

VIVIAN

A man with white hair and glasses, wearing a dark suit and a blue patterned tie, is holding a yellow and white model of a human spine. He is looking towards a woman with short brown hair, wearing a teal blazer over a white top. They are sitting in a room with a large abstract painting of blue and green patterns on the wall behind them.

Her search for world-class spine surgery brought her back home.

When even the smallest tasks caused her severe pain, Vivian Scrocca went to see her doctor who told her she would need back surgery. Fortunately Dr. Andrew Casden, a top spine surgeon from New York City, had just joined the White Plains Hospital Center for Orthopedic & Spine Surgery. Dr. Casden and his partner Dr. Jared Brandoff performed a minimally invasive procedure that eliminated Vivian's pain and got her back on her feet the same day. Now, Vivian can enjoy gardening and vacations with the grandkids once again.

White Plains Hospital
Exceptional, every day.
