INTRODUCTION

We are pleased to provide the **Gold Coast Health Plan List of Covered Drugs** as a useful reference and informational tool. The **GCHP List of Covered Drugs** can assist practitioners in selecting clinically appropriate and cost effective products for their patients.

The information contained in the **GCHP List of Covered Drugs** is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This **List of Covered Drugs** is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in this **List of Covered Drugs** is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at <http://www.guideline.gov>

PREFACE

The **GCHP List of Covered Drugs** is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Unless exceptions are noted, generally all applicable dosage forms and strengths of the drug cited are included in the **GCHP List of Covered Drugs**. **Generics should be considered the first line of prescribing.**

Drugs represented in the **GCHP List of Covered Drugs** may have varying cost to the plan member based on the plans benefit structure. Generic medications typically are available at the lowest cost, brand-name medications on the **GCHP List of Covered Drugs** will generally cost more than generics, and brand-name medications not on the list will generally cost the most.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of the **GCHP Pharmacy and Therapeutics Committee ("P&T Committee")** are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an external advisory body of experts. The P&T Committee's voting members include physicians and pharmacists, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Employees with significant clinical expertise are invited to meet with the P&T Committee. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. However, not all strengths or dosage forms of the generic name in may be generically available. The **GCHP List of Covered Drugs** is a mandatory generic drug list. So whenever a generic to a covered agent becomes available, it is added. And if the branded agent was part of the cover drug list, the branded agent will be removed from the covered drug list.

Generic drugs are usually priced lower than their brand-name equivalents. Generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.
- When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

SPECIALTY PLAN DESIGN

Specialty Guideline Management (SGM)

SGM is our utilization management program that helps ensure appropriate utilization for specialty medication based on currently accepted evidence-based medicine guidelines. The utilization management program is available for all therapeutic areas dispensed by our specialty pharmacies. SGM is designed to ensure safety and efficacy while preventing off-guideline utilization. Medications which may be included in the SGM program are identified in the **GCHP List of Covered Drugs** under the heading of “Specialty” for your reference. SGM may also be combined with Inventory Management/ Dose Optimization and Optimal Drug Mix through High Performance Specialty Design to appropriately manage specialty medications.

PLAN DESIGN

The **GCHP List of Covered Drugs** is a closed drug list plan design. The medications listed on the drug list are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e. Step Therapy, LMN, CPA, Quantity Limits, etc); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity.

Should it become necessary to write a prescription for a drug, which is not on the **GCHP List of Covered Drugs**, one must obtain clinical prior authorization.

LEGEND

PA	Prior Authorization
QL	Quantity Limit
ST	Step Therapy
SP	Specialty - Limited to Specialty Pharmacies

EXCLUDED THERAPEUTIC CLASSES AND DRUGS FROM GCHP LIST OF COVERED DRUGS

These therapeutic classes of drugs are carved out from the **GCHP List of Covered Drugs**. This means that when one of these medications is prescribed, it will be filled by the pharmacist, who in turn will bill the State of California for reimbursement.

DEPENDENCY TREATMENT		
Acamprosate Calcium	Buprenorphine Transdermal Patch	Naltrexone Microsphere Injectable
Buprenorphine HCl	Naltrexone	Suspension
Buprenorphine HCl-Naloxone HCl	Naltrexone HCl	Naloxone HCL

HIV		
Abacavir Sulfate	Elvitegravir-Cobicistat-Emtricitabine-	Lopinavir-Ritonavir
Abacavir Sulfate-Lamivudine	Tenofovir DF	Maraviroc
Abacavir Sulfate-Lamivudine-Zidovudine	Elvitegravir-Cobicistat-Emtricitabine-	Nevirapine
Abacavir Sulfate-Dolutegravir-Lamivudine	Tenofovir Alafenamide	Nelfinavir Mesylate
Atazanavir Sulfate	Emtricitabine	Raltegravir Potassium
Atazanavir-Cobisitat	Emtricitabine-Rilpivirine-Tenofovir DF	Rilpivirine Hydrochloride
Cobicistat	Emtricitabine-Rilpivirine-Tenofovir Alafen.	Ritonavir
Darunavir Ethanolate	Emtricitabine-Tenofovir DF	Saquinavir
Darunavir-Cobicistat	Enfuvirtide	Saquinavir Mesylate
Delavirdine Mesylate	Etravirine	Stavudine
Dolutegravir	Fosamprenavir Calcium	Tenofovir Disoproxil Fumarate
Efavirenz	Indinavir Sulfate	Tipranavir
Efavirenz-Emtricitabine-Tenofovir DF	Lamivudine	
Elvitegravir	Lamivudine-Zidovudine	

ERECTILE DYSFUNCTION

COAGULATION FACTORS		
Antihemophilic Factor(Factor VIII)	Factor VIIa	Factor IX
Factor IX Complex	Factor XIIIa	Factor XIII
Antihemophilic Factor/Von Willebrand Complex	Anti-inhibitor Coagulant Complex	Von Willebrand Factor Complex

PSYCHIATRIC		
Amantadine HCl	Iloperidone	Phenelzine Sulfate
Aripiprazole	Isocarboxazid	Pimozide
Asenapine Maleate	Lithium Carbonate	Quetiapine
Benzotropine Mesylate	Lithium Citrate	Risperidone
Brexpiprazole	Loxapine Succinate	Selegiline TD Patch
<i>Cariprazine (pending)</i>	Lurasidone Hydrochloride	Thioridazine HCl
Chlorpromazine HCl	Molindone HCl	Thiothixene
Clozapine	Olanzapine	Thiothixene HCl
Fluphenazine Decanoate	Olanzapine-Fluoxetine HCl	Tranlycypromine Sulfate
Fluphenazine HCl	Olanzapine Pamoate	Trifluoperazine HCl
Haloperidol	Paliperidone	Trihexyphenidyl
Haloperidol Decanoate	Paliperidone Palmitate	Ziprasidone HCl
Haloperidol Lactate	Perphenazine	Ziprasidone Mesylate
