

WHO ARE OUR CARE MANAGERS?

Our Care Managers are professionally licensed nurses, who understand the health care system, its complexities and the services within the community. They are part of your personalized plan of care, working with your Primary Care Physician to access high quality and cost-effective options to meet your health care needs.

CARE MANAGEMENT PROGRAM

A program designed to help you access high quality and cost-effective options to meet your healthcare needs.

**Better Health begins at
www.scheurer.org**

QUESTIONS? CARE MANAGEMENT CAN HELP!

- Do I know/understand my current diagnoses, prognoses and medical needs?
- Am I safe and well cared for?
- Am I struggling with my medications? (For example, taking them on time, understanding what they are for and knowing the side effects.)
- Have I designated someone to make healthcare decisions for me, if I am unable to do so myself?
- Am I eating a healthy, well-balanced diet and am I getting regular exercise?
- Do I feel like I need more social interactions?
- Am I aware of the community resources and assistance available?
- When do I need to consider moving from home to a more secure environment?

SERVICES OFFERED

- Health assessments and identification of needs
- Care planning and recommendations
- Coordination of medical and community resources
- Screen, arrange and monitor services
- Counseling, education and support
- Provide information and assist with the selection of a retirement community, assisted living facility and/or skilled nursing facility
- Advocacy and monitoring to assure quality of services
- Serve as a liaison with health care providers
- Communicate with families and care providers

HOW CAN CARE MANAGERS HELP ME?

Upon contact, our care managers will schedule a visit to meet with you in order to conduct a thorough assessment of your health care needs. They will identify barriers, the need for assistance and/or services, review medical history and your current health status. Together, you develop a personalized plan of care to help you achieve and maintain your health goals. They work with your provider as part of your health care team to ensure you get the best possible care.
