

COMPREHENSIVE HEALTH INTERVENTION FOR LIFELONG DEVELOPMENT (CHILD) TRAININGS

All non-licensed medical personnel providing required health screenings for pediatrics are required to complete all applicable Comprehensive Health Intervention for Lifelong Development (CHILD) trainings upon hire **and** every four years to ensure compliance with best demonstrated practices.

Pediatric preventive care screenings for ages 0 to 20 years are based on the American Academy of Pediatrics requirements. Training modules are available on the [GCHP website](#).

_____ **Anthropometric measurements:** Collecting and recording patients' data, including head circumference, height, weight, BMI, and plotting values on World Health Organization (WHO) and Centers for Disease Control and Prevention (CDC) growth charts. (Approx. 15 minutes.)

_____ **Hearing screening:** performing audiometric testing, not requiring interpretation by the medical assistant to obtain test results. (Approx. 26 minutes.)

_____ **Vision screening:** performing visual field testing, simple or automated ophthalmic testing, not requiring interpretation by the medical assistant to obtain test results. (Approx. 32 minutes.)

_____ **Dental services:** performing oral and fluoride screenings, establish dental home, referral to a dentist at least annually, and applying fluoride varnish. (Approx. 18 minutes.)

This is to attest that _____ has demonstrated and completed all applicable CHILD trainings.
