

2024 Measurement Year
**MCAS MEASURE: PRENATAL DEPRESSION SCREENING
AND FOLLOW-UP (PND-E)**

Measure Steward: National Committee for Quality Assurance (NCQA)

Gold Coast Health Plan's (GCHP) goal is to help its providers gain compliance with their annual Managed Care Accountability Set (MCAS) scores by providing guidance and resources. This tip sheet provides the key components to the MCAS measure, "Prenatal Depression Screening and Follow-Up (PND-E)."

Measure Description: The percentage of members with deliveries who were screened for clinical depression while pregnant, and if screened positive, received follow-up care.

- ▶ Depression Screening: The percentage of members with deliveries who were screened for clinical depression during pregnancy using an age-appropriate standardized screening instrument.
- ▶ Follow-Up on Positive Screen: The percentage of members with deliveries who received follow-up care within 30 days of a positive depression screen finding.

Data Collection Method: Electronic Clinic Data Systems (ECDS)¹

Standardized Instruments:

- A standard assessment instrument that has been normalized and validated for the appropriate patient population. Eligible screening instruments with thresholds for positive findings include:

Standardized Instruments	Age ≤ 17	Age 18+	Positive Finding	LOINC Code
Patient Health Questionnaire Modified for Teens (PHQ- 9M) [®]	X		Total Score ≥ 10	89204-2
Patient Health Questionnaire (PHQ-9) [®]	X	X	Total Score ≥ 10	44261-6
Patient Health Questionnaire-2 (PHQ-2) ^{®2}	X	X	Total Score ≥ 3	55758-7
Beck Depression Inventory-Fast Screen (BDI-FS) ^{®2,3}	X	X	Total Score ≥ 8	89208-3
Center for Epidemiologic Studies Depression Scale—Revised (CESD-R)	X	X	Total Score ≥ 17	89205-9
Edinburgh Postnatal Depression Scale (EPDS)	X	X	Total Score ≥ 10	71354-5
PROMIS Depression	X	X	Total Score ≥ 60	71965-8
Beck Depression Inventory (BDI-II)		X	Total Score ≥ 20	89209-1
Duke Anxiety-Depression Scale (DUKEAD) ^{®2}		X	Total Score ≥ 30	90853-3
My Mood Disorder (M-3) [®]		X	Total Score ≥ 5	71777-7
Clinically Useful Depression Outcome Scale (CUDOS)		X	Total Score ≥ 31	90221-3

PND-E Clinical Code Set

For billing, reimbursement, and reporting of services completed, submit claims in a timely with the appropriate medical codes for all conditions evaluated and services completed.

Methods identify a follow-up on a positive screening within 30-Days:

- ▶ A clinic encounter.
- ▶ A dispensed antidepressant medication.
- ▶ Documentation of additional depression screening on a full-length instrument indicating either no depression or no symptoms that require follow-up (i.e., a negative screen) on the same day as a positive screen on a brief screening instrument.

PND-E Clinical Code Set

- ▶ For billing, reimbursement, and reporting of services completed, submit claims in a timely with the appropriate medical codes for all conditions evaluated and services completed.

Codes to identify clinic encounters.

Description	CPT	HCPCS	UBREV
An outpatient, telephone, e-visit, or virtual check-in with a diagnosis of depression or behavioral health condition. Exclusion Criteria – Members with the following conditions are excluded from the PND-E measure:

- ▶ Deliveries that occurred at less than 37 weeks gestation.
- ▶ Deliveries in which members were in hospice or using hospice services any time during the measurement period.
- ▶ Members who die anytime during the measurement period.

Best Practices:

- ▶ Use the Inovalon® INDICES® Provider Insights Dashboards to identify members with gaps in care.
- ▶ Make outreach calls and/or send letters to advise members of the need for a visit.
- ▶ Clinical Recommendations:
 - The U.S. Preventive Services Task Force (USPSTF) recommends screening for depression among adolescents and adults, including pregnant and postpartum women.

- The American College of Obstetricians and Gynecologists (ACOG) recommends that clinicians screen patients at least once during pregnancy or the postpartum period for depression and anxiety symptoms using a standardized, validated tool.
- The USPSTF and ACOG also recommend that screening be implemented with adequate systems in place to ensure accurate diagnosis, effective treatment, and appropriate follow-up.
- ▶ Members of the care team understand the importance of depression screening and to recognize the risk factors for depression in pregnancy.
- ▶ Work with a care manager or team member to coordinate care and follow-up for members with a positive screening.
- ▶ Behavioral health referrals can be made through Carelon Behavioral Health (formerly Beacon Health Options). Providers may also use this link to access valuable information, forms and documents: [Click Here](#)
- ▶ GCHP's team of nurses, social workers and care management coordinators work together to empower members to exercise their options and access the services appropriate to meet their individual health needs to promote quality outcomes. GCHP Care Management includes complex and non-complex care management that offers transition to adult services, disease specific education, identification of social determinants of health and linkage to appropriate resources in the community. To learn more, please call GCHP's Care Management Team at:
 - Providers, call: 1-805-437-5777
 - Members, call: 1-805-437-5656
