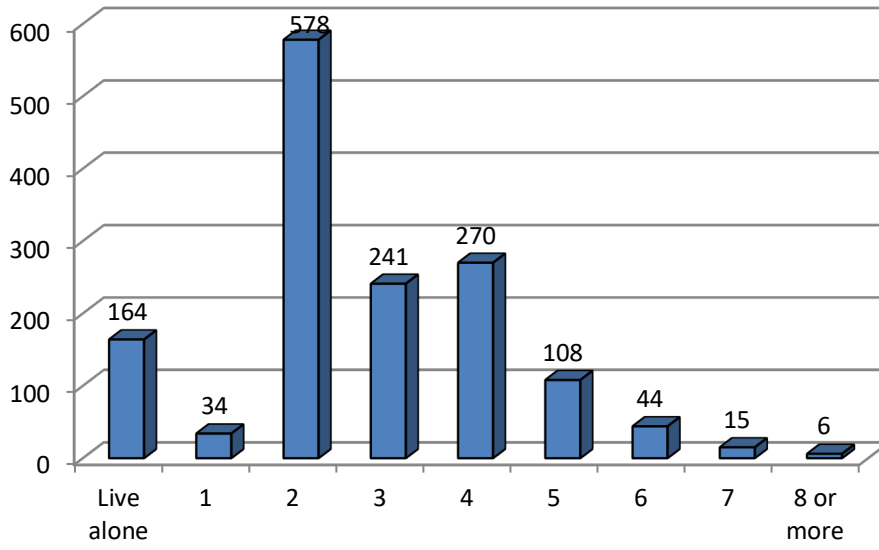

### What is your current employment status?

### What is your annual household income?

### How many people live in your household?

**Total Responses= 1,460**

# Appendix D

## Key Informant #1

### 1. How have you seen Rock County change?

- County leadership more supportive of the work related to trails in Rock County. They have a better understanding of the impact of having safe trails in the community.
- Poverty increase, directly related to closing of the GM plant. Economy is coming back.
- Aging population – much higher concern
- Families living apart. Children are not around the area to support aging parents.

### 2. What are the concerns?

- Aging population- services for elderly
- Navigating elderly care options – especially for children/family that do not live in the same community as their parents. Lack of support for understanding elder care.
- Women and children’s services.
- Green spaces/trails
- Mental health of the population.

### 3. Why are you concerned?

- Personal connection
- Personal experience – a part of the league of women voters.
- Interest in community – moved here in early 80’s for husband’s job, raised 2 children in Janesville.
- Believes when women are successful in the community it makes the community stronger
- Believes strongly that when people spend time in nature they have better overall health (physical & mental)

### 4. Why is this important to you?

- Interest in community
- Believes when women are successful in the community it makes the community stronger
- Believes strongly that when people spend time in nature they have better overall health (physical & mental)

## **Key Informant #2**

### **1. How have you seen Rock County change?**

- Lived in Janesville for 52 years
- Walk the fourth ward neighborhood to school every day, pleasant neighborhood filled with friendly older folks. As the older generation died, more of the fourth ward houses were rented out and not taken care of.
- Crime and drug dealing become a part of childhood neighborhood. Factories closed which resulted in hard economic times, Families moved out to find jobs other places.
- Heroin has taken over the city and increased crime.
- More people moving here from Chicago have not found housing so the homeless numbers have been increasing.
- Medical community flourished and more jobs coming to Rock County through a new hospital and clinics.
- Rock County is a caring community to offer donations and services to those in poverty
- Children act out in class more and more with untreated trauma.
- Witnessed drug treatment and mental health centers close, recovery schools close, school district become more reactive and no longer focus on prevention curriculum.
- Watched businesses move out to Milton Ave. and the downtown become vacant. (Which they are trying to revitalize now)

### **2. What do you feel are Rock County's assets for the community?**

- Strong medical communities (Mercy, Dean)
- Strong prevention groups working to address a variety of topics
- Good school districts
- New businesses moving into the area (Dollar General, Shine Medical)
- Downtown revitalization plans (Janesville)
- Strong Police departments (looking to try new programs and initiatives)
- Rich farmland
- Caring people who will pull together when they need to

### **3. What are the concerns?**

- Increase drug use (RX, opioids)
- Lack of AODA treatment facilities (adult and adolescent)
- Lack of affordable housing
- Lack of emergency homeless shelters (especially for pregnant or parenting teens)
- Lack of prevention curriculum in schools (no more health classes in Janesville high schools)

### **4. Why is this important to you?**

- I was an addiction counselor for years
- Rock County used to have pretty good AODA treatment with Parkside Lodge adult treatment in Janesville and Parkside Lodge adolescent addiction treatment facilities in Edgerton. These were intensive outpatient and inpatient units who kept patients for 30 days and another 6 months of aftercare. Mercy bought Parkside and the addiction units (both adult and adolescent moved to the main hospital in Janesville). After 5 years, Mercy decided to close the addictions units. Then sent adolescents to Rockford (Rosecrance) for inpatient treatment and adults were detoxed at the hospital and then sent to day groups on the psych unit.
- Only addiction counselor for over 10,000 students from 1999 to 2012
- Worked hard to put AODA prevention programs in place at all levels and had a 42 page long term AODA plan for the schools and community.
- Opened a recovery high school for teens, wrote a marijuana curriculum.
- Due to lack of funding the school district of Janesville ended her position and closed the CRES recovery school. Many of the prevention programs she started ended. Now, Janesville doesn't even have high school

health classes. The district has become more reactive and is currently seeing an increase in behavior issues at all levels.

- Currently, the homeless liaison for Janesville schools sees families working but still can't afford to pay rent and all of their bills. When they are able to find housing, they have very few affordable options.
- Homeless shelters have long waiting lists and some nights these families have no place to go, so they sleep in their cars.
- Currently has over 140 unaccompanied teenagers and over 400 students identified as homeless right now which is a front row seat to despair.

## **Key Informant #3**

### **1. In your time living in Rock County how have you seen it change?**

- He has seen it become a more aggressive, violent community. Dealing with more urban problems such as drug abuse, gang violence, severe mental health problems, etc.

### **2. What are your concerns about health in the community as a Rock County resident?**

- We are becoming unhealthier – he sees more unmanaged health issues, such as obesity, drug abuse and mental health. Unfortunately, there does not seem to be resources to help those affected. No access, no services.

### **3. Why are these health issues important to you?**

- Things like drug use are tearing families apart – not just at-risk – drug addiction can affect even those who have the best parenting, etc. Gave example of close friends who have a teenager addicted to heroin. Dad is a cop and mom is a HR professional – very involved parents and have taken every step to help him including treatment facilities across the country – nothing has worked. The family is financially and emotionally broken. Services are hard to find and very costly.
- He also feels like drug use, mental health and obesity are a gateway for several other health issues, he feels like if we can make some progress on those areas the health of the community will improve.

### **4. What are the assets in the community?**

- He likes Rock County because of the schools and recreational facilities (parks, trails, fitness facilities) although he said that he wished more people would take advantage of all the county has to offer. Rock County has everything he needs and his entire family lives here. Rock County is also in a nice geographic region – close to bigger cities such as Madison, Milwaukee and Chicago.

## Key Informant #4

### 1. How have you seen Rock County change?

- We have a more sophisticated population than we have had before—education and technology have helped in the community over the last 40 years since I got here.

### 2. What are the concerns?

- Dental care is a concern because it leads to other health issues. People don't get it because they can't afford it and don't have dental insurance. A lot of patients end up in the ED because they have dental pain and haven't been able to get care at a dentist until it gets really bad.
- There is a need for more health education for upper respiratory infections and knowing the warning signs. We have a lot of nervous parents show up in the ED for regular, benign things. It's fine to be cautious, but with more education, they could usually keep them home and treat them there. That leads to excess utilization and costs.
- Access to care is still a need. You can over-saturate a market if you're not careful, but we're not at that point yet. Most patients who end up in the Urgent Care say they tried to call their primary first, but their schedule was full.
- Mental health is a big need—access to therapy in particular for various mental health diagnoses. There is a big demand for addiction treatment. One thing that complicates this is that some patients get dismissed from certain mental health practices because of no-shows. The practices have to do that because of the access need—they can't keep holding spots for people who don't show up because there are so many more people who need those spots. It's tricky because the specialty (psychiatry) is sorely needed, but it doesn't pay enough to attract a lot of candidates. We can use therapists for quite a bit though, so we do that as much as we can. Medicine has shifted to include a lot of counseling rather than just science. Many patients don't have extended family and a support system to help them, so the medical field ends up filling that gap. That further exacerbates the access problem, and many docs weren't necessarily trained for that.
- The cost of day care is also a concern for working parents; it eats into their wages and takes up funds that could have been used for health care, groceries, or other needs.
- Coordination of social services is hugely important—people need help navigating these problems and often don't know what resources are available to them.

## **Key Informant #5**

### **1. How have you see Rock County change?**

- Overall, things have been fairly steady
- Health Rankings have not changed much over time
- Economically, Rock County is back to where it was before some plant closures
- There has been some growth in the county
- Interaction between cities seems to have improved
- Demographics are changing and may require us to update how we communicate with the population
- Water quality issues, radon, alcohol consumption all seem to be standard issues.

### **2. What do you feel are Rock County's strengths or weaknesses?**

- Strength: A good deal of attention is paid to health issues. (An appropriate level.)
- Strength: Rock County has an attentive press/media. There has been an increasing focus on health education and exposure to health issues.
- Strength: Good partnerships within the county – HEAR, Clean Sweeps with local government participation.
- Weakness: Resource limitation and competing priorities – trying to balance prevention and emergency preparedness.

### **3. What do you feel are opportunities or challenges for Rock County?**

- Opportunity: Changing to a more population-based and health promotion based approach.
- Challenge: Getting buy-in for population-based approaches. Changing the culture.

### **4. Why do you think the above-referenced strengths, weaknesses, opportunities or challenges are important?**

- Limited resources will always be a challenge.
- Our efforts should be directed toward how we can have a greater impact.
- Prioritization and focus are going to be important.

## **Key Informant #6**

### **1. How have you see Rock County change?**

- Reflected back on the 2006 merger of the Beloit and Rock County Public Health Departments. She felt that the merger allowed the combined public health agency to expand and offer more programs and services.
- She felt that there had been some cultural changes in the County. Historically, the County had been well employed and blue collar. Some areas (rural) had been set apart.
- She felt that there more possibilities now and that the County was less compartmentalized and more cohesive.

### **2. What do you feel are Rock County’s strengths or weaknesses?**

- She felt that Rock County was much stronger now. In the past, there were divisions between rural and urban, between Beloit and Janesville. . Now we are working more as one county with one voice.

### **3. What do you feel are opportunities or challenges for Rock County?**

- There are more clinics and hospitals in Rock County now.
- In the past, there were a high number of child deaths. Infant mortality and disparities were and continue to be important.
- We’re starting to make a large effort to address health concerns.

### **4. Why do you think the above-referenced strengths, weaknesses, opportunities or challenges are important?**

- She was really excited about the new committee on nitrates.
- There is more openness and learning about things of which many were previously unaware.
- Day to day responsibilities – such as food safety – remain.

### **5. Do you have any specific thoughts or suggestions regarding the future health of those who live, work, play and/or grow in Rock County?**

- She was very optimistic about health in Rock County.
- She liked the new emphasis on health education.
- She felt that the public health department and the Board of Health were growing and learning. It was uplifting.
- She added that in Rock County, we’re still nice to everybody.

## Key Informant #7

### 1. How have you seen Rock County change?

- It seems that budgets have been cut for a lot of programs and schools, and services have been moved around in recent years.
- Alcohol seemed to be a bigger problem 10 years ago, but now it's more about drug use than alcohol—heroin and synthetic marijuana which has led to brain injuries. It's a younger group with drugs too—those in their 20s and 30s.
- Smoking has dropped, but the intergenerational issues of substance abuse seem to be a trend.

### 2. What are the concerns?

- Quick, urgent access to mental health services is a concern; it's just hard to find. Adding mental health providers to the whole continuum is a significant need.
- Access to dental care for children is also a major need.
- We sometimes have elderly patients in the hospital who have dementia that results in behavioral issues while they're here—hitting and kicking staff, etc. It's not considered a “mental illness” so Crisis/County won't take them, so we have to try to find guardians or custodians for them. The dementia population has very few resources.
- Dementia, drugs, alcohol, and mental health are some of the biggest concerns we see in the ED and hospital.
- Living arrangements for those with complex needs can be a barrier. With alcohol abuse and self-harm, they need continuous social support in the community—social work in the home, medication management, etc. The very poor and chronically ill have access to this, but the middle tier doesn't.
- Social work is insufficient in the community. We could also use more Registered Nurses to oversee cases (i.e. case-manage more people).
- As far as chronic conditions go, diabetes, COPD, and wound care are big ones. We have started with the high utilizers and are going from there—we try to go into their home and assess it.
- Education has worked well with medically complex patients, but not those with psychological issues. We let them know what the appropriate level of care is (when to come to the ED vs. the clinic, etc.). We help them navigate what they're missing. We determine what work needs to be done by someone other than an RN.

## **Key Informant #8**

### **1. How have you seen Rock County change?**

- New to Rock County- here about 2 years
- Lots of opportunity for public health
- Business community had/have not been tap into as a resource for public health.
- County can be used as a leverage to impact public health
- Economy
  - closing of GM had a major impact on the overall economy and health of Rock county
  - started to get better when started the position (2015)
- Immunization rates (due to vouches)
  - still a lot of work to be done
- Community has more of a stake/involvement
- County has seen the benefits of Health Educators- promoting prevention

### **2. What are the concerns?**

- Awareness and maintenance of services
- Make people aware of services and make is a priority in their everyday life
- Train people to have a medial home (dental, mental, physical), to lower the burden of ER visits.
- Make services easy to access- healthy eating/active living.
- View health as wellness (preventing ) vs disease management (reacting)
- Community needs to take responsibility – we (gov. medical, etc.) cannot do give/do everything.

### **3. Moving forward, what is more important?**

- Find community champions
- Find people in the community that make the difference and use them
- Improve health by viewing prevention vs disease
- Use more than just the health care systems in public health

## **Key Informant #9**

### **1. How have you seen Rock County change?**

- I have seen an increased use of technology within hospitals and doctors' offices. You are encouraged to go to urgent care over emergency rooms.

### **2. What are the concerns?**

- My concern is that I used to be able to call the hospital/emergency room to ask questions. Just very general questions and they can't answer anything. Very frustrating, bad customer service.
- I also have a concern when it comes to how quick you get dismissed from hospitals before you are ready to leave. They want to admit you at the last minute and discharge you at the earliest moment.

### **3. Why are you concerned with this?**

- Being dismissed before you are ready can cause complications with regards to the healing process and timeframe. You know your body and what home life is like and if you need one more day or more information. This time needs to be provided or at least offered. Not being able to get general questions answered when you call the hospital can cause unnecessary charges, since before they would answer the questions and you wouldn't need to bring your children in.

### **4. Why is this important to you?**

- I have kids and a mother who have health issues.

## **Key Informant #10**

### **1. How have you seen Rock County change?**

- Growth of the Beloit Area Health Center has helped people with state insurance. I have also heard more about HealthNet, which is good.

### **2. What are the concerns?**

- Lack of access to dental care for those that are underinsured and uninsured. This is a huge need, especially for children.

### **3. Why are you concerned with this?**

- Children especially need quality dental care.

### **4. Why is this important to you?**

- I have two children and I work in the school district. I see a lot of children and families that need this service in our area.

## **Key Informant #11**

### **1. What are the concerns?**

- Top issues: STIs, Drugs-Opioids and Heroin, and Diabetes and Hypertension.

### **2. What are the assets in the community?**

- What they Like: Love Beloit. One was born and raised then went to college and returned. The other has lived in Beloit for 5 years. They like the connections-know the community. Close knit community.

### **3. Why are you concerned with this and why is this important to you?**

- Health system: doctors don't listen and not reading their chart. Struggles to find a good doctor. Doesn't feel comfortable with doctor. "Would rather die than go back to him." Likes First Choice because they talk to me and make me feel comfortable. They care. Doctors don't have understanding of different cultures.

## **Key Informant #12**

### **1. How have you seen Rock County change?**

- 47 years in Janesville. People thought he was Hispanic because of his name. Once they found out he was Italian he felt he was accepted. Got the impression that he would not have been accepted if he were Hispanic.

### **2. What are the concerns?**

- Health Issues: Mental Health-lack of knowledge or empathy for mental health.
- Food deserts and transportation challenges.

### **3. What are the assets in the community?**

- What they like: Good that there are two hospitals and close to Madison. Trails.

### **4. Why are you concerned with this and why is this important to you?**

- What they would like to see: Embrace diversity more. Seen great improvement but still a long way to go.
- The City, County, NPO organizations, Schools improving with diversity. School system not as good anymore after Act 10. All the good people left.

## Appendix E

Members listing of the Health Equity Alliance of Rock County (HEAR) committee.

<b><u>Name</u></b>	<b><u>Organization</u></b>
Angela Flickinger	University of Wisconsin Extension
Angie Sullivan	SSM Health
Christina Arambula	Community Action-First Choice

## Appendix F

27. Are you able to see a dental provider that accepts your insurance?

- Yes  
 No

28. If you don't have a regular dental provider, tell us why: (Check all that apply)

- Not applicable (N/A)  
 Don't know how to find a dental provider  
 No dental provider is close to where I live  
 No dental providers accept my insurance  
 Can't afford to pay for a dental visit  
 Can't get an appointment  
 Language/cultural barriers  
 Feel like I don't need one  
 Other \_\_\_\_\_

29. If you don't have dental insurance, tell us why: (Check all that apply)

- Not applicable (N/A)  
 Too expensive  
 Place(s) where you work does not offer it  
 Not qualified for the plan where you work  
 Not qualified for dental assistance  
 Don't know where/how to sign up for dental insurance  
 Feel like you don't need dental insurance  
 Other \_\_\_\_\_

30. In the past 12 months, was there a time when you, or someone your household, needed to see a mental health professional, but could not?

- Yes  
 No

On behalf of the Health Equity Alliance of Rock County (HEAR) we would like to thank you for taking the time to respond to the survey. Your participation is greatly appreciated.  
If you are interested in joining the Health Equity Alliance of Rock County (HEAR) please contact:  
Kelly Klingensmith, MPH  
Community Health Education Coordinator  
Rock County Public Health Department  
P.O. Box 1088  
Janesville, WI 53547-1088  
608-757-5431  
Kelly.Klingensmith@co.rock.wi.us

31. In the past 12 months, was there a time when you or someone your household needed alcohol or other drug treatment, but could not access it?

- Yes  
 No

32. In the past 12 months, was there a time when you, or someone in your household, needed medications, but could not get them?

- Yes  
 No

33. If you, or someone in your household, could not get the medications you needed, tell us why: (Check all that apply)

- Not applicable (N/A)  
 Too expensive  
 Could not get a prescription from a physician  
 Language/cultural barriers  
 Specific medication I needed was not available  
 Lack of ride to pharmacy  
 Inconvenient pharmacy hours  
 Do not have a pharmacy  
 Other \_\_\_\_\_

34. Do you have anything else you would like us to know?

The Health Equity Alliance of Rock County (HEAR) is conducting a Community Health Assessment survey to better understand the health concerns and needs in Rock County. We invite anyone that lives, works, learns, or plays in Rock County to take the survey. The information obtained from the Community Health Assessment will be used in the development of an action plan to help ensure that Rock County reaches its full health potential.

Please return this survey or complete the survey online at  
<https://www.surveymonkey.com/r/RockCountyCHAmail> by March 1, 2017

- Menos de \$14,999
- \$15,000 - \$24,999
- \$25,000 - \$44,999
- \$45,000 - \$64,999
- \$65,000 - \$94,999
- \$95,000 - \$134,999
- Más de \$135,000

8. ¿Cuántas personas viven en su hogar?

- Vive Solo
- 2
- 3
- 4
- 5
- 6
- 7
- 8 o más

9. ¿Cuántas personas en su hogar tienen menos de 18 años?

- Nadie en mi hogar tiene menos de 18 años
- 1
- 2
- 3
- 4
- 5
- 6
- 7 o más

10. ¿Cómo se describe? (Por favor, solo escoja una opción)

- Hombre
- Mujer
- Hombre Transgénero
- Mujer Transgénero
- Género no Conforme
- Si no aparece, por favor identifiquese \_\_\_\_\_

11. ¿Cuál es su orientación? (Por favor, solo escoja una opción)

- Heterosexual
- Hombre Homosexual
- Mujer Homosexual
- Bisexual
- Si no aparece, por favor identifiquese \_\_\_\_\_

#### Preguntas de Salud Comunitaria

12. ¿Cómo calificaría la salud del condado de Rock en general?

- Muy Sana
- Sana
- Más o Menos Sana
- Mal
- Muy Mal
