

e-mobile CHECKER

The electric car for your pocket

The e-mobile CHECKER answers the three most important questions about e-mobility:

- How many of my trips can be made electrically?
- Which class of vehicle is right for me?
- Which charging infrastructure do I need?

The e-mobile CHECKER App records every trip you make on a given day – whether by car, bike, bus or train – and delivers an immediate answer to the question of how many of those trips could have been made with a specific class of electric car and charging infrastructure.

Safety first

The data recorded by the e-mobile CHECKER is 100% confidential. All data remains on your cell phone, and you are the only who can decide how it is used.

Free download!

The e-mobile CHECKER is your personal, pocket-sized electric car! 100% confidential! Available now on the app stores for iOS and Android!
