

PROVITAL DETOX

DESCRIPTION

Born from research conducted to identify a product with adsorbing and sequestering action of heavy metals such as copper, **PROVITAL DETOX** also acts on any residues from phytosanitary treatments. Thanks to its specific composition, it combines a powerful antioxidant action even in the absence of sulfur dioxide. Also indicated for the treatment of base wines destined for sparkling wine production. **PROVITAL DETOX** does not contain potassium metabisulfite or ascorbic acid.

COMPOSITION

Mixture of yeast hulls, ellagic and gallic tannins.

APPLICATION

PROVITAL DETOX added to the mass to be treated performs an adsorbing action towards heavy metals, pesticides and phytosanitary residues.

INSTRUCTIONS FOR USE

It is recommended to use **PROVITAL DETOX** by suspending the product in water. Mix the product well creating a homogeneous suspension and incorporate as soon as possible into the mass to be treated.

DOSAGE

Recommended dose: 20 - 60 g/hl

PACKAGING

5 kg bag

STORAGE

Closed package: store in a cool place (temperature below 25°C), dry, ventilated and odor-free. The product maintains its characteristics intact for at least 24 months from the production date.

Opened package: close carefully and store in a cool place (temperature below 15°C), dry and ventilated. Use the product within a short time.

HAZARDS

This product must be stored, handled and used in accordance with appropriate industrial hygiene practices and in compliance with current legislation. Product for food and oenological use, for professional use only.
