SCR Launches "ONE" Integrated Electronic Health Record System

St. Claire Regional began the implementation of "ONE" Integrated Electronic Health Record system with a kick-off meeting July 13. "The upgrade to ONE will create a greater focus on patient care and standardization of processes across both inpatient and outpatient care settings; thus, improving patient care and patient safety while reducing costs," says Mark J. Neff, SCR President/CEO.

Meditech's 6.16 Web EHR is a clinically-integrated, state-of-the-art healthcare solution that has so much to offer SCR's healthcare providers and patients. "It means universal access to the complete patient story — it's just what SCR was looking for to improve our workflows and patient care experiences," says Lee Ann OBryan, Admin. Director, Informatics & Imaging.

"We know that this is the right system, and the right vendor partnership for us heading into the future. SCR's decision to move to ONE was all about long-term

strategy," OBryan said. The ONE Web EHR is designed to help SCR tackle healthcare challenges that go well beyond the next five years. We are very excited about what's ahead, and we're looking forward to seeing all we can do with this bold new technology.
