

CARL HEINRICH, D.O., TRANSITIONAL YEAR

Where did you attend medical school?

University of North Texas HSC - Texas
College of Osteopathic Medicine

What other higher education, credentials, or certificates have you obtained?

Bachelor of Science, Neuroscience

What is your hometown?

Frisco, Texas

What is your medical practice interest?

Dagnostic Radiology

Why did you choose the Unity Health Graduate Medical Education program?

The opportunity it presented to serve a small, close-knit community while allowing the independence required to learn and practice skills as a first-year resident in patient management and decision-making. I also like the ability to complete multiple electives so that I can gain insight into the steps that physicians in different fields take to decide on ordering radiologic imaging so that I can tailor my readings to be as concise and informative for those physicians as possible when I start radiology residency next year.

What impact do you hope to have on the medical field?

I hope to eventually come back to education after independent practice and use the experience I gained to help train the next generation of radiologists.
