

## DS-PDSK-P Wired Shock Detector

- Reliable perimeter protection offering early detection
- Adjustable sensitivity with gross attack override
- Advanced Digital Background-Noise Filter

## Dimension

## Specification

| Detection Performance             |                                   |
|-----------------------------------|-----------------------------------|
| Detection Method                  | Shock Sensor                      |
| Sensitivity                       | Potentiometer Adjustment          |
| Feature                           |                                   |
| Digital Processing                | Support                           |
| Tamper Protection                 | Front                             |
| Interface                         |                                   |
| Alarm Output                      | Normally Closed                   |
| LED Indicator                     | Blue(Alarm)                       |
| Transmission                      |                                   |
| Transmission Method               | Wired                             |
| <b>Electrical Characteristics</b> |                                   |
| Power Supply                      | 9 - 16 VDC                        |
| Typical Voltage                   | 12 V                              |
| Power Consumption                 | 30mA                              |
| General                           |                                   |
| Operation Temperature             | -10 °C to 55 °C (14 °F to 131 °F) |
| Storage Temperature               | -20 °C to 60 °C (-4 °F to 140 °F) |
| Operation Humidity                | 10% to 90%                        |
| Dimension(WxHxD)                  | 30 mm x 108 mm x 22 mm            |
| Weight                            | 37.5 g                            |
| Application Scenario              | Indoor                            |

## Available Model

DS-PDSK-P
