## St. Claire HealthCare Successfully Launches "ONE" Integrated Electronic Health Record

 St. Claire HealthCare  
  
 Integrated Electronic Health Record

**Our success is a true reflection of the commitment SCH staff and providers have to our patients.**

### After months of research, planning and training, our enterprise-wide "ONE" integrated electronic health record went live on July 1!

This project created numerous opportunities to improve the care and experience of our patients, and our commitment to the success of patient centric workflows. Extensive effort has been focused on evaluation of our workflows and processes to ensure our electronic health record is designed to meet our goal of the patient being the center of everything we do.

Thank you to all SCH staff for your cooperation and patience through this transition. We will continue to work with our vendor to close any gaps that have been identified since go-live. According to the feedback from our project partners, MEDITECH and Jacobus, based on their experience with other implementations, ours has been overwhelmingly successful!
