The Center for Trauma Informed Innovation

The world has changed. We are all navigating more trauma than ever before. Could your organization use some support? Let us help.

Our consultants partner with organizations to cultivate trauma-informed culture.

Trauma-informed organizations know how to:

- Recognize the prevalence, signs and impacts of trauma
- Infuse knowledge and shared vocabulary into policies, procedures and practices
- Actively resist re-traumatization
- Prioritize restoration and well-being

Our levels of consulting for trauma-informed support:

**Level 1**
- We conduct an informational interview and/or organizational assessment.
- We coach to organizational strengths and use of resources.
- This level of engagement is typically short-term.

**Level 2**
- We conduct an informational interview and/or organizational assessment.
- We provide support for a targeted trauma-informed project or initiative.
- The timeframe for this level of engagement is based upon project completion.

**Level 3**
- We provide comprehensive support for intentional organizational culture change.
- Our work is guided by The Missouri Model: A Developmental Framework for Trauma-Informed.
- This level of engagement typically lasts 3-5+ years.

“Infusing trauma-informed principles into all facets of what we do, individually and together, has been a paradigm shift. It came at a perfect time as we were navigating unprecedented challenges in society.”

- Sarah Knopf-Amelung
  Director of Resource and Program Development
  Amethyst Place
  Kansas City, Missouri

Though part of University Health Behavioral Health, the services provided by the Center are not therapy or a substitute for therapy.
