

# Vikas Mann

(306) 351-9763 | vickymann9772@gmail.com | linkedin.com/in/vikassinghmann | github.com/vckymann | vikasmann.framer.ai

## Education

### University of Regina

Regina, SK

Graduated: 2025

## Work Experience

### Cloudshift

Software Developer

Mar 2023 – Sep 2025

Remote

- Built and shipped **end-to-end product features** from scratch across **frontend and backend** within a **Scrum-based agile team**
- Collaborated closely with **Product Managers** and **Designers** to iterate on features using **customer feedback** and **usage data**
- Contributed to the migration of a **monolithic application** toward a **service-based architecture** using **Node.js services**
- Owned **bug fixing, testing, and quality improvements**, reducing customer-reported issues by **30%**
- Deployed and supported services on **AWS**, participating in **debugging, monitoring, and release workflows**
- Developed and integrated **backend APIs** using **Node.js** and **PostgreSQL**, ensuring efficient data access and consistency across services
- Implemented **Next.js SSR and SSG** strategies to improve **page load performance, SEO, and perceived responsiveness**
- Deployed and operated applications on **Vercel**, managing **environment configuration, CI/CD pipelines, and production releases**

### AppyPie

Software Developer Intern

May 2021 – Dec 2022

India

- Built and shipped **Next.js** frontend features with **SSR/SSG**, improving **page load times by 45%** and boosting **organic traffic by 20%**
- Developed and maintained **Node.js + PostgreSQL APIs**, handling **50,000+ daily requests** while ensuring **99.9% uptime** across services
- Refactored codebase with **TypeScript** and **React hooks**, reducing runtime errors by **35%** and accelerating development speed by **30%**
- Implemented **CI/CD pipelines** on **Vercel** and **GitHub Actions**, cutting deployment time from hours to minutes and increasing release frequency by **3x**
- Optimized frontend performance using **lazy loading, dynamic imports, and image optimization**, improving **Core Web Vitals scores by 40%**
- Collaborated with **Product and Design teams** to iterate on features using **user analytics**, increasing user engagement by **25%** and retention by **15%**
- Diagnosed and fixed production issues, implemented automated tests, and improved service reliability, reducing critical incidents by **30%**

### Freelance

Software Developer

Present

Remote

- Delivered **end-to-end web applications** using **Next.js, React, Node.js, and TypeScript**, improving user performance by **40%** and reducing load times across client projects
- Designed and optimized **relational database schemas** in **Supabase**, enabling **50% faster queries** and handling **10,000+ records** efficiently
- Built **reusable UI components** and **backend APIs**, supporting **scalable product features** and reducing feature rollout time by **30%**
- Deployed client projects on **Vercel**, managing **CI/CD pipelines, previews, and production releases** with **zero downtime**

- Implemented **Git/GitHub workflows** for version control, enabling **collaborative development** across multi-person teams and improving merge efficiency by **25%**
- Worked directly with **clients** to gather requirements, estimate scope, and ship features quickly, increasing client satisfaction and project delivery speed by **35%**

## Projects

---

**Jobify** | *Website* | Source Code

**Next.js** | **MongoDB** | **Cloudinary**

- Built a responsive job platform with AI-powered resume analysis and job matching, achieving **85% accuracy** in matching resumes to relevant job listings
- Utilized **MongoDB** for data storage, **Next.js** for backend API, and **React.js** for the user interface

**SavorSpot** | *Website*

**React** | **JavaScript** | **Tailwind**

- Built a **responsive frontend** for browsing food items and placing orders using **Next.js** and **React**, reducing page load times by **40%** and improving perceived user responsiveness

**Stealth** | *Website* | Source Code

**React** | **Node.js** | **PostgreSQL**

- Developed a **full-stack shoe store** with **Next.js**, **React**, **Node.js**, and **PostgreSQL**, implementing full **CRUD operations**, a **shopping cart**, and **checkout flow**

## Technical Skills

---

**Languages:** SQL, HTML5, CSS, JavaScript, TypeScript

**Developer Tools:** AWS, Postman, Git, Vercel, Figma, Slack

**Libraries/Frameworks:** ReactJS, PostgreSQL, NextJS, NodeJS, Tailwind, MongoDB, Supabase

**Other:** LLM Integrations, REST APIs, Authentication and Authorization Systems
