

## KARBON GR

### DESCRIPTION

**Karbon GR** is a product based on activated carbon (for enological use) that allows dosing under conditions of total absence of dust. It consists of macroporous activated carbon with high decolorizing power and food-grade bentonite. It comes in granular form, as 3 mm diameter pellets, which can be dosed in the solution to be treated without inconveniences related to dust development. In contact with the aqueous solution, the pellets disperse in a few seconds, allowing immediate action of the activated carbon.

Il **Karbon GR** combines excellent adsorption capacity with high separation characteristics, favored by the presence of bentonite (15%).

CARATTERISTICHE GENERALI		
Methylene blue adsorption	g / 100g	35
Specific surface area (B.E.T)	m <sup>2</sup> / g	1.800
Moisture	% by weight	4
Ash	% by weight	5
Iron (acid extraction)	%	0,05
pH		≤ 3,5

### PACKAGING

20 kg boxes with 2 packages of 10 kg each.

### STORAGE

Closed package: store in a cool place (temperature below 25°C), dry, ventilated and odor-free. The product maintains its characteristics intact for at least 24 months from the production date.

Open package: close carefully and store in a cool place (temperature below 15°C), dry and ventilated. Use the product within a short time.

### HAZARDS

This product must be stored, handled and used in accordance with suitable industrial hygiene practices and in compliance with current legislation. Product for food and enological use, for professional use only.
