Tangerang, Banten

Full Stack Developer with **1 year internship experience** building **web systems** and **automation tools** across two industries. Skilled in **Laravel, Vue.js, Javascript, MySQL, and Google Apps Script**, with a proven ability to deliver end-to-end solutions from development and deployment to documentation that enables non technical teams to operate independently

## EXPERIENCES

---

### Hactiv8 - South Jakarta

Oct 2025 - Apr 2026

#### Bootcamp Program Assistant - Intern

- Developed **5+ internal automation tools** using Google Apps Script, reducing manual operational data processing by **~2 hours/week** across the team
- Integrated Gmail API into automation workflows to automatically distribute generated documents to **5–15 recipients** per run, eliminating manual email handling
- Documented **all 5+ tools in structured SOPs**, enabling non technical team members to independently operate and troubleshoot systems

### PT Sucofindo Cilacap Branch - Cilacap

Aug - Dec 2024

#### Full Stack Web Developer - Intern

- Developed **3 web systems** (POS, asset management, CO<sub>2</sub> tracker) over **5 months** using **Laravel, Vue.js, JavaScript, Tailwind CSS, and MySQL**, then deployed to an internal server
- Implemented **30+ features** across all systems, including multi-branch transactions, asset status tracking, and automated CO<sub>2</sub> emission calculations based on fuel consumption data
- Produced **2 technical documentation and user manuals**, enabling non-technical teams to operate, maintain, and troubleshoot the systems independently

## EDUCATION

---

### Politeknik Negeri Cilacap

2022 - 2025

Associate Degree in Informatics, GPA: 3.78/4.00

## TRAINING

---

### Coding Camp By DBS Foundation

Feb - Jul 2025

#### Full Stack Web Cohort

- Completed **9 courses** covering **JavaScript fundamentals** to **REST API development**, with **6+ graded project submissions**
- Built and integrated a REST API with **Hapi.Js** and **Supabase** as the primary contributor in the Capstone Project

- **Configured a Linux based VPS** for production deployment, managing server setup, SSH access, and PM2 process management to ensure continuous application uptime

## **Vocational School Graduate Academy**

Jun - Jul 2023

### *Junior Web Developer Cohort*

- Completed **90 hours** of PHP programming training through Vocational School Graduate Academy, with **3+ graded project submissions**
- Learned to build web applications using **native PHP** without frameworks

## **SKILLS**

---

- **Backend:** Laravel, PHP, Node.js
- **Frontend:** Vue.js, JavaScript, HTML, CSS, Tailwind CSS
- **Database:** MySQL, Supabase
- **Deployment:** Contabo (VPS), Vercel
- **Tools:** Google Apps Script, Git, Figma, Canva

## **CERTIFICATIONS**

---

- Junior Web Developer Certification – BNSP (2023)
- MikroTik Certified Network Associate (MTCNA) - Mikrotik (2024)
