PROJECTS

CovidBW

📅 03/2020 - 2020

🔗 https://github.com/Abel-Moremi/covid-info-bw

Progressive Web Application (PWA). Collaborated with a friend on this project. To create a reliable and accurate source of information for all things COVID-19 in Botswana. The app was designed with a mobile-first approach as this is the primary mode of access to most Batswana.

- The main idea behind the project was to fight all the misinformation surrounding the virus more importantly in the early days
- Used technologies: JavaScript, VueJS, Firebase hosting, Firebase Realtime Database, Cloud Build, Cloud Scheduler, and Cloud Functions

Zimnat Insurance Recommendation Challenge

📅 08/2020 - 09/2020

🔗 https://github.com/Abel-Moremi/Zimnat-Insurance-Recommendation-Challenge

The task was to improve market outcomes for insurance provider Zimnat, by matching consumer needs with product offerings in the Zimbabwean insurance market. Basicaly predict which insurance product existing clients likely to purchase next.

- I placed position 136/614 against Data Scientists from Africa and across the world
- Used Technologies: Jupyter Notebook, Catboost, Panda, Numpy, Sklearn and Hyperopt
