

## DS-PRI120 Security Radar

DS-PRI120 security radar, which adopts phased array technology, pulse doppler and low-power FMCW modulation technology for intrusion detection. It supports multi-target positioning, tracing and multiple linked cameras tracking. Through intelligent algorithm analysis, it can filter out false alarms under various circumstances. It can work properly day and night in various environments, such as rain, fog, and so on. It is mainly used in the military base, prison, power station, railway, museum, airport and other security places.

### Key Features

- Max. 4 trigger lines and 16 zones
- Selectable frequency band
- Links up to 4 separate-mounted speed domes for auto target-tracking
- Multiple radars can link to 1 speed dome
- Up to 4 targets can be tracked by 4 speed domes respectively
- Function of radar-speed dome linkage: mandatory switch of speed dome tracking target ,speed dome parking action, and field of view display for each speed dome
- Capable to detect ultra-slow movements, squatting movements or creeping
- Displays the distance, direction, and position of the detected object on the client software
- Selectable applications including open mode, shrub mode, and custom mode (with adjustable sensitivity)
- 24/7 all-weather working properly
- Exception alarm: communication failure alarm, anti-moving alarm and tampering alarm
