	Carbon Dioxide is a greenhouse gas which contributes to climate change.					
Less Carbon Dioxide emissions from buildings helps the environment. Benchmarks						
A building of this type built to building regulations standards current at the date of issue of this certificate would have a rating: 26						В
Where the accompanying recommendations for the cost effective improvement of energy performance are applied, this building would have a rating: 69						
Recommendations for the cost-effective improvement (lower cost measures) of the energy performance						
Consider replacing T8 lamps with retrofit T5 conversion kit.						
2. Some windows have high U-values - consider installing secondary glazing.						
3. Some and/or fram	glazing is poorly insulated. Replace/improve gl nes.	azing
