# myData

trustworthy and secure data exchange by design

Todays digital business models need **trusted Data!** myData is the leading platform for the realization and Todays digital business models need trusted Data! myData is the leading platform for the realization and operation of **data driven business models.** The data owner retains **complete control and transparency** over all data while the data user has **legitimate data** at all times.

myData is an unlimited scalable cloud solution and allows a variety of operating model variants:

- in a private cloud environment
- in a public cloud environment and/or hybrid public/private variants
- as an integrated software component for existing environments, such as IoT platforms

The function and operation of myData is simple and without any complexity. The Data owners can view or agree any time to the use of their data through an app or desktop application.

data owner   data user

myData guarantees state-of-the art security, maximum flexibility and is already in use with the e-mobile CHECKER and SafePark.
